Latin American Buen Vivir and Rights of Nature Dorine E. van Norren, 2025-03-27 This refreshing account of wellbeing

perspectives of Ecuadorian Good Living sheds a new light on sustainability debates. It puts into question the universality of the UN Sustainable Development Goals. The slogan of the goals 'Leave none behind' begs the question who is behind and who is ahead. Development is caught in the logic of linear sustainable growth of nations or centres around the flourishing of the individual instead of the community. Let Mother Earth lead summarizes the indigenous American approach embracing a biocentric outlook on life where human laws and environmental governance systems must follow the laws of the earth. With concrete examples of policies, law, jurisprudence and practice from Ecuador, this book is a must read for philosophers willing to think beyond European philosophy, development economists interested in reshaping today's paradigms, innovative lawyers with an environmental heart, anthropologists who yearn for a dialogue between worldviews of the Global South and science, and all people who seek new meaning in today's society.

Sustainability and the Rights of Nature Cameron La Follette, Chris Maser, 2017-06-01. Sustainability and the Rights of Nature: An Introduction is a much needed guide that addresses the exciting and significant paradigm shift to the Rights of Nature as it is occurring both in the United States and internationally in the fields of environmental law and environmental sustainability. This shift advocates building a relationship of integrity and reciprocity with the planet by placing Nature in the forefront of our rights-based legal systems. The authors discuss means of achieving this by laying out Nature's Laws of Reciprocity and providing a roadmap of the strategies and directions needed to create a Rights of Nature oriented legal system that will shape and maintain human activities in an environmentally sustainable manner. This work is enriched with an array of unique and relevant points of reference such as the feudal notions of obligation, principles of traditional indigenous cultivation, the Pope Francis Encyclical on the environment and the new Rights of Nature based legal systems of Ecuador and Bolivia that can serve as prototypes for the United States and other countries around the world to help ensure a future of environmental sustainability for all living systems.

Sustainability and the Rights of Nature in Practice Cameron La Follette, Chris Maser, 2019-09-30. Sustainability and the Rights of Nature in Practice is the much needed complementary volume to Sustainability and the Rights of Nature: An Introduction. CRC Press, May 2017. The first book laid out the international precursors for the Rights of Nature doctrine and described the changes required to create a Rights of Nature framework that supports Nature in a sustainable relationship rather than as an exploited resource. This follow up work provides practitioners from diverse cultures around the world an opportunity to describe their own projects, successes and challenges in moving toward a legal personhood for Nature. It includes contributions from Nepal, New Zealand, Canadian, Native American, cultures, Kiribati, the United States and Scotland amongst others by practitioners working on projects that can be integrated into a Rights of Nature framework. The authors also tackle required changes to shift the paradigm such as thinking of Nature in a sacred manner, reorienting Nature's rights and human rights, the conceptualization of restoration and the removal of large scale energy infrastructure. Curated by experts in the field, this expansive collection of papers will prove invaluable to a wide array of policymakers and
