Ness, Deanna Rexe, 2023-05-12 This volume provides an overview of the state of the art of research on the politics of higher education policy in Canada the US and Western Europe Each thematic chapter combines an extensive literature review with original empirical work that further advances our understanding of policymaking dynamics in higher education The book covers five key aspects of policymaking namely the politics of governance as well as funding reforms the role of interest groups policy diffusion and policy framing These aspects are explored using a unique comparative design that combines comparisons within as well as between regions and among the five key aspects of policymaking The conceptual framework is anchored in approaches from institutional theory namely sociological and historical institutionalism This rare book coherently focuses on the same critical challenges that higher education faces in a changing global and national environment These include vital governance and finance issues and how these are framed and contested by different organizations and interest groups as well as state actors Within a broad institutionalist framework that reflects the tensions between historical university and national legacies on the one hand and regional and global influences on the other the authors focus on policymaking in Western Europe Canada and the US This is an engaging and creative endeavor a must read for scholars and policymakers alike Francisco O Ramirez Graduate School of Education Stanford University This is a real achievement that will contribute to the development of research in politics of higher education policy finance and economic development It is timely in an era when higher learning is increasingly salient to national policy interest groups and supranational bodies such as the EU The focus on Canada the US and Europe frames a comparative approach to a competitive higher educational policy arena that has not received systematic study Sheila Slaughter Louise McBee Institute of Higher Education University of Georgia This fills a gaping hole in research on the politics of higher education In bringing together research perspectives from governance studies with comparative public policy as well as scholars from Europe and Northern America this volume will serve as an important reference point for a rapidly growing research field The exceptionally high quality of editorship is documented by the fact that the chapters are convincingly subsumed under five sub themes In short A must read for any researcher and student interested in understanding the political foundations of higher education Marius R Busemeyer Department of Politics and Public Administration University of Konstanz

Moehring,Michael S. Green,2005-03-16 The meteoric rise of Las Vegas from a remote Mormon outpost to an international entertainment center was never a sure thing In its first decades the town languished but when Nevada legalized casino gambling in 1931 Las Vegas met its destiny This act combined with the growing popularity of the automobile cheap land and electricity and changing national attitudes toward gambling led to the fantastic casinos and opulent resorts that became the trademark industry of the city and created the ambiance that has made Las Vegas an icon of pleasure This volume celebrates the city s unparalleled growth examining both the development of its gaming industry and the creation of an urban complex that over two million people proudly call home Here are the colorful characters who shaped the city as

well as the political business and civic decisions that influenced its growth The story extends chronologically from the first Paiute people to the construction of the latest megaresorts and geographically far beyond the original township to include the several municipalities that make up today's vast metropolitan Las Vegas area **Nevada** Michael S. Green, 2015-03-23

Wright, 2005-03-07
