Mathematics For Young Children An Active Thinking Approach:

Mathematics for Young Children Marion H. Bird, 2022-11-21 For many years increasing stress has been placed on the importance of giving the under sevens a good start in mathematics Originally published in 1991 *Mathematics for Young Children* shows how children as young as four and five and of all abilities can be encouraged to carry out their own mathematical explorations whilst covering the content of a prescribed curriculum A substantial part of the book is taken up with actual case studies of children working with Marion Bird in a reception classroom fully illustrated with examples of the children's work These case studies are then analysed to show how a prescribed syllabus can be effectively covered through an investigational approach a point which is of paramount importance to teachers concerned with the introduction of the National Curriculum The role of the teacher too is examined carefully in order to identify those parts of a teacher's repertoire which seems to be particularly fruitful in encouraging young children's active mathematical thinking Throughout readers are encouraged to apply and amend ideas to suit their own particular circumstances

Playful Mathematics Helen J. Williams, 2022-03-10 Nursery World Professional Book of the Year 2022 Children are naturally mathematical in their play They play with mathematics Early years practitioners often struggle to make mathematics relevant and engaging for their young learners In their play children are naturally mathematical yet practitioners are often unsure about how to build on this or how this observed play fits in with the mathematics they teach This Nursery World Award Winning Book Empowers early years teachers to see the learning in this play and to remain committed to play based practice Outlines recent research on how children best learn mathematics Supports early years practitioners to know why preparation works better than planning and why thinking space matters more than you think

MiniMaths 2 Kim Connor, 2000 MiniMaths is packed with oodles of maths ideas inspired by everyday objects like shoes dough flowers and sand Each book contains over 72 engaging maths activities
