The Language of Mathematics Robert L. Baber, 2011-09-09 A new and unique way of understanding the translation of concepts and natural language into mathematical expressions Transforming a body of text into corresponding mathematical expressions and models is traditionally viewed and taught as a mathematical problem it is also a task that most find difficult The Language of Mathematics Utilizing Math in Practice reveals a new way to view this process not as a mathematical problem but as a translation or language problem By presenting the language of mathematics explicitly and systematically this book helps readers to learn mathematics and improve their ability to apply mathematics more efficiently and effectively to practical problems in their own work Using parts of speech to identify variables and functions in a mathematical model is a new approach as is the insight that examining aspects of grammar is highly useful when formulating a corresponding mathematical model This book identifies the basic elements of the language of mathematics such as values variables and functions while presenting the grammatical rules for combining them into expressions and other structures The author describes and defines different notational forms for expressions and also identifies the relationships between parts of speech and other grammatical elements in English and components of expressions in the language of mathematics Extensive examples are used throughout that cover a wide range of real world problems and feature diagrams and tables to facilitate understanding The Language of Mathematics is a thought provoking book of interest for readers who would like to learn more about the linguistic nature and aspects of mathematical notation

The book also serves as a valuable supplement for engineers technicians managers and consultants who would like to improve their ability to apply mathematics effectively systematically and efficiently to practical problems *The Allure of the Ancient* Margaret Geoga,John Steele,2022-02-14 The Allure of the Ancient investigates how the ancient Middle East was imagined and appropriated for artistic scholarly and political purposes in the seventeenth and eighteenth centuries Bringing together scholars of the ancient and early modern worlds the volume approaches reception history from an interdisciplinary perspective asking how early modern artists and scholars interpreted ancient Middle Eastern civilizations such as Egypt Babylonia and Persia and how their interpretations were shaped by early modern contexts and concerns The volume s chapters cross disciplinary boundaries in their explorations of art philosophy science and literature as well as geographical boundaries spanning from Europe to the Caribbean to Latin America Contributors are Elisa Boeri Mark Darlow Nirit Ben Aryeh Debby Florian Ebeling Margaret Geoga Diane Greco Josefowicz Andrea L Middleton Julia Prest Felipe Rojas Silva Maryam Sanjabi Michael Seymour John Steele and Daniel Stolzenberg
