Love And Hate In The Analytic Setting:

Love and Hate in the Analytic Setting Glen O. Gabbard, 2000-04-01 Passionate feelings of love and hate are stirred in psychotherapy Paradoxically these passions may either undermine the therapist catastrophically or serve as the crucible in which profound understanding is forged Transferences and countertransferences of love and hate occur on a spectrum that includes unobjectionable negative and positive feelings relatively benign forms of love and hate and more malignant intractable versions of love and hate that present formidable challenges to the therapist Each of these variations is explored in different chapters of this book Gender configurations gender fluidity adolescent transferences the link between love and lust and passive forms of hating are among the topics discussed Most of all the author noted psychoanalyst Glen Gabbard depicts what it is like to be in the eye of the hurricane when passions are aroused He provides a practical yet theoretically sophisticated guide to the management of love and hate as they are experienced by both patient and therapist **Love and Hate** David Mann, 2013-11-12 Love and hate seem to be the dominant emotions that make the world go round and are a central theme in psychotherapy Love and Hate seeks to answer some important questions about these all consuming passions Many patients seeking psychotherapy feel unlovable or full of rage and hate What is it that interferes with the capacity to experience love This book explores the origins of love and hate from infancy and how they develop through the life cycle It brings together contemporary views about clinical practice on how psychotherapists and analysts work with and think about love and hate in the transference and countertransference and explores how different schools of thought deal with the subject David Mann together with an impressive array of international contributors represent a broad spectrum of psychoanalytic perspectives including Kleinian Jungian Independent Group and Lacanian psychotherapists psychoanalysts and analytical psychologists With emphasis on clinical illustration throughout the writers show how different psychoanalytic schools think about and clinically work with the experience and passions of love and hate It will be invaluable to practitioners and students of psychotherapy psychoanalysis analytical psychology and counselling **Contemporary Psychoanalysis in America** Arnold M. Psychoanalytic Collisions Joyce Anne Slochower, 2013-05-13 In this beautiful work of reflection and self reflection Joyce Slochower wrestles with a seldom acknowledged dimension of being a psychoanalyst the dialectic between illusions and less ideal realities that complicate the analyst's sense of who she is and of how best to meet her clinical obligations Psychoanalytic Collisions details the various ways in which the analyst's wishes both professional and personal collide with the less than perfect actualities of everyday clinical work The collisions in question are often rooted in the analyst's own illusions illusions of therapeutic possibility in the face of ordinary human existence or illusions of therapeutic selflessness in the face of one's own immutably self centered humanity Such collisions may complicate nonclinical professional activities such as writing in which the analyst's desire to develop a personal idiom collides with self doubt and the imagined rebuff of teachers and colleagues Other collisions coalesce dyadically in the consulting room They may reflect sharp dissonance between what the patient needs the analyst to feel and what the latter actually feels as in discrepant experiences of erotic desire They may grow out of colliding idealizations of analyst and patient each of the other And they may arise in the wake of traumatizing life events that destroy the shared illusions on which treatment has rested In finely wrought examinations of these eventualities Slochower is guided by the belief that collisions are intrinsic both to forging an analytic identity and to practicing in a manner consonant with that identity Psychoanalytic collisions she enjoins often cannot be resolved but they can usually be productively engaged And the very act of engagement be it establishing new grounds for collaboration in the wake of real world catastrophe or wrestling with clinical impasse grounded in the radically divergent expectations of analyst and patient or owning up to what Slochower terms secret delinquencies can provide the basis for a vision of the good enough analyst in which therapeutic hopefulness coexists with acceptance of the analyst's all too human fallibility

Hate and Love in Psychoanalytical Institutions Jurgen Reeder, 2020-10-13 In Hate and Love in Psychoanalytical Institutions Jurgen Reeder investigates the professional superego of the psychoanalyst This superego designates a prescriptive and prohibiting role that the individual must play within the parameters of a certain occupational sphere The prescriptive aspect works like a professional ideal and in this respect the superego can be said to sustain a professional ethos or spirit commanding what the professional should know and what his or her relations to clients and colleagues should resemble It helps to bind the members of the analytical community together The prohibiting aspect installs a vigilant inner eye It offers necessary protection against detrimental aberrations but it also evokes fantasies of critical or condemning colleagues who might have insight into what transpires within the walls of the analyst's own private practice leading to a reluctance to communicate openly about the analytical experience In this sense the professional superego contributes to the paranoization of collegial communication a circumstance that has a hampering effect on spontaneity and creativity in both clinical and theoretical work Jurgen Reeder's groundbreaking research uncovering the dynamics of the

professional superego in psychology psychotherapy and psychoanalysis can be applied to other professions as well including social work medicine education law and the ministry **Shadow of the Other** Jessica Benjamin,2013-10-31 Shadow of the Other is a discussion of how the individual has two sorts of relationships with an other other beings other individuals The first regards the other as an entirely different being from oneself but one which is still recognizable The second understands and recognizes this other by its function as a repository of characteristics cast from oneself In recognizing how this dual relationship is reconciled within the self and its implications in male female relations Jessica Benjamin continues her exploration of intersubjectivity and gender taking up questions of contemporary debates in feminist theory and psychoanalysis *Food for Thought* Nina Savelle-Rocklin,2016-12-31 Food for Thought offers fresh psychoanalytic insights into treating clients with eating disorders In lively and jargon free language Nina Savelle Rocklin breaks down the psychoanalytic approach to give practitioners and general readers alike a deeper understanding of the theory and effective treatment of eating disorders Those living with eating disorders often use food to express their inner feelings and Savelle Rocklin illustrates the importance of the therapeutic relationship in uncovering the nature of these internal emotions and formulating them into words Through an intensive and mutual process clients can begin to understand the language of the eating disorder identify and work through its underlying conflicts ultimately eliminating symptoms relieving distress and transforming the way they relate to themselves and others Thoughtful and highly engaging Food for Thought provides invaluable methods for practitioners treating patients with eating disorders to achieve lasting change and true healing
