ducks include some economically important birds such as the eiders the basis for the Arctic eiderdown industry and a historically important food source for some Native American cultures They also include what is probably the most northerly breeding species of all waterfowl and an icon of Arctic bird life the long tailed duck The sea ducks also include species having some of the most complex and diverse pair forming postural and acoustic displays of all waterfowl goldeneyes and bufflehead and some of the deepest diving species of all waterfowl scoters and long tailed duck Sea ducks are highly prone to population disasters caused by oil spills and other water contaminants and like other seabirds are among the first bird groups that are being affected by current global warming trends in polar regions This book is an effort to summarize succinctly our current knowledge of sea duck biology and to provide a convenient survey of the vast technical literature on the group with over 900 literature references It also includes 90 000 words of text more than 40 percent of which is new 15 updated range maps 11 black white and 20 color photographs over 30 ink drawings and nearly 150 sketches Lastly the North American sea ducks include the now extinct Labrador duck the only northern hemisphere waterfowl species to have gone extinct in modern times I have gratefully reprinted a Labrador duck watercolor by Sir Peter Scott Considering recent population crashes in other sea ducks such as the Steller s eider and spectacled eider it should also offer a sobering reminder of the fragility of our natural world and its inhabitants including us

Ducks, Geese, and Swans: Species accounts (Cairina to Mergus) Janet Kear, 2005

The North American Swans: Their Biology and Conservation Paul Johnsgard, 2020-03-23 Among birds swans are relatively long lived species and are also among the most strongly monogamous having prolonged pair and family bonds that strongly influence their

reproductive and general social behavior which in combination with their beauty and elegance contribute to the overall high degree of worldwide human interest in them This volume of more than 59 000 words describes the distributions ecology social behavior and breeding biologies of the four species of swans that breed or have historically bred in North America including the native trumpeter and tundra swans the introduced mute swan and the marginally occurring whooper swan Also included are 5 distribution maps 15 drawings 27 photographs by the author and a reference section of nearly 1 000 literature citations
