Experience and Imagination from Paleolithic to Roman Times David S. Herrstrom, 2017-09-26 This book is an
 interdisciplinary synthesis and interpretation about the experience of light as revealed in a wide range of art and literature
 from Paleolithic to Roman times Humanistic in spirit and in its handling of facts it marshals a substantial body of scholarship
 to develop an explication of light as a central even dramatic reality of human existence and experience in diverse cultural
 settings David S. Herrstrom underscores our intimacy with light not only its constant presence in our life but its insinuating
 character Focusing on our encounters with light and ways of making sense of these this book is concerned with the personal
 and cultural impact of light exploring our resistance to and acceptance of light Its approach is unique The book's true subject
 is the individual's relationship with light rather than the investigation of light's essential nature It tells the story of light
 seducing individuals down through the ages Consequently it is not concerned with the progress of scientific inquiries into the
 physical properties and behavior of light optical science but rather with subjective reactions to it as reflected in art
 Paleolithic through Roman architecture Egyptian Grecian Roman mythology and religion Paleolithic Egyptian and literature e
 g Akhenaten Plato Aeschylus Lucretius John the Evangelist Plotinus and Augustine This book celebrates the complexity of our
 relation to light's character No individual experience of light is truer than any other none improves on any previous
 experience of light's tidal pull on us And the wondrous variety of these encounters has yielded a richly layered tapestry of
 human experience By its broad scope and interdisciplinary approach this pioneering book is without precedent **The**

Caustic Light in Nonlinear Photonic Media Alessandro Zannotti,2020-09-26 Caustics are natural phenomena forming light patterns in rainbows or through drinking glasses and creating light networks at the bottom of swimming pools Only in recent years have scientists started to artificially create simple caustics with laser light However these realizations have already contributed to progress in advanced imaging lithography and micro manipulation In this book Alessandro Zannotti pioneers caustics in many ways establishing the field of artificial caustic optics He employs caustic design to customize high intensity laser light This is of great relevance for laser based machining sensing microscopy and secure communication The author also solves a long standing problem concerning the origin of rogue waves which appear naturally in the sea and can have disastrous consequences By means of a far reaching optical analogy he identifies scattering of caustics in random media as the origin of rogue waves and shows how nonlinear light matter interaction increases their probability [The Continuum and other types of serial order](#) E.V. Huntington, [The Principles of Psychology](#) William James,1918 *U.S. Environmental Protection Agency Library System Book Catalog Holdings as of July 1973* United States. Environmental Protection Agency. Library Systems Branch,1974 **Revival: Philosophy and the Physicists (1937)** Lizzie Susan Stebbing,2018-05-08 This book is written by a philosopher for other philosophers and for that section of the reading public who buy in large quantities and no doubt devour with great earnestness the popular books written by scientists for their enlightenment We common readers to adapt a phrase from Samuel Johnson are fitted neither to criticize physical theories not to decide what precisely are their implications We are dependent upon the scientists for an exposition of those developments which so we find them proclaiming have important and far reaching consequences for philosophy Unfortunately however our popular expositors do not always serve us very well The two who are most widely read in this country are Sir Arthur Eddington and Sir James Jeans

They are not always reliable guides Their influence has been considerable upon the reading public upon theologians and upon preachers they have even misled philosopher who should have known better Accordingly it has seemed to me to be worth while to examine in some detail the philosophical views that they have put forth and to criticize the grounds upon which these views are based **An Investigation of the Laws of Thought** George Boole, 1854
