Expressive Nature Photography Brenda Tharp, 2017-07-25 Photographer and teacher Brenda Tharp marries photography craft with artistic vision to help intermediate photographers translate what they see into a personal impression of a subject in nature Using single images along with before and after and with or without examples Expressive Nature Photography teaches how to make exposures that are creative not necessarily correct Inspiring photographers to get out early and stay out late this book explains how to use light an essential element of outdoor photography Readers will learn how to see in the dark use filters to create very long exposures create a natural effect using light painting photograph night skies and moonlit landscapes and make the best use of available natural light This book also covers how to use shutter speeds to express motion and capture the energy of fast moving subjects such rushing streams ocean swells and bounding wildlife A chapter on the art of visual flow discusses how to create compositions that direct the viewer's eye through the frame for maximum impact Photographers will develop a sense of when to break the rules of composition how to use elements to frame subjects what to include and exclude in the frame how to create the feeling of depth and dimension in a scene and how to push the boundaries of composition to make memorable nature images that capture and convey fresh viewpoints High tech cameras can help create a good exposure and focused image but they can't replace the artist's eye for composition visual depth and design nor their instinct for knowing when to click the shutter There are many books on photography technique focused on technical quality but Expressive Nature Photography goes beyond the technical It guides the way to pulling emotion and meaning out of a dynamic landscape a delicate macro study or an outstanding nighttime image
