Looking In, Seeing Out Minas C. Kafatos,1991-10-01 Most books on science and mysticism attempt to link modern physics to philosophic views of consciousness This book explores the two as parallel processes one outer one inner Our outward search is for objective reality out there in the world But what we experience as outer is linked to what we can know in ourselves subjectively The inward search is for that level of consciousness that underlies all subjective experience spoken of by the mystics Like other recent others Drs Kafatos and Karatou find parallels between Eastern thought and recent scientific developments in quantum theory and cosmology But they go farther and hold that the realms of consciousness and the objective world are complementary aspect of the same reality Their approach is fresh and unique and shows how we are involved in the cosmic process *Feng Shui: Teaching About Science and Pseudoscience* Michael R. Matthews,2019-07-18 This book provides a richly documented account of the historical cultural philosophical and practical dimensions of feng shui It argues that where feng shui is entrenched educational systems have a responsibility to examine its claims and that this examination provides opportunities for students to better learn about the key features of the nature of science the demarcation of science and non science the characteristics of pseudoscience and the engagement of science with culture and

worldviews The arguments presented for feng shui being a pseudoscience can be marshalled when considering a whole range of comparable beliefs and the educational benefit of their appraisal Feng shui is a deeply entrenched three millennia old system of Asian beliefs and practices about nature architecture health and divination that has garnered a growing presence outside of Asia It is part of a comprehensive and ancient worldview built around belief in chi qi the putative universal energy or life force that animates all existence the cosmos the solar system the earth and human bodies Harmonious living requires building in accord with local chi streams good health requires replenishment and manipulation of internal chi flow and a beneficent afterlife is enhanced when buried in conformity with chi directions Traditional Chinese Medicine is based on the proper manipulation of internal chi by acupuncture tai chi and qigong exercise and herbal dietary supplements Matthews has produced another tour de force that will repay close study by students scientists and all those concerned to understand science culture and the science culture nexus Harvey Siegel Philosophy University of Miami USA With great erudition and even greater fluidity of style Matthews introduces us to this now world wide belief system Michael Ruse Philosophy Florida State University USA The book is one of the best research works published on Feng Shui Wang Youjun Philosophy Shanghai Normal University China The history is fascinating The analysis makes an important contribution to science literature James Alcock Psychology York University Canada This book provides an in depth study of Feng Shui in different periods considering its philosophical historical and educational dimensions especially from a perspective of the demarcation problem between science and pseudoscience Yao Dazhi Chinese Academy of Sciences China
