**Key Maths GCSE** Peter Sherran, 2002-09-10 This resource has been developed to provide additional support for delivering and supporting ICT at GCSE Linked to Key Maths it can be also be used together with other resources Each program contains a range of self contained activities that do not require a detailed understanding of the software **Key Maths GCSE**, 2003 Developed for the CCEA Specification this Teacher File contains detailed support and guidance on advanced planning points of emphasis key words notes for the non specialist useful supplementary ideas and homework sheets **Key Maths GCSE**. David Baker, 2002 Developed for the OCR Specification revised for the new National Curriculum and the new GCSE specifications The Teacher File contains detailed support and guidance on advanced planning points of emphasis key words notes for the non specialist useful supplementary ideas and homework sheets [Maths Now!](#). R. Pimentel, T. Wall, National Writing Group, 2001 *Pure Mathematics* Geoff Mannall, Michael Kenwood, 2000 A syllabus specific textbook providing worked examples exam level questions and many practice exercises in accordance to the new Edexcel AS and Advanced GCE specification **What's the Point of School?** Guy Claxton, 2013-10-01 Why the education system is failing our kids and how we can start the revolution that will save our schools With their emphasis on regurgitated knowledge and stressful exams today's schools actually do more harm than good Guiding readers past the sterile debates about City Academies and dumbed down exams Claxton proves that education's key responsibility should be to create enthusiastic learners who will go on to thrive as adults in a swiftly changing dynamic world Students must be encouraged to sharpen their wits ask questions and think for themselves all without chucking out Shakespeare or the Periodic Table Blending down to earth examples with the latest advances in brain science and written with passion wit and authority this brilliant book will inspire teachers parents and readers of all backgrounds to join a practical revolution and foster in the next generation a natural curiosity and the spirit of adventure *Positive Alternatives to Exclusion* Paul Cooper, Mary Jane Drummond, Susan Hart, Jane Lovey, Colleen McLaughlin, 2013-04-03 Positive Alternatives to School Exclusion looks at what schools can do to build more harmonious communities and engage students particularly those at risk of exclusion more productively in all areas of school life It describes the Positive Alternatives to School Exclusion Project a multi phase collaborative initiative based at the School of Education University of Cambridge Drawing on the perspectives of staff and

pupils the authors provide detailed case studies of the approaches and strategies being adopted in a variety of settings primary secondary and FE to foster inclusion and reduce and prevent exclusion It also identifies a number of different frameworks drawn from the case studies which can be used by practitioners working in other settings to support their own reflection and development work Particular importance is placed throughout the book on valuing the domain of personal experience in the life of the school community The authors explore this theme in detail suggesting ways in which it might become a priority focus of further development work in schools     Rationing Education David Gillborn, Deborah Youdell, 1999-12-16 This research should make us extremely sceptical that the constant search for higher standards and for ever increasing achievement scores can do much more than put in place seemingly neutral devices for restratification Michael W Apple John Bascom Professor of Curriculum and Instruction and Educational Policy Studies University of Wisconsin Madison Recent educational reforms have raised standards of achievement but have also resulted in growing inequalities based on race and social class School by school league tables play a central role in the reforms These have created an A to C economy where schools and teachers are judged on the proportion of students attaining five or more grades at levels A to C To satisfy these demands schools are embracing new and ever more selective attempts to identify ability Their assumptions and practices embody a new IQism a simple narrow and regressive ideology of intelligence that labels working class and minority students as likely failures and justifies rationing provision to support those often white middle class boys already marked for success This book reports detailed research in two secondary schools showing the real costs of reform in terms of the pressures on teachers and the rationing of educational opportunity It will be important reading for any teacher researcher or policymaker with an interest in equality in education     The Minimum Core for Numeracy: Knowledge, Understanding and Personal Skills Sheine Peart, 2009-06-02 The teacher training framework introduced in September 2007 requires all teachers in the post 16 sector to possess knowledge understanding and personal skills to at least level 2 in the minimum core for numeracy Coverage and assessment of the core have to be embedded in all Certificate and Diploma courses leading to QTLS and ATLS status This book is a practical guide to numeracy for trainee teachers in the Lifelong Learning sector It enables trainee teachers to identify and develop their own numeracy skills and also to support their students numeracy     Maths Now! R. Pimentel, T. Wall, National Writing Group, 2002     **The Apprentice's Guide to End Point Assessment** Aaron Bradbury, Vicky Wynne, 2020-09-30 Are you preparing for Apprenticeship End Point Assessment This book is an essential guide for apprentices and their trainers It supports you to prepare for the Gateway and get ready for your EPA It helps you to make sense of EPA and to understand the expectations of your assessors Examples of good practice are included to help you learn from other apprentices It details the different types of assessment used in EPA to help you prepare for and be ready to succeed in your EPA     *EBOOK: Masculinities in Mathematics* Heather Mendick, 2006-06-16 The book speaks to me as one of those texts that will become seminal in

mathematics education It is original refreshing and despite a complicated plot points to some ways forward It is engagingly written if at times perhaps a little bit no nonsense in tone It will be of interest to teachers and teacher educators as well as providing a theoretical stance that should inform future research Review from BERJ 2007 The study of mathematics together with other gendered subjects such as science and engineering usually attracts more male than female pupils particularly at more advanced levels In this book Heather Mendick explores this phenomenon addressing the important question of why more boys than girls choose to study mathematics She combines new research with an original theoretical approach to argue that doing mathematics is doing masculinity The book illuminates what studying mathematics means for both students and teachers and offers a broad range of insights into students views and practices In addition to the words of young people learning mathematics the masculinity of mathematics is explored through historical material and cinematic representations Heather Mendick discusses the ways in which the alignment of mathematics with masculinity creates tensions for girls and women doing the subject These tensions are sensitively explored through interviews with young men and women to show how doing mathematics fits or conflicts with their gender identities Finally the book explores the implications for teachers including ways to promote gender equity in mathematics education This is key reading for students on courses in gender and education mathematics education gender and curriculum and social justice *Mathematics Today*, 2007 Learning and Teaching Mathematics in The Global Village Marcel Danesi, 2016-04-29 This book provides a fundamental reassessment of mathematics education in the digital era It constitutes a new mindset of how information and knowledge are processed by introducing new interconnective and interactive pedagogical approaches Math education is catching up on technology as courses and materials use digital sources and resources more and more The time has come to evaluate this new dynamic which transcends all previous use of ancillary devices to supplement classroom math instruction Interactivity and interconnectivity with the online world of math and math texts such as television programs and internet sites can be integrated with our traditional modes for delivery of math instruction This book looks at how this integration can unfold practically by applying these relevant pedagogical principles to elementary topics such as numeration arithmetic algebra story problems combinatorics and basic probability theory The book further exemplifies how mathematics can be connected to topics in popular culture information technologies and other such domains **PCET** Jonathan Tummons, 2019-09-02 This text is an introduction to learning and teaching in the post compulsory sector Those training to teach in the sector need to understand learning and learners in PCET This text goes further than other texts in its exploration of the sector It encourages readers to critically evaluate the context of PCET in the UK and opens up their learning through introducing some global profiles The text explores learners in the sector the diversity of the sector the challenges and some topical contemporary themes It covers a breadth of content and can thus be used as a general course text for all PGCE PCET courses as well as other education programmes Through pedagogical features including critical questions teacher and learner voices

links to practice and more the text provides a resource for all those learning about PCET      *The Trouble with Maths* Steve Chinn, 2020-09-22 Now in its fourth edition with updates to reflect developments in our understanding of learning difficulties in maths this award winning text provides vital pragmatic insights into the often confusing world of numeracy By looking at learning difficulties in maths and dyscalculia from several perspectives for example the vocabulary and language of maths cognitive style and the demands of individual procedures this book provides a complete overview of the most frequently occurring problems associated with maths teaching and learning Drawing on tried and tested methods based on research and Steve Chinn's decades of classroom experience it provides an authoritative yet accessible one stop classroom resource Combining advice guidance and practical activities this user friendly guide will help you to develop flexible cognitive styles use alternative strategies to replace an over reliance on rote learning for pupils trying to access basic facts understand the implications of underlying skills such as working memory on learning implement effective pre-emptive measures before demotivation sets in recognise the manifestations of maths anxiety and tackle affective domain problems find approaches to solve word problems select appropriate materials and visual images to enhance understanding With useful features such as checklists for the evaluation of books and an overview of resources this book will equip you with essential skills to help you tackle your pupils maths difficulties and improve standards for all learners This book will be useful for all teachers classroom assistants learning support assistants and parents      **Construction Matters** Great Britain.
