Natural Obsessions The Search For The Oncogene:

Natural Obsessions Natalie Angier, 1999 Describes the search for the genes that control cancer Natural Obsessions Natalie Angier, 1999-04-01 As dramatic as *The Double Hex* and as absorbing as *The Soul of a New Machine* *Natural Obsessions* explores the advanced reaches of molecular biology the nature of the human cell and the genes that control cancer It unforgettably portrays some of the best young scientists in the world the rewards and discouragements of scientific research and the very process of scientific inquiry **Cancer-gate** Samuel Epstein, 2019-08-22 Award winning author Samuel S Epstein M D whose 1978 book *The Politics of Cancer* shook the political establishment by showing how the federal government had been corrupted by industrial polluters has written a book that is sure to be of equal consequence *Cancer Gate How to Win the Losing Cancer War* is a groundbreaking new book It warns that contrary to three decades of promises we are losing the winnable war against cancer and that the hand in glove generals of the federal National Cancer Institute NCI and the private nonprofit American Cancer Society ACS have betrayed us These institutions Epstein alleges have spent tens of billions of taxpayer and charity dollars primarily targeting silver bullet cures strategies that have largely failed while virtually ignoring strategies for preventing cancer in the first place As a result cancer rates have escalated to epidemic proportions now striking nearly one in every two men and more than one in every three women This translates into approximately 50 percent more cancer in men and 20 percent more cancer in women over the course of just one generation

Against the Tide Martín López Corredoira, Carlos Castro Perelman, 2008 Nobody should have a monopoly of the truth in this universe The censorship and suppression of challenging ideas against the tide of mainstream research the blacklisting of scientists for instance is neither the best way to do and filter science nor to promote progress in the human knowledge The removal of good and novel ideas from the scientific stage is very detrimental to the pursuit of the truth There are instances in which a mere unqualified belief can occasionally be converted into a generally accepted scientific theory through the screening action of refereed literature and meetings planned by the scientific organizing committees and through the distribution of funds controlled by club opinions It leads to unitary paradigms and unitary thinking not necessarily associated to the unique truth This is the topic of this book to critically analyze the problems of the official and sometimes illicit mechanisms under which current science physics and astronomy in particular is being administered and filtered today along with the onerous consequences these mechanisms have on all of us Apart from the editors Juan Miguel Campanario Brian Martin Wolfgang Kundt J Marvin Herndon Marian Apostol Halton C Arp Tom Van Flandern Andrei P Kirilyuk Dmitri Rabounski and Henry H Bauer all of them professional researchers reveal a pessimistic view of the miseries of the actual system while a glimmer of hope remains in the leitmotiv claim towards the freedom in doing research and attaining an acceptable level of ethics in science *Geneticists* Dean Miller, 2014-01-01 Geneticists are scientists who study how genes are inherited activated inactivated or mutated Their research is instrumental in advances in branches of medicine like

pharmaceuticals cancer research diseases and issues surrounding pregnancy Many geneticists have been awarded the Nobel This information filled volume provides excellent biographical sketches for trailblazers in the field of genetics Along with presenting specific scientists and their contributions to the ever changing field this book covers their research discoveries and inventions that have impacted the human experience *A Guide to the Human Genome Project* Susan L. Speaker, M. Susan Lindee, Elizabeth Hanson, 1993 This simple concise introduction to the HGP for the general reader explores the origins of the genome project and reactions in the scientific community important technologies and techniques institutions connected with the HGP including designated genome centers important suppliers of resources and corporations systems of communication and ethical legal and social issues A publication of the Biomolecular Sciences Initiative of CHF s Beckman Center for the History of Chemistry The End of the Experiment Stanley Rothman, 2017-09-08 The End of the Experiment ties together Stanley Rothman s theory of post industrialism and his four decades of research on American politics and society Rothman discusses the rise and fall of the New Left the sixties impact on America s cultural elites and the emergence of new post industrial humanistic values The first part of this book explains how cultural shifts in post industrial society increased the influence of intellectuals and redefined America s core values The second part examines how the shift in American social and cultural values led to a crisis of confidence in the American experiment And in a final section Rothman s contemporaries provide insight into his work reflecting on his continued influence and his devotion to traditional liberalism Rothman presents a quantitative study of personality differences between traditional American elites and new cultural elites Rothman argues that the experiment of America as a new nation rooted in democracy morality and civic virtue is being destroyed by a disaffected intellectual class opposed to traditional values Ecologies of Knowledge Susan Leigh Star, 1995-07-06 Ecologies of Knowledge provides a comprehensive overview of issues relating to work politics and the latest perspectives on the role of materials feminism nonhumans and work practices as shaping scientific and technical knowledge In addition to theoretical contributions the authors cover biotechnology computing representations and space aerospace engineering and a variety of ethical perspectives and controversies in these domains **The Blueprints of Infection** , 1998 *The Black Box of Biology* Michel Morange, 2020-06-09 Michel Morange updates the history of molecular biology at a moment when scientists are making big strides in genetic engineering and exploring new avenues from epigenetics to systems biology Morange places the latest findings and ideas in historical context describing in accessible terms how transformative the molecular revolution has been
