Poythress,2012-05-31 Though the Bible presents a personal and relational God popular modern worldviews portray an impersonal divine force in a purely material world Readers influenced by this competing worldview hold assumptions about fundamental issues like the nature of humanity evil and the purpose of life that present profound obstacles to understanding the Bible In Inerrancy and Worldview Dr Vern Poythress offers the first worldview based defense of scriptural inerrancy showing how worldview differences create or aggravate most perceived difficulties with the Bible His positive case for biblical inerrancy implicitly critiques the worldview of theologians like Enns Sparks Allert and McGowan Poythress who has researched and published in a variety of fields including science linguistics and sociology deals skillfully with the challenges presented in each of these disciplines By directly addressing key examples in each field Poythress shows that many difficulties can be resolved simply by exposing the influence of modern materialism Inerrancy and Worldview s positive

response to current attempts to abandon or redefine inerrancy will enable Christians to respond well to modern challenges by employing a worldview that allows the Bible to speak on its own terms

A Critical Examination of the Doctrine of Revelation in Evangelical Theology Carisa A. Ash, 2015-07-14 How God reveals himself is an important matter for Christians especially evangelicals For too long Carisa Ash contends evangelicals have rightly affirmed that God reveals through the created world but then they functionally neglect such revelation In this monograph Ash offers a corrective to this practice by presenting a theology of revelation that explores the commonalities between various forms of revelation world written and spoken word and Incarnate Word Particularly aimed at theologians interested in theological method Ash's study will also benefit people interested in faith and learning or interdisciplinary integration Ash argues that evangelicals must strive to align more closely their affirmations and their practice Her critique of current practices in theological method and integration along with the proposed theology of revelation are designed to help move the conversation forward

Reaping the Whirlwind John R. Pottenger, 2007-07-05 As early as the sixteenth century the liberal democratic state has been forced to confront the question of religion in politics The result has been a tense and uncomfortable balancing act Today in the public square of liberal democracy a number of religious confessions and beliefs compete for attention In the American experience some sense of religious pluralism and relative social harmony has been maintained However for this relationship to prevail a tension must continue to exist one that balances the political and social pursuits of self interest with meeting the objectives of the common good In *Reaping the Whirlwind* John R Pottenger shows how this process began in the modern world and how societies attempt to manage this ongoing conflict The first part of the book lays the groundwork of his analysis by using examples from history to demonstrate the genesis of political and religious whirlwinds It goes on to explore contemporary case studies such as conflicts between Mormons and Evangelicals in the United States liberation theology in Latin America Islam and the state in Uzbekistan and radical Christian reconstructionism Pottenger believes that the formal institutions of liberal democracy should maintain this turbulence even as religious activism threatens to upset the balance He concludes by advocating religious liberty and recognizing the individual and social need for expression At the same time he maintains that the survival of liberal democracy requires that these religious traditions not dominate the public sphere

Beyond Perception Chuck Missler, 2023-01-19 Why do scientists now believe we live in a 10 dimensional universe Has physics finally reached the very boundaries of reality There seems to be evidence to suggest that our world and everything in it are only ghostly images projections from a level of reality so beyond our own that the real reality is literally beyond both space and time The main architect of this astonishing idea is one of the world's most eminent thinkers physicist David Bohm a protege of Einstein's Earlier he noticed that in plasmas particles stopped behaving like individuals and started behaving as if they were part of a larger and inter connected whole He continued his work in the behavior of oceans of these particles noting their behaving as if they know what each on the untold trillions of individual particles were doing

Homeschooling

Samuel L. Blumenfeld, 1997 More and more parents today are disillusioned with public education. Instead of merely tolerating a faulty system, expanding numbers of parents are turning to alternative education for their children. Homeschooling describes what homeschooling is all about, helps parents decide whether or not this choice fits their family lifestyle, covers virtually every aspect of homeschooling, and more. Faith Reads David Rainey, 2008-07-30 At last, a resource for librarians who wish to build or develop their nonfiction collection and use it to better serve the needs of adult Christian readers. Covering the three major branches of Christianity: Roman Catholic, Protestant, and Orthodox, the author organizes more than 600 titles into subject categories ranging from biography, the arts, and education to theology, devotion, and spiritual warfare. Award-winning classics are noted. Introductory narrative frames the literature and helps librarians better understand Christian literature and learn how to establish selection criteria for building a Christian nonfiction collection. *Christian Men Of Science* George Mulfinger, Julia Mulfinger Orozco, 2004-04 These short biographies present each man's scientific accomplishments as well as the evidence of his Christian faith. These testimonies demonstrate that true scientists can also be genuine Christians and that faith in God and the authority of the Bible is not a sign of inferior intellect. This book includes scientists such as Johannes Kepler, Robert Boyle, Michael Faraday, Samuel Morse, James Clark Maxwell, Lord Kelvin, Henry Morris, and Walt Brown.
