specific case studies involving contemporary debates this book shows that science and technology are fundamentally part of society and are shaped by it Draws on concepts from political sociology organizational analysis and contemporary social theory Avoids dense theoretical debate Includes case studies and concluding chapter summaries for students and scholars

Cultures Daniel Lee Kleinman, 2003-10-15 How are the worlds of university biology and commerce blurring Many university leaders see the amalgamation of academic and commercial cultures as crucial to the future vitality of higher education in the United States In Impure Cultures Daniel Lee Kleinman questions the effect of this blending on the character of academic science Using data he gathered as an ethnographic observer in a plant pathology lab at the University of Wisconsin Madison Kleinman examines the infinite and inescapable influence of the commercial world on biology in academia today Contrary to much of the existing literature and common policy practices he argues that the direct and explicit relations between university scientists and industrial concerns are not the gravest threat to academic research Rather Kleinman points to the less direct but more deeply rooted effects of commercial factors on the practice of university biology He shows that to truly understand research done at universities today it is first necessary to explore the systematic pervasive and indirect effects of the commercial world on contemporary academic practice Forging the Future of Special Collections Arnold

Graft: the devil's diamond John Lamphere,2012-02-18 The poisoned will and a fog set upon the reaches were a time to war and what may come of the fairer races Dwarven strongholds and through the southern lands of the pixie where all their magic is set an underground kingdom could this be to a single grain of sand The great tree will grow again to a time when men were little and far between and the women left to carry the burden of this war I do not remember when the tree was whole or when it stood so tall but here to see it cleaved at the trunk and its people like the fruit left to rot in the colder sands I don t remember many things as I used to or the way was the color in that little girl s hair yet there she stood waiting for me to know how this all would play out My people this fruit or anything left for this rotten world is man the short ones who live in the east and make money on the backs of the proud native Death has all that is time left to be and this covering is slow to find what we really must become
