**Sanitation Strategy for a Lakefront Metropolis** Louis P. Cain, 1978      *Creating Chicago's North Shore* Michael H. Ebner, 1988 They are the suburban jewels that crown one of the world's premier cities Evanston Wilmette Kenilworth Winnetka Glencoe Highland Park Lake Forest Lake Bluff together they comprise the North Shore of Chicago a social registry of eight communities that serve as a genteel enclave of affluence culture and high society Historian Michael H Ebner explains the origins and evolution of the North Shore as a distinctive region At the same time he tells the paradoxical story of how these suburbs with their common heritage mutual values and shared aspirations still preserve their distinctly separate identities Embedded in this history are important lessons about the uneasy development of the American metropolis

Lakefront Joseph D. Kearney, Thomas W. Merrill, 2021-05-15 How did Chicago a city known for commerce come to have such a splendid public waterfront its most treasured asset Lakefront reveals a story of social political and legal conflict in which private and public rights have clashed repeatedly over time only to produce as a kind of miracle a generally happy ending Joseph D Kearney and Thomas W Merrill study the lakefront's evolution from the middle of the nineteenth century to the twenty first Their findings have significance for understanding not only Chicago's history but also the law's part in determining the future of significant urban resources such as waterfronts The Chicago lakefront is where the American public trust doctrine holding certain public resources off limits to private development was born This book describes the circumstances that gave rise to the doctrine and its fluctuating importance over time and reveals how it was resurrected in the later twentieth century to become the primary principle for mediating clashes between public and private lakefront rights Lakefront compares the effectiveness of the public trust idea to other property doctrines and assesses the role of the law as compared with more institutional developments such as the emergence of sanitary commissions and park districts in securing the protection of the lakefront for public uses By charting its history Kearney and Merrill demonstrate that the lakefront's current status is in part a product of individuals and events unique to Chicago But technological changes and a transformation in social values in favor of recreational and preservationist uses also have been critical Throughout the law while also in a state of continual change has played at least a supporting role      **Chicagoland Underflow Plan, McCook Reservoir Special Re-evaluation Report**, 1998

**The Taste of Water** Christy Spackman, 2023-12-05 Have you ever wondered why your tap water tastes the way it does *The Taste of Water* explores the increasing erasure of tastes from drinking water over the twentieth century It asks how dramatic changes in municipal water treatment have altered consumers awareness of the environment their water comes from Through examining the development of sensory expertise in the United States and France this unique history uncovers the foundational role of palatability in shaping Western water treatment processes By

focusing on the relationship between taste and the environment Christy Spackman shows how efforts to erase unwanted tastes and smells have transformed water into a highly industrialized food product divorced from its origins The Taste of Water invites readers to question their own assumptions about what water does and should naturally taste like while exposing them to the invisible but substantial sensory labor involved in creating tap water [Packing Them In](#) Sylvia Hood Washington,2017-06-23 Sylvia Hood Washington's [Packing Them In](#) provides strong and often startling evidence of the depths and complexities of environmental racism in Chicago and offers an innovative historical explanation for how this social ill developed in nineteenth and twentieth century America Drawing from Michel Foucault's concept of power knowledge and from theories of racial formation Washington also demonstrates how the process through which some European immigrant groups were reclassified from non white to white over time allowed them to move out of spaces where they faced environmental injustice into spaces of environmental privilege This argument represents a significant contribution to environmental justice studies and suggests a comparative and relational ethnic studies approach to future treatments of the subject [Packing Them In](#) is a path breaking book and a welcome addition to the fields of environmental history and environmental justice studies David Naguib Pellow Dehlsen professor of Environmental Studies University of California Santa Barbara and author of [Garbage Wars](#) The Struggle for Environmental Justice in Chicago A pathbreaking book Sylvia Hood Washington uses Chicago as a case study of how human health inequalities in urban environments change over time In showing the ways white identity shaped exposure to environmental pollutants in the nineteenth and early twentieth centuries she provides historical context to the environmental racism identified in the United States in the late twentieth century [Packing Them In](#) is instructive for those seeking to understand the structural origins of the present struggle for environmental justice and a model for undertaking studies of urban environmental history that address the struggle This model remains as important today as it was when [Packing Them In](#) was first published Carl Zimring associate professor and coordinator of the Sustainability Studies Pratt Institute and author of [Clean and White](#) A History of Environmental Racism [Packing Them In](#) is a path breaking book that is a must read for anyone interested in understanding how the social political and economic dimensions of urban environmental issues evolve over time [Packing Them In](#) makes a significant contribution to the environmental justice literature as it challenges the notion that racism and inequalities arise solely from black white dynamics By using history to understand the evolution of racial and spatial dynamics and by embedding the work in Michel Foucault's theoretical framework of power and knowledge Washington demonstrates the importance of expanding traditional environmental justice frameworks in the analysis of case studies such as these Dorceta E Taylor James E Crowfoot collegiate professor of the University of Michigan School of Natural Resources and Environment **Shock Cities** Harold L. Teafor,2019-12-01 Originally published in 1984 In 1888 the British observer James Bryce declared the government of cities to be the one conspicuous failure of the United States During the following two decades urban reformers would repeat Bryce s words with ritualistic regularity nearly a century later his comment continues to set the tone for most assessments of nineteenth century city government Yet by the end of the century as Jon Teafor argues in this important reappraisal American cities boasted the most abundant water supplies brightest street lights grandest parks largest public libraries and most efficient systems of transportation in the world Far from being a conspicuous failure municipal governments of the late nineteenth century had successfully met challenges of an unprecedented magnitude and complexity The Unheralded Triumph draws together the histories of the most important cities of the Gilded Age especially New York Chicago Boston Philadelphia St Louis and Baltimore to chart the expansion of services and the improvement of urban environments between 1870 and 1900 It examines the ways in which cities were transformed in a period of rapid population growth and increased social unrest into places suitable for living Teafor demonstrates how during the last decades of the nineteenth century municipal governments adapted to societal change with the aid of generally compliant state legislatures These were the years that saw the professionalization of city government and the political accommodation of the diverse ethnic economic and social elements that compose America s heterogeneous urban society Teafor acknowledges that the expansion of urban services dangerously strained city budgets and that graft embezzlement overcharging and payroll padding presented serious problems throughout the period The dissatisfaction with city governments arose however not so much from any failure to achieve concrete results as from the conflicts between those hostile groups accommodated within the newly created system For persons of principle and gentlemen who prized honor it seemed a failure yet American municipal government left as a legacy such achievements as Central Park the new Croton Aqueduct and the Brooklyn Bridge monuments of public enterprise that offered new pleasures and conveniences for millions of urban citizens Handbook of Cliometrics Claude Diebolt,Michael Haupt,2024-05-22 This handbook is a milestone in the field of historical economics and econometric history through its emphasis on the concrete contribution of cliometrics to our knowledge in economics and history The articles in the handbook authored by the leading scholars in the fields stress the usefulness of cliometrics for economists historians and social scientists in general The handbook offers a comprehensive coverage of topics with each article providing an overview of the contributions of cliometrics to a particular topic The handbook has set a new standard of quality in the field by offering a world wide forum of discussion in cliometrics This updated and extended third edition of the handbook of cliometrics offers a substantially enlarged collection of articles and thus stresses its unique position as authoritative reference work in this field *The Lake Michigan Diversion at Chicago and Urban Drought* Stanley Alcide
