The Nature and Status of Ethnobotany, 1978 **Paleoethnobotany** Deborah M Pearsall, 2016-06-16 This new edition of the definitive work on doing paleoethnobotany brings the book up to date by incorporating new methods and examples of research while preserving the overall organization and approach of the book to facilitate its use as a textbook In addition to updates on the comprehensive discussions of macroremains pollen and phytoliths this edition includes a chapter on starch analysis the newest tool in the paleoethnobotanist's research kit Other highlights include updated case studies expanded discussions of deposition and preservation of archaeobotanical remains updated historical overviews new and updated techniques and approaches including insights from experimental and ethnoarchaeological studies and a current listing of electronic resources Extensively illustrated this will be the standard work on paleoethnobotany for a generation

Paleoethnobotany Deborah M. Pearsall, 2013-10-22 This book describes the approaches and techniques of paleoethnobotany the study of the interrelationships between human populations and the plant world through the archaeological record Its purpose is twofold First it assembles in one volume the three major methods of paleoethnobotany the analysis of macroremains pollen analysis and phytolith analysis for the student or professional interested in the field Second it presents on paleoethnobotanist's view of the discipline its past present and future its strengths and weaknesses and its role in modern archaeology A comprehensive reference work for archaeologists and paleobotanists interested in reconstructing interrelationships between humans and plants from the archaeological record The first general of work theory and methods to emerge from this subdiscipline which has developed during the past twenty years Makes the approaches and techniques of this field more accessible to the general anthropological and botanical audiences Offers archaeologists a handbook of field sampling and flotation techniques as well as an introduction to methods of analysis and interpretation in

paleoethnobotany *Anthropologica* ,1998 Current Paleoethnobotany Christine A. Hastorf, Virginia S. Popper, 1988

Paleoethnobotany offers powerful tools for reconstructing past cultures by examining the interaction of human populations with the plant world Plant remains from archaeological sites can provide information for a number of disciplines archaeologists may use such remains to examine how plants were used how agriculture changed over time or how plant offerings in burials signaled social status ecologists and botanists may use them to study morphological changes in plants due to domestication Combining case studies and theoretical discussions *Current Paleoethnobotany* presents the first full discussion of the major stages and problems of paleoethnobotanical research from designing and testing equipment such as flotation machines to quantification and interpretation The volume explores a wide range of issues concerning collection techniques analytical procedures and interpretive models that will provide accurate information about past human societies from plant remains The contributors offer data on specific regions as well as more general background information on the basic techniques of paleoethnobotany for the nonspecialist Throughout they explicitly examine the assumptions underlying paleoethnobotanical methods and the ways in which those assumptions affect anthropological and ecological research questions Based on a symposium presented at the 1985 meeting of the Society for American Archaeology *Current Paleoethnobotany* moves beyond a technique oriented view of paleoethnobotany to successfully integrate current thinking about both procedures and research goals The contributors demonstrate the potential value of the field of paleoethnobotany and open the way for further discussion and improvement **Manual of Ethnobotany, 2nd Revised Ed.** S.K. Jain, 2010-03-01 The present book comprises of two sections A and B Section A has the text of the lectures during the Training Course in Ethnobotany and the section B has some of the material and exercise handled by the trainees during the Workshop and in practical classes The sequence of the lectures has been so arranged as to gradually and step by step introduce the scope methodology and applications of the subject along with the subjects of preparation of scientific papers and research projects This book will not only popularize the important subject of Ethnobotany but will also provide basic instructions for person freshly interested or inducted into this discipline *Paleoethnobotany, Third Edition* Deborah M Pearsall, 2015-09 This new edition of the definitive work on doing paleoethnobotany brings the book up to date by incorporating new methods and examples of research while preserving the overall organization and approach of the book to facilitate its use as a textbook In addition to updates on the comprehensive discussions of macroremains pollen and phytoliths this edition includes a chapter on starch analysis the newest tool in the paleoethnobotanist s research kit Other highlights include updated case studies expanded discussions of deposition and preservation of archaeobotanical remains updated historical overviews new and updated techniques and approaches including insights from experimental and ethnoarchaeological studies and a current listing of electronic resources Extensively illustrated this will be the standard work on paleoethnobotany for a generation *Integrating Zooarchaeology and Paleoethnobotany* Amber VanDerwarker, Tanya M.

Peres,2010-01-22 In recent years scholars have emphasized the need for more holistic subsistence analyses and collaborative publications towards this endeavor have become more numerous in the literature However there are relatively few attempts to qualitatively integrate zooarchaeological animal and paleoethnobotanical plant data and even fewer attempts to quantitatively integrate these two types of subsistence evidence Given the vastly different methods used in recovering and quantifying these data not to mention their different preservational histories it is no wonder that so few have undertaken this problem Integrating Zooarchaeology and Paleoethnobotany takes the lead in tackling this important issue by addressing the methodological limitations of data integration proposing new methods and innovative ways of using established methods and highlighting case studies that successfully employ these methods to shed new light on ancient foodways The volume challenges the perception that plant and animal foodways are distinct and contends that the separation of the analysis of archaeological plant and animal remains sets up a false dichotomy between these portions of the diet In advocating qualitative and quantitative data integration the volume establishes a clear set of methods for 1 determining the suitability of data integration in any particular case and 2 carrying out an integrated qualitative or quantitative approach
