Conway, J.L. Carrivick, P.A. Carling, T. de Haas, T.N. Harrison, 2019-01-21 Gullies on Mars resemble terrestrial gullies involved in the transport of abundant material down steep slopes by liquid water However liquid water should not be stable at the Martian surface The articles in this volume present the two main opposing theories for Martian gully formation climate driven melting of surficial water ice deposits and seasonal dry ice sublimation The evidence presented ranges from remote sensing observations to experimental simulations to comparison with Earth analogues The

opposing hypotheses imply either that Mars has been unusually wet in the last few million years or that it has remained a cold dry desert both with profound implications for understanding the water budget of Mars and its habitability The debate questions the limits of remote sensing data and how we interpret active processes on extra terrestrial planetary surfaces even beyond those on Mars as summarized by the review paper at the beginning of the book BSCS Science TRACS G4 Inv. the Changing Earth, SG ,1999 Four modules explore topics in physical science earth and space science life science and science and technology with hands on activities designed to engage students in the processes of scientific inquiry and technological design Modules within a developmental level may be taught in any sequence **National Petroleum News** ,1925 *Under the Southern Cross* David Adey,1982 **Eyewitness Explorer: Rock and Fossil Hunter** Ben Morgan,2015-02-02 Become a rockstar with your own collection of gems fossils and rocks Explore the incredible world of rocks with this amazing activity book for children From creating your own volcano to growing gemstones at home Rock and Fossil Hunter is filled with fun activities for curious young minds With more than 30 projects this book is ideal to keep children busy Test the hardness of different rocks make paint from minerals discover the minerals in everyday objects around you and conduct acid tests on some of them and even explore extraordinary minerals that glow under special lights Each activity is accompanied by detailed step by step instructions that are easy to follow and a special symbol indicates which activities require adult supervision Find out how fossils are made and learn how to not only spot them in nature but make fake fossil bones at home Get building testing and learning with this fantastic book made for curious kids *Evaluation of Relative Density and Its Role in Geotechnical Projects Involving Cohesionless Soils* Ernest Theodore Selig,R.
