Zoo Studies Tracy McDonald, Daniel Vandermers, 2019-06-19 Do both the zoo and the mental hospital induce psychosis as humans are treated as animals and animals are treated as humans How have we looked at animals in the past and how do we look at them today How have zoos presented themselves and their purpose over time In response to the emergence of environmental and animal studies anthropologists sociologists philosophers theorists literature scholars and historians around the world have begun to explore the significance of zoological parks past and present Zoo Studies considers the modern zoo from a range of approaches and disciplines united in a desire to blur the boundaries between human and nonhuman animals The volume begins with an account of the first modern mental hospital La Salpêtrière established in 1656 and the first panoptical zoo the menagerie at Versailles created in 1662 by the same royal architect the final chapter presents a choreographic performance that imagines the Toronto Zoo as a place where the human body can be inspired by animal bodies From beginning to end through interdisciplinary collaboration this volume decentres the human subject and offers alternative ways of thinking about zoos and their inhabitants This collection immerses readers in the lives of animals and their experiences of captivity and asks us to reflect on our own assumptions about both humans and animals An original and groundbreaking work Zoo Studies will change the way readers see nonhuman animals and themselves

Losos, 2024-08-13 Timely and provocative reflections on the future of the wild in an increasingly human world The Heart of the Wild brings together some of today s leading scientists humanists and nature writers to offer a thought provoking meditation on the urgency of learning about and experiencing our wild places in an age of rapidly expanding human impacts These engaging essays present nuanced and often surprising perspectives on the meaning and value of wildness amid the realities of the Anthropocene They consider the trends and forces from the cultural and conceptual to the ecological and technological that are transforming our relationship with the natural world and sometimes seem only to be pulling us farther away from wild places and species with each passing day The contributors make impassioned defenses of naturalism natural history and nature education in helping us to rediscover a love for the wild at a time when our connections with it have frayed or been lost altogether Charting a new path forward in an era of ecological uncertainty The Heart of the Wild reframes our understanding of nature and our responsibility to learn from and sustain it as the human footprint sinks ever deeper into the landscapes around us With contributions by Bill Adams Joel Berger Susan
