Moral Relativism, Moral Diversity, and Human Relationships James Kellenberger, 2010-11-01 This book aims to clarify the debate between moral relativists and moral absolutists by showing what is right and what is wrong about each of these positions by revealing how the phenomenon of moral diversity is connected with moral relativism and by arguing for the importance of relationships between persons as key to reaching a satisfactory understanding of the issues involved in the debate **Moral Relativism** Steven Lukes, 2011-05-26 Do we as humans have no shared standards by which we can

understand each other Do we truly have divergent views about what constitutes good and evil harm and welfare dignity and humiliation or is there some underlying commonality that wins out These questions show up everywhere from the debate over female circumcision to the UN Declaration of Human Rights They become ever more pressing in an age of mass immigration religious extremism and the rise of identity politics So by what right do we judge particular practices as barbaric Who are the real barbarians This provocative book takes an enlightening look at what we believe why we believe it and whether there really is an irreparable moral discord between us and them **Ethical Relativism and Universalism** Saral

Jhingran, 2001-01-01 The present work addresses itself to one of the most hotly debated issues in contemporary ethics relativism Relativism has become a formidable argument in Western socio moral thought under the impact of postmodern writings The author presents a detailed critique of various relativist and postmodernist theses without rejecting some of their empirically justified observations She underscores the fact that the intercultural communication which has been going on since time immemorial puts a question mark to the postmodernist theories of indeterminacy of translation

incommensurability of various conceptual frameworks etc The author supports cognitivism in ethics according to which the moral properties of the object of moral judgement do in some way determine or cause that judgment This view is not to be confused with any realist ontological commitment She asserts that universalizability is the necessary condition of all rational judgments including the moral ones The author also discusses the relationship between self and others and in this context she draws upon the insights of ancient Indian thinkers She proposes that minimum moral principles and maxims can be agreed upon through reasoning and intercultural discourse Relativism Jack W. Relativism Patrick J.J. Phillips, 2011-11-13 Offering a comprehensive overview and introduction to the concept of relativism and relativistic arguments this book surveys important relativist philosophers both classical and modern Rationalism, Realism, and Relativism Robert L. Arrington, 2019-05-15 During the 1970s and 1980s the field of ethics underwent a profound change in perspective from noncognitivism to cognitivism regarding moral judgments and reasoning Although metaethical noncognitivism had been the predominant point of view during the previous three decades a series of attacks had undermined its authority by the 1970s and it gave way to the cognitivist belief that moral judgments have truth values This book provides a descriptive and critical guide to the often bewildering scene that resulted from these controversies in contemporary moral epistemology The Oxford Handbook of the History of Ethics Roger Crisp, 2013-01-31 Philosophical ethics consists in the human endeavour to answer rationally the fundamental question of how we should live The Oxford Handbook of the History of Ethics explores the history of philosophical ethics in the western tradition from Homer until the present day It provides a broad overview of the views of many of the main thinkers schools and periods and includes in addition essays on topics such as autonomy and impartiality The authors are international leaders in their field and use their expertise and specialist knowledge to illuminate the relevance of their work to discussions in contemporary ethics The essays are specially written for this volume and in each case introduce the reader to the main lines of interpretation and criticism that have arisen in the professional history of philosophy over the past two or three decades Relativism-Relativity Marin Cileia, Maria-Ana Tupan, 2013-07-26 Relativism Relativity An Interdisciplinary Perspective on a Modern Concept is a revisionary and historicist approach to an issue which cuts across the disciplinary borders of science philosophy ethics and art Sceptical of stereotypes including those of the totalising fictions of the Enlightenment supposedly steeped in absolutism and substantialism the authors endeavour to bring to light an alternative mode of cognitive mapping which runs from the seventeenth century to the age of complexity Current notions of fractal geometry rhizomatic linking of open structures hypertextuality the superposition of symbolic systems and nonlinear reality of chance and determinism are traced back to the work of Leibniz Laurence Sterne and D'Alembert Similarly to Heidegger who documented the dark side of the Renaissance in *Les Philosophies de la Renaissance* 1971 the essayists here see the issue of the absolutism relativism polarity as the focal point in the construction of a new eighteenth century whose ground breaking ideas first launched in the tentative form of the essay acquired a quasi canonical status in the French Encyclopaedia and referenced other disciplinary fields psychology ethics social science entering into fertile negotiations with discursive and formal innovations in literature Rationality, Relativism and the Human Sciences Joseph Margolis, A.S. Krausz, R. Burian, 2012-12-06 The Greater Philadelphia Philosophy Consortium was launched in the early eighties It began during a particularly lean period in the American economy But its success is linked as much to the need to be in touch with the rapidly changing currents of the philosophical climate as with the need to insure an adequately stocked professional community in the Philadelphia area faced

perhaps permanently with the threat of increasing attrition The member schools of the Consortium now include Bryn Mawr College the University of Pennsylvania Temple University and Villanova University that is the schools of the area that offer advanced degrees in philosophy The philosophy faculties of these schools form the core of the Consortium which offers graduate students the instructional and library facilities of each member school The Consortium is also supported by the associated faculties of other regional schools that do not offer advanced degrees notably those at Drexel University Haverford College La Salle University and Swarthmore College both philosophers and members of other departments as well as interested and professionally qualified persons from the entire region The affiliated and core professionals now number several hundreds and the Consortium s various ventures have been received most enthusiastically by the academic community At this moment the Consortium is planning its fifth year of what it calls the Conferences on the Philosophy of the Human Studies

Evolution and the Foundations of Ethics

John Mizzoni,2017-02-03

If human biological evolution is part of our worldview then how do commonplace notions of ethics fit in To ask the question what does evolution imply about ethics we must first be clear about what we mean by evolution Evolution and the Foundations of Ethics discusses four models of evolution represented by Darwin Dawkins Gould and Haught We must also be clear about what we mean by ethics Do we mean metaethics If so which variety With metaethical theories such as Error Theory Expressivism Moral Relativism and Moral Realism theorists are attempting to explain the general nature status and origins of ethics In the first four chapters of this book Part I John Mizzoni examines how metaethical theories fit with evolution Next in asking about the implications of evolution for ethics do we mean normative ethics Theorists who work with normative ethical theories such as Virtue Ethics Natural Law Ethics Social Contract Ethics Utilitarian Ethics Deontological Ethics and Ethics of Care articulate and defend a normative ethics that people can and do use in a practical way when deliberating about specific actions rules and policies The next six chapters Part II look at how normative ethical theories fit with evolution A full reckoning of ethics and evolution demands that we consider the range of ethical elements both metaethical and normative Thus this book looks at what several different models of evolution imply about four metaethical theories and six normative ethical theories This book will be of interest to scholars interested in the intersection of evolutionary theory and ethical theory

Philosophy Unmasked

Laurie Calhoun,1997 A scathing critique of analytic philosophy contending that philosophy is a subjective enterprise and snubbing its nose at all first order philosophical theories Biting the hand that feeds her Calhoun philosophy State U of New York advances a metaphilosophical theory arguing that academia discourages skepticism among students excludes non philosophers from dialogue and perpetuates a false notion of philosophical proof which renders contemporary philosophy inaccessible and of little relevance to human life She bolsters her criticism with references to Richard Rorty and is clear as a bell in her polemics This volume will surely upset stomachs in the ivory tower Annotation copyrighted by Book News Inc Portland OR

The Psychological Basis of Moral Judgments

John Park,2021-07-18

This volume examines the psychological basis of moral judgments and asks what theories of concepts apply to moral concepts By combining philosophical reasoning and empirical insights from the fields of moral psychology cognitive science evolutionary psychology and neuroscience it considers what mental states not only influence but also constitute our moral concepts and judgments On this basis Park proposes a novel pluralistic theory of moral concepts which includes three different cognitive structures and emotions Thus our moral judgments are shown to be a hybrid that express both cognitive and conative states In part through analysis of new empirical data on moral semantic intuitions gathered via cross cultural experimental research Park reveals that the referents of individuals moral judgments and concepts vary across time contexts and groups On this basis he contends for moral relativism where moral judgments cannot be universally true across time and location but only relative to

groups This powerfully argued text will be of interest to researchers academics and educators with an interest in cognitive science moral theory philosophy of psychology and moral psychology more broadly Those interested in ethics applied social psychology and moral development will also benefit from the volume
