Enables researchers to assess the effects of endocrine disrupters as well as comply with new environmental regulations  
Endocrine disrupters are chemicals both man made and natural that interfere with the body's endocrine system potentially resulting in adverse developmental reproductive neurological and immune effects In recent years a number of regulatory authorities around the world have drafted or enacted legislation that requires the detection and assessment of the effects of endocrine disrupters on both humans and wildlife In response this book provides comprehensive up to date information on the latest tested and proven methods used to detect and assess the environmental hazards posed by endocrine disrupting chemicals Endocrine Disrupters is divided into chapters covering each major taxon as well as chapters dedicated to hazard assessment and regulation The book covers testing methods for all the vertebrate groups and several invertebrate phyla including Crustaceans and mollusks Insects Fish Amphibians and reptiles Birds and mammals Moreover the book emphasizes practical ethical testing methods that combine sensitivity efficiency statistical power and reasonable cost Each chapter is written by one or more international experts in ecotoxicology offering readers step by step guidance for implementing each method based on the latest research and the authors firsthand laboratory experience Furthermore all the chapters have been subjected to a rigorous peer review and edited in light of the reviewers comments References at the end of each chapter guide readers to the literature in the field Endocrine Disrupters is recommended for scientists who need to test chemicals for possible endocrine disrupting properties It is also recommended for regulatory authorities who need to decide whether particular chemicals can be safely marketed The Mystery of the Yellow Room Gaston Leroux, 2018-08-29 THIS EDITION
