A Selective Approach to Establishing a Human Rights Mechanism in Southeast Asia Hao Duy Phan, 2012-02-03 This book proposes a selective approach for states with more advanced human

rights protection to establish a human rights court for Southeast Asia It argues the inclusive approach currently employed by ASEAN to set up a human rights body covering all member states cannot produce a strong regional human rights mechanism The mosaic of Southeast Asia reveals great diversity and high complexity in political regimes human rights practice and participation by regional states in the global legal human rights framework Cooperation among ASEAN members to protect and promote human rights remains limited The time honored principle of non interference and the ASEAN Way still predominate in relations within ASEAN These factors combine to explain why the ASEAN Intergovernmental Commission on Human Rights is unlikely to be strong and effective in changing and promoting regional human rights protection This book suggests a selective approach to establish a human rights court for Southeast Asia It posits that a group of nations within Southeast Asia may be more willing to consider the possibility of a stronger human rights mechanism It investigates the challenges to and the feasibility of such a proposal Furthermore it examines the design of the three existing regional human rights courts in Europe the Americas and Africa and compares the rationales for those institutional designs with the specific context of Southeast Asia A human rights court for all ASEAN members may not be possible at this time but a court for some nations in the region is feasible and worth exploring The path towards this goal is never an easy one however the region possesses the necessary conditions to gradually translate that goal into reality **Shrewd Sanctions** Meghan L.

O'Sullivan,2004-05-13 Policymakers will need all the tools at their disposal to craft an effective response to international terrorism and to protect and promote other U S interests in the coming decades In this quest to shape the right strategies for the challenges ahead economic instruments will play a central role O Sullivan an expert on the use of positive and negative tools of economic statecraft argues that in the post September 11th international climate the United States will be even more willing to use its economic power to advance its foreign policy goals than it has in the past This impulse she argues can lead to a more effective foreign policy given the many ways in which sanctions and incentives can forcefully advance U S interests But a recalibration of these tools sanctions in particular is necessary in order for them to live up to their potential Critical to such a reassessment is a thorough understanding of how the post cold war international environment globalization and American primacy in particular has influenced how sanctions work O Sullivan addresses this issue in a thorough examination of sanctions dominated policies in place against Iran Iraq Libya and Sudan Her findings not only highlight the many ways in which sanctions have often been poorly suited to achieve their goals in the past but also suggest how policymakers might use these tools to better effect in the future This book will provide a valuable resource for policymakers groping to find the right set of instruments to address both the old and the new challenges facing the United States It will also serve as an important resource to those interested in U S policy toward rogue states and in the status of the sanctions debate between policymakers and scholars Research Handbook on Authoritarianism Natasha Lindstaedt,Jeroen J.J. den Bosch,2024-03-14

Entangled Legalities Beyond the State Nico

Krisch,2021-11-11 Shows that law it is often better understood as an entangled web rather than as a coherent orderly system

The Oxford Handbook on the United Nations Thomas George Weiss,Sam Daws,2007 Publisher Description **The Prevention and Intervention of Genocide** Samuel Totten,2017-09-08 Over the last twenty years the world has witnessed four major genocides There was the genocide in Iraq 1988 in Rwanda 1994 in Srebrenica 1995 and in Darfur 2003 and continuing Most observers agree there is an urgent need to assess the international community s efforts to prevent genocide and to intervene once a genocide is under way in an effective and timely manner This volume the latest in a widely respected series on the subject of genocide provides an overview of a host of issues germane to this task The book begins with a cogent discussion of the issues of prevention and intervention during the Cold War years The second chapter discusses the abject failures and moderate though in some cases highly controversial successes at prevention and intervention carried out in the 1990s and early 2000s Further chapters examine latest efforts to develop an effective genocide early warning system and examine the complexity of and barriers to prevention The pros and cons of sanctions and the problems of enforcement and evaluation their effectiveness are then discussed Conflicts between state sovereignty and the protection of threatened populations are examined both in historical context and by incorporating the latest thinking Later chapters treat the issue of intervention why and how it has met with only limited success Concentrating on Rwanda and Srebrenica chapter 8 discusses various peace operations that were abject failures and those that were moderately successful The concept of an anti genocide regime is examined in terms of progress in developing such a regime as well as what the international community must do in order to implement it Chapters discuss key issues related to post genocidal periods those that need to be addressed in order to establish stability in a wounded land and populace as well as to prevent future genocides The final chapter asks whether bringing perpetrators to justice has any impact in breaking impunity ensuring deterrence and bringing about reconciliation The contributors to the volume are all noted scholars some of whom specialize in the study of genocide and others who specialize in such areas as early warning peacekeeping and sanctions

Fault Lines of International Legitimacy Hilary

Charlesworth,Jean-Marc Coicaud,2010-02-25 Fault Lines of International Legitimacy deals with the following questions What are the features and functions of legitimacy in the international realm How does international legitimacy as exemplified in particular by multilateral norms organizations and policies change over time What role does the international distribution of power and its evolution have in the establishment and transformation of legitimacy paradigms To what extent do democratic values account for the growing importance of legitimacy and the increasing difficulty of achieving it at the international and the national level One of the central messages of the book is that although the search for international legitimacy is an elusive endeavor there is no alternative to it if we want to respond to the intertwined demands of justice and security and

make them an integral and strategic part of international relations Order and Disorder in the International System Sai Felicia Krishna-Hensel, 2016-05-13 This volume examines the complex international system of the twenty first century from a variety of perspectives Proceeding from critical theoretical perspectives and incorporating case studies the chapters focus on broad trends as well as micro realities of a Post Westphalian international system The process of transformation and change of the international system has been an ongoing cumulative process Many forces including conflict technological innovation and communication have contributed to the creation of a transnational world with political economic and social implications for all societies Transnationalism functions both as an integrative factor and one which exposes the existing and the newly emerging divisions between societies and cultures and between nations and states The chapters in this volume demonstrate that re thinking fundamental assumptions as well as theoretical and methodological premises is central to understanding the dynamics of interdependence *Confronting the Shadow State* Henri Decoeur, 2018-04-25 This book examines the rules and mechanisms of international law relevant to the suppression of state organized crime and provides a normative justification for developing international legal mechanisms specifically designed to address this phenomenon State organized crime refers to the use by senior state officials of the resources of the state to facilitate or participate in organized crime in pursuit of policy objectives or personal profit This concept covers diverse forms of government misconduct including strategic partnerships with drug traffickers the plundering of a country s resources by kleptocrats and high level corruption schemes The book identifies the distinctive criminological characteristics of state organized crime and analyses the applicability potential and limits of the norms and mechanisms of international law relevant to the suppression of state organized crime In particular it discusses whether the involvement of state organs or agents in organized crime may amount to an internationally wrongful act giving rise to the international responsibility of the state and highlights a number of practical and normative shortcomings of the legal framework established by relevant crime suppression conventions The book also sketches proposals to develop an international legal framework designed to hold perpetrators of state organized crime accountable It presents a normative justification for criminalizing and suppressing state organized crime at the international level proposes draft provisions for an international convention for the suppression of state organized crime and discusses the potential role of the UN Security Council and of international criminal courts and tribunals respectively in holding perpetrators accountable Providing the first comprehensive analysis from the perspective of international law of a phenomenon so far mainly studied by criminologists this study would appeal to researchers social activists and policy makers alike *Land of Blue Helmets* Karim Makdisi, Vijay Prashad, 2016-10-18 Born in 1945 the United Nations came to life in the Arab world It was there that the UN dealt with early diplomatic challenges that helped shape its institutions such as peacekeeping and political mediation It was also there that the UN found itself trapped in and sometimes part of confounding geopolitical tensions in key international conflicts in the Cold War and post Cold War periods such as hostilities between

Palestine and Iraq and between Libya and Syria Much has changed over the past seven decades but what has not changed is the central role played by the UN This book s claim is that the UN is a constant site of struggle in the Arab world and equally that the Arab world serves as a location for the UN to define itself against the shifting politics of its age Looking at the UN from the standpoint of the Arab world this volume collects some of the finest scholars and practitioners writing about the potential and the problems of a UN that is framed by both the promises of its Charter and the contradictions of its member states This is a landmark book a close and informed study of the UN in the region that taught the organization how to do its many jobs

Routledge Handbook of American Foreign Policy Steven W. Hook, Christopher M. Jones, 2012-04-23 The Routledge Handbook of American Foreign Policy brings together leading experts in the field to examine current trends in the way scholars study the history and theories of American conduct in the world analysis of state and non state actors and their tools in conducting policy and the dynamics of a variety of pressing transnational challenges facing the United States

International Organization in the Anarchical Society Tonny Brems Knudsen, Cornelia Navari, 2018-05-23 This book takes up one of the key theoretical challenges in the English School s conceptual framework namely the nature of the institutions of international society It theorizes their nature through an analysis of the relationship of primary and secondary levels of institutional formation so far largely ignored in English School theorizing and provides case studies to illuminate the theory Hitherto the School has largely failed to study secondary institutions such as international organizations and regimes as autonomous objects of analysis seeing them as mere materializations of primary institutions Building on legal and constructivist arguments about the constitutive character of institutions it demonstrates how primary institutions frame secondary organizations and regimes but also how secondary institutions construct agencies with capacities that impinge upon and can change primary institutions Based on legal and constructivist ideas it develops a theoretical model that sees primary and secondary institutions as shared understandings enmeshed in observable historical processes of constitution reproduction and regulation

Peace Research Peter Wallensteen, 2013-03-01 Comprising essays by Peter Wallensteen this book presents an overview of the thematic development of peace research which has become one of the most dynamic and innovative areas of war and conflict studies Peace research began in the 1950s when centres were formed in the USA and Europe and today there are research institutes and departments on every continent with teaching and research programs in most countries and peace researchers contribute to the development of international studies development research and security analysis Prof Wallensteen has been a witness to much of this since forming the Department of Peace and Conflict Research at Uppsala University in the late 1960s and this book brings together thirteen of his articles with five new essays in one volume The book presents articles on such key issues in peace research as the causes of war conflict data conflict diplomacy non violent sanctions and third party diplomacy In this way it demonstrates how basic research can be conducted in fields often seen as unresearchable and too complicated to deal with This volume shows that it is a matter of developing

definitions creating valid measures and finding ways of collecting information recognising that innovations of this kind require supportive research environments Furthermore the results are not only useful for the growth of research activity itself but for finding ways of dealing with actual conflicts Thus attention is also paid here to conflict prevention peace agreements sanctions and third party activity for preventing and ending armed conflict and building a lasting post war peace This book will be of great interest to all students of peace studies conflict resolution war and conflict studies development studies and IR security studies in general
