shifted its foreign policy from one that avoided engagement in international organizations to one that is now embracing them. These moves present a new challenge to international relations theory. How will the global community be affected by the engagement of this massive global power with international institutions? This new study explores why China has chosen to abandon its previous doctrine of institutional isolation and details how it is currently unable to balance American power unilaterally and details an indirect path to greater power. In addition, it includes the first major analysis of the Shanghai Cooperation Organization comprising China, Russia, and most of Central Asia. In contrast to many works on the rise of China, this question, which places an emphasis on her material goods and powers, this book delivers a new approach. It shows how the unique barriers Beijing is facing are preventing the country from taking the traditional paths of territorial expansion and political economic domination in order to develop as a great power. One of these barriers is the United States and its inherent military and economic strength. The other is the existence of nuclear weapons, which makes direct great power conflict unacceptably costly. China has therefore opted for a new path using institutions as stepping stones to great power status. This book will be of great interest to students and scholars of international relations, world politics, world history, and Asia.

Chinese Foreign Relations Robert G. Sutter, 2010. A third edition of this book is now available. This comprehensive and thoroughly updated introduction to Chinese foreign relations discerns the opportunities and limits China faces as it seeks increased international influence. Tracing the record of twists and turns in Chinese foreign relations since the end of the Cold War, Robert G. Sutter provides a nuanced analysis that shows that despite popular perceptions of its growing power, Beijing is hampered by both domestic and international constraints. This text's balanced and meticulous assessment shows China's leaders exerting more influence in world affairs but remaining far from dominant. Facing numerous contradictions and tradeoffs, they move cautiously as they deal with a complex global environment. **Two Dreams in One Bed** Hyun Ok Park, 2005-11-04. A detailed examination of the contest in Manchuria between Korean, Chinese, and Japanese interests and its consequences for history.

Emerging Powers, Emerging Markets, Emerging Societies Steen Fryba Christensen, Li Xing, 2016-04-08. The rise of emerging or new powers has recently become one of the most researched areas in International Relations. While most studies focus on relations between traditional and emerging powers, this edited collection turns the focus 180 degrees and asks how countries outside these two power sets have reacted to the emerging new world order. Are emerging powers creating a united front in a struggle to change the global order, or are they more concerned with national interests? Are we seeing major changes in the global order, or simply an adjustment by the traditional powers to the emergence of new contenders? In order to answer these questions, the authors take a broad thematic approach in analyzing recent trends in the interplay between states, markets, and societies, concentrating in particular on Latin America, Africa, the Middle East, and Europe, and on the three major emerging powers: China, India, and Brazil. **Researching**
