Lower Manhattan A History Map:

Extracting Spatial Information from Historical Maps Benedikt Budig, 2018-11-23 Historical maps are fascinating documents and a valuable source of information for scientists of various disciplines. Many of these maps are available as scanned bitmap images but in order to make them searchable in useful ways a structured representation of the contained information is desirable. This book deals with the extraction of spatial information from historical maps. This cannot be expected to be solved fully automatically since it involves difficult semantics but is also too tedious to be done manually at scale. The methodology used in this book combines the strengths of both computers and humans; it describes efficient algorithms to largely automate information extraction tasks and pairs these algorithms with smart user interactions to handle what is not understood by the algorithm. The effectiveness of this approach is shown for various kinds of spatial documents from the 16th to the early 20th century.

A History of America in 100 Maps Susan Schulten, 2018-09-21 Throughout its history America has been defined through maps. Whether made for military strategy or urban reform to encourage settlement or to investigate disease, maps invest information with meaning by translating it into visual form. They capture what people knew, what they thought they knew, what they hoped for, and what they feared. As such, they offer unrivaled windows onto the past. In this book Susan Schulten uses maps to explore five centuries of American history from the voyages of European discovery to the digital age. With stunning visual clarity *A History of America in 100 Maps* showcases the power of cartography to illuminate and complicate our understanding of the past. Gathered primarily from the British Library's incomparable archives and compiled into nine chronological chapters, these one hundred full color maps range from the iconic to the unfamiliar. Each is discussed in terms of its specific features as well as its larger historical significance in a way that conveys a fresh perspective on the past. Some of these maps were made by established cartographers while others were made by unknown individuals such as Cherokee tribal leaders, soldiers on the front, and the first generation of girls to be formally educated. Some were tools of statecraft and diplomacy and others were instruments of social reform or even advertising and entertainment. But when considered together, they demonstrate the many ways that maps both reflect and influence historical change. Audacious in scope and charming in execution, this collection of one hundred full color maps offers an imaginative and visually engaging tour of American history that will show readers a new way of navigating their own worlds.

Gotham Unbound Theodore Steinberg, 2014-06-03 Presents the history of New York City as it was transformed over a four hundred year period by politicians and developers from a Hudson River estuary with rolling hills, rivers, and forests into the concrete flatland that exists today.

Art Maps and Cities Gloria Lanci, 2022-11-25 This book presents an original study on how contemporary artists are exploring urban spaces through mapping. Despite a long history of representations of cities in maps and the relationships that can be envisaged between art maps and cities in the contemporary world, little research is dedicated to investigating how artists intervene in the realm of urban cartography. The

research examines a century old history of art maps and draws on academic debates challenging traditional notions of maps as scientific artefacts produced through accurate measurement and surveying The potential of art maps to construct personal narratives through contestation embodiment and play is analysed in the city context where spaces are shaped by urban planning and design political ideologies and socio economic forces Adopting an exploratory and interpretative research approach that investigates the confluence of theories originated in different domains this book conducts the reader to discover what artistic practices can bring into a more creative while inquisitive understanding of cities A series of semi structured interviews with visual artists enquiring how they apprehend process and re create urban spaces in artworks explores cartographic process and methods in visual art practices in the twenty first century which incorporates digital technologies and critical thinking
