Nature of Everything Albert Michelutti,2014-02-13 As Albert Einstein lay on his death bed he asked for his glasses his writing implements and his latest equations He knew he was dying yet he continued to work In those final hours of his life while fading in and out of consciousness he was working on what he hoped would be the greatest work of all It was a project of monumental complexity It was a project that he hoped would unlock the mind of God *Starting Again* Nathalie Edwards,2025-04-07 The year is 2024 and the world is still reeling from the pandemic that wiped out billions of people from the planet Through a stroke of good or bad luck it was discovered that the vaccine that was supposed to save humanity from the virus was actually a cure for cancer and those eighteen million souls who received it are the only ones left Two of those survivors are Charlie and Everett who now have the opportunity to create lives for themselves wherever they choose The world is literally open to them Though they come from different walks of life Everett a former member of the Canadian Navy and Charlie a recovering alcoholic they set out for one of the most beautiful places they can think of Vancouver Island With so few people left it seems like fate that they should meet in a rural part of the island Their connection is instant and within days they realize that they want to spend the rest of their lives together The love they share is full of honesty trust and passion As they work together to find ways to survive in this reality Charlie battles intense nightmares that also haunt her during the day Everett is there to help ease her troubles but Charlie can t help thinking is he too good to be true **Seven**

Listening Closely Arlene Romoff, 2019-05-28 Imagine what it would be like not to hear a sound no music no friendly voices no children's laughter Arlene Romoff doesn't have to imagine how it would feel she lived it Although she was born with normal hearing in her late teens it began to slip away as if someone were lowering the volume of the world around her Over the next twenty five years Arlene began a long slow descent into deafness so profound that no hearing aid or assistive device could help The experience was devastating But then Arlene opted for what she considers a miracle She got a cochlear implant Using electrodes threaded into the cochlea an internal computer chip and an external computer processor cochlear implants bypass the damaged portion of the cochlea and stimulate the auditory nerve directly allowing sound to reach the brain Amazingly she could hear again Arlene's journey however isn't just about the magic of technology What she endured reveals as much about the strength of the human spirit about the wonders of chance and fate and about making the most of what life dishes out For Arlene events seemed to unfold almost as if they were a part of some elaborate plan just when she went deaf her insurance company began paying for the implants And ten years later when her old cochlear implant finally failed she received new state of the art technology and underwent yet another metamorphosis one that helped her continue to counsel others in a similar situation LISTENING CLOSELY will give you a chance to walk in Arlene Romoff's shoes to understand the pain of her loss and the joy of once again being able to hear the music of the world Those suffering from hearing loss or who have loved one who is will find Arlene's very special journey both inspirational and informative

Mademoiselle Fifi and Other Stories Guy de Maupassant, 2024-02-13 It was raining as it only rains in Normandy as though great gouts of water were being sprayed by some angry giant hand Maupassant believed that we delude ourselves into believing that we are not animals acting upon instinct but rational creatures capable of idealistic beliefs and actions and survive only on the drug of self deception Maupassant's disgust with creation was only equalled by his contempt

for human hypocrisy and in these tales he takes a scalpel to our illusions and cuts to the bone But his clinical pessimism is redeemed by a sense of the absurd and a warmer compassion for humanity bleeding Unsentimental but always honest he persuades us that life is an incomprehensible cosmic farce This translation of twenty tales shows Maupassant at his bitter bawdy chilling best It features some of his grimmest and most famous stories such as A Vendetta and The Grove of Olives and it also reflects both his moods and his mastery of the short story The Little Keg is rich in comic invention while the disturbing Who Can Tell draws its power from the strange forces which drove its author into madness ABOUT THE SERIES For over 100 years Oxford World's Classics has made available the widest range of literature from around the globe Each affordable volume reflects Oxford's commitment to scholarship providing the most accurate text plus a wealth of other valuable features including expert introductions by leading authorities helpful notes to clarify the text up to date bibliographies for further study and much more

Making Modern Mothers Heather Paxson, 2004-02-12 In Greece women speak of mothering as within the nature of a woman But this durable association of motherhood with femininity exists in tension with the highest incidence of abortion and one of the lowest fertility rates in Europe In this setting how do women think of themselves as proper individuals mothers and Greek citizens In this anthropological study of reproductive politics and ethics in Athens Greece Heather Paxson tracks the effects of increasing consumerism and imported biomedical family planning methods showing how women's nature is being transformed to meet crosscutting claims of the contemporary world Locating profound ambivalence in people's ethical evaluations of gender and fertility control Paxson offers a far reaching analysis of conflicting assumptions about what it takes to be a good mother and a good woman in modern Greece where assertions of cultural tradition unfold against a backdrop of European Union integration economic struggle and national demographic anxiety over a falling birth rate
