is to be discarded or that logic is alien to women It represents an alternative to present views one that begins with the moral attitude or longing for goodness and not with moral reasoning What is at the basis of moral action An altruism acquired by the application of rule and principle Or as Noddings asserts caring and the memory of being cared for With numerous examples to supplement her rich theoretical discussion Noddings builds a compelling philosophical argument for an ethics based on natural caring as in the care of a mother for her child The ethical behavior that grows out of natural caring has at its core as care filled receptivity to those involved in any moral situation and leaves behind the rigidity of rule and principle to focus on what is particular and unique in human relations The hand that steadied us as we learned to ride our first bicycle did not provide propositional knowledge but it guided and supported us all the same and we finished up knowing how Noddings s discussion is far ranging as she considers whether organizations which operate at a remove from the caring relationship can truly be called ethical She discusses the extent to which we may truly care for plants animals or ideas Finally she proposes a realignment of education to encourage and reward not just rationality and trained intelligence but also enhanced sensitivity in moral matters

The Irish Journal of Education ,1982 Reconsidering Resilience in Education Adeela ahmed Shafi,Tristan Middleton,Richard Millican,Sian Templeton,2020-09-03 This book explores the concept of resilience and its significance in responding to a rapid and ever changing globalised world whilst critiquing its buzzword status in contemporary times Drawing on research from a range of educational settings the book demonstrates that the resilience of individuals and their surrounding systems should not be viewed in isolation and that the interplay

between individual resilience community resilience and resilient societies is complex and symbiotic On this basis it illustrates that efforts to promote resilience would benefit from a systems approach capable of coping with this complexity Using the ideas of agency and the power of self determinism a development of Bronfenbrenner s bio ecological model is presented to illustrate the complexity of their interplay Existing models of resilience are developed with the book offering the Dynamic Interactive Model of Resilience DIMoR as a way to analyse and support resilience which moves beyond a reductionist descriptive and fashionable presentation of resilience

Education ,1979 **Reconsidering Culture and Poverty** David Harding,Michele Lamont,Mario Luis Small,2010-06-08 Culture has returned to the poverty research agenda Over the past decade sociologists demographers and even economists have begun asking questions about the role of culture in many aspects of poverty at times even explaining the behavior of low income populations in reference to cultural factors Unlike their predecessors contemporary researchers rarely claim that culture will sustain itself for multiple generations regardless of structural changes and they almost never use the term pathology which implied in an earlier era that people would cease to be poor if they changed their culture The new generation of scholars conceives of culture in substantially different ways In this latest issue of the ANNALS readers are treated to thought provoking articles that attempt to bridge the gap between poverty and culture scholarship highlighting new trends in poverty research This volume is vital reading not only for sociologists but also for researchers across the social sciences as a whole *Reconsideration of Science and Technology III* Liu Dachun,Yang Huili,Fan Shanshan,2022-09-30
