Drugs, Intoxication and Society Angus Bancroft, 2009 Drugs and intoxication have been facts of human life for millennia Across the world many people use illicit drugs smoke and drink alcohol Yet very little has been written about their experiences Academics politicians and media reporting on the topic tend only to consider intoxication when it manifests as a social problem This book takes a more nuanced view and examines drug and alcohol use from a wider number of perspectives It discusses issues such as the history of drug and alcohol use the attractions of intoxication to individuals and the control and regulation of drugs and their users It also examines evidence for the rise of the so called pharmaceutical society and asks whether society is on the cusp of a revolution in psychoactive substance use Book Jacket *Using Substances to Enhance Performance: A Psychology of Neuroenhancement* Ralf Brand, 2017-01-18 Neuroenhancement NE is a behavior conceptualized as the use of a potentially psychoactive substance to enhance ones already proficient cognitive capacities Depending on the specific definitions used prevalence estimates vary greatly between very low 0.3% for illicit substances to astonishingly high 89% for freely available lifestyle substances These variations indicate that further research and more conceptual and theoretical clarification of the NE construct is dearly needed The contributions of this research topic aim to do just that Specific questions addressed are How prevalent is NE behavior How can NE research profit from the already more evolved field of social science research on doping in sports How is NE perceived by the public What

psychological processes and variables play a role in the decision to neuroenhance A wide array of methodological approaches is used to investigate these questions The topics contributions range from theoretical to experimental accounts on NE and they utilize a diverse set of methods ranging from qualitative to neuroscientific approaches The research presented here represents a first step towards what we have labeled a psychological approach to NE By addressing the questions above this research topic hopefully advances our understanding of NE behavior As with every new field of research new answers always prompt new questions In light of what we know now about NE we hope that the findings presented here will be pursued by other researchers in the future Clearly the endeavor to understand NE behavior has only just begun

Social Work:

Themes, Issues and Critical Debates Robert Adams, Lena Dominelli, Malcolm Payne, 2017-09-16 Social Work Themes Issues and Critical Debates one of the most respected and widely used textbooks in social work has now been completely revised and updated With its accessible and clearly structured framework the book offers expert discussion of the core topics in social work by top writers teachers and practitioners in the field It provides an essential grounding in the debates that shape the profession as well as a clear insight into the issues at the heart of practice What makes this highly regarded and bestselling book stand out from other texts Its range authority and theoretical integrity Its clear and effective structure which reflects major shifts in teaching and makes it easy to use across modules The importance it lays on practice based learning and on developing core practice skills such as communication assessment and intervention Its value as a springboard to further reading including extensive guidance on further print and electronic sources Its compact size perfect for readers who are travelling between campus and practice settings This is one of three interrelated books edited by the internationally renowned and widely published team Robert Adams Lena Dominelli and Malcolm Payne The companion books are Critical Practice in Social Work second edition and Practising Social Work in a Complex World Each book can be used alone or in combination with the other two as a uniquely flexible and comprehensive programme of study
