*Suitable for students
aged 12-13*

This pack is suitable for learners aged 12-13 years old or 8th graders (USA). The content covers fact files and relevant basic and advanced activities involving 30-60-90 Triangle.

LABOR DAY

Labor Day is celebrated every first Monday of September. It is a holiday to honor and recognize the labor movement and the labourers' contributions to the country's development.

- A 30° - 60° - 90° triangle is a right triangle with interior angles of 30, 60, and 90 degrees.
- The sides of a 30-60-90 triangle are always in the ratio of $1 : \sqrt{3} : 2$.
- It is possible to solve any 30-60-90 triangle without using time-consuming methods like the Pythagorean Theorem or trigonometric functions.

temples and Shinto shrines throughout Japan Sacred Mathematics is the first book published in the West to fully examine this tantalizing and incredibly beautiful mathematical tradition Fukagawa Hidetoshi and Tony Rothman present for the first time in English excerpts from the travel diary of a nineteenth century Japanese mathematician Yamaguchi Kanzen who journeyed on foot throughout Japan to collect temple geometry problems The authors set this fascinating travel narrative and almost everything else that is known about temple geometry within the broader cultural and historical context of the period They explain the sacred and devotional aspects of sangaku and reveal how Japanese folk mathematicians discovered many well known theorems independently of mathematicians in the West and in some cases much earlier The book is generously illustrated with photographs of the tablets and stunning artwork of the period Then there are the geometry problems themselves nearly two hundred of them fully illustrated and ranging from the utterly simple to the virtually impossible Solutions for most are provided A unique book in every respect Sacred Mathematics demonstrates how mathematical thinking can vary by culture yet transcend cultural and geographic boundaries
