The Digital Humanist Domenico Fiormonte, Teresa Numerico, Francesca Tomasi, 2015 This book offers a critical introduction to the core technologies underlying the Internet from a humanistic perspective It provides a cultural critique of computing technologies by exploring the history of computing and examining issues related to writing representing archiving and searching The book raises awareness of and calls for the digital humanities to address the challenges posed by the linguistic and cultural divides in computing the clash between communication and control and the biases inherent in networked technologies A common problem with publications in the Digital Humanities is the dominance of the Anglo American perspective While seeking to take a broader view the book attempts to show how cultural bias can become an obstacle to innovation both in the methodology and practice of the Digital Humanities Its central point is that no technological instrument is culturally unbiased and that all too often the geography that underlies technology coincides with the social and economic interests of its producers The alternative proposed in the book is one of a world in which variation contamination and decentralization are essential instruments for the production and transmission of digital knowledge It is thus necessary not only to have spaces where DH scholars can interact such as international conferences THATCamps forums and mailing lists but also a genuine sharing of technological know how and experience This is a truly exceptional work on the subject of the digital Students and scholars new to the field of digital humanities will find in this book a gentle introduction to the field which I cannot but think would be good and perhaps even inspirational for them Its history of the development of machines and programs and communities bent on using computers to advance science and research merely sets the stage for an insightful analysis of the role of the digital in the way both scholars and everyday people communicate and conceive of themselves and others in written forms from treatises to credit card transactions Peter Shillingsburg The Digital Humanist is not simply a translation of the Italian book *L'umanista digitale* il Mulino 2010 but a new version tailored to an international audience through the improvement and expansion of the sections on social cultural and ethical problems of the most widely used methodologies resources and applications TABLE OF CONTENTS Preface Digital Humanities at a Political Turn by Geoffrey Rockwell PART I The Socio Historical Roots Chap 1 Technology and the Humanities A History of Interaction Chap 2 Internet or The Humanistic Machine PART II Theoretical and Practical Dimensions Chap 3 Writing and Content Production Chap 4 Representing and Archiving Chap 5 Searching and Organizing Conclusions DH in a Global Perspective **The Mind of an Engineer** Purnendu Ghosh, Baldev Raj, 2015-11-27 The Indian National Academy of
