Nature's Spokesman M. Krishnan, 2000 This Collection Showcases Some Of Krishnan S Finest Essays On Large Mammals Little Creatures Nature In Temple Art And Folklore Nature S Desecration And Conservation The Man Who Organized Nature Gunnar Broberg, 2025-05-20 A vivid portrait of the life and work of Carl Linnaeus Carl Linnaeus 1707 1778 known as the father of modern biological taxonomy formalized and popularized the system of binomial nomenclature used to classify plants and animals Linnaeus himself classified thousands of species the simple and immediately recognizable abbreviation L is used to mark classifications originally made by Linnaeus This biography by the leading authority on Linnaeus offers a vivid portrait of Linnaeus s life and work Drawing on a wide range of previously unpublished sources including diaries and personal correspondence as well as new research it presents revealing and original accounts of his family life the political context in which he pursued his work and his eccentric views on sexuality The Man Who Organized Nature describes Linnaeus s childhood in a landscape of striking natural beauty and how this influenced his later work Linnaeus s Lutheran pastor father knowledgeable about plants and an enthusiastic gardener helped foster an early interest in botany The book examines the political connections that helped Linnaeus secure patronage for his work and untangles his ideas about sexuality These were not as often assumed an attempt to naturalize gender categories but more likely reflected the laissez faire attitudes of the era Linnaeus like many other brilliant scientists could be moody and egotistical the book describes his human failings as well as his medical and scientific achievements Written in an engaging and accessible style The Man Who Organized Nature provides new and fascinating insights into the life of one of history s most consequential and enigmatic scientists **Frankfurt School** J. M. Bernstein, 1994 The Frankfurt School refers to the members associated with the Institut fur Sozialforschung Institute for Social Research which was founded in Frankfurt in 1923 The work of this group is generally agreed to have been a landmark in twentieth century social science It is of seminal importance in our understanding of culture progress politics production consumption and method This set of six volumes provides a full picture of the School by examining the important developments that have occurred since the deaths of the original core of Frankfurt scholars All the major figures Adorno Horkheimer Marcuse Benjamin are represented In particular the important post war work of Jurgen Habermas is fully assessed The collection also covers the work of many of the minor figures associated with the School who have been unfairly neglected in the past resulting in the most complete survey and guide to the oeuvre of the Frankfurt School *Nature Cures* James C. Whorton, 2004 Writing with wit and with fairness to all sides Whorton offers a fascinating look at alternative health systems highlighting their history theories successes and failures His book is an engaging and authoritative history that highlights the course of alternative medicine in the U S providing valuable background to the wide range of therapies available today *Knowing Poetry* Adrian Armstrong, Sarah Kay, 2011-05-15 In the later Middle Ages many writers claimed that prose is superior to verse as a vehicle of knowledge because it presents the

truth in an unvarnished form without the distortions of meter and rhyme Beginning in the thirteenth century works of verse narrative from the early Middle Ages were recast in prose as if prose had become the literary norm Instead of dying out however verse took on new vitality In France verse texts were produced in both French and Occitan with the explicit intention of transmitting encyclopedic political philosophical moral historical and other forms of knowledge In *Knowing Poetry* Adrian Armstrong and Sarah Kay explore why and how verse continued to be used to transmit and shape knowledge in France They cover the period between Jean de Meun's *Roman de la rose* c 1270 and the major work of Jean Bouchet the last of the grands rhétoriciens c 1530 The authors find that the advent of prose led to a new relationship between poetry and knowledge in which poetry serves as a medium for serious reflection and self reflection on subjectivity embodiment and time They propose that three major works the *Roman de la rose* the *Ovide moralisé* and Boethius' *Consolation of Philosophy* form a single influential matrix linking poetry and intellectual inquiry metaphysical insights and eroticized knowledge The trio of thought world contingency poetically represented by Philosophy Nature and Fortune grounds poetic exploration of reality poetry and community

Speaking with Nature Norman Wirzba, 2024-10-29 From one of the world's leading historians comes the first substantial study of environmentalism set in any country outside the Euro American world By the canons of orthodox social science countries like India are not supposed to have an environmental consciousness They are as it were too poor to be green In this deeply researched book Ramachandra Guha challenges this narrative by revealing a virtually unknown prehistory of the global movement set far outside Europe or America Long before the publication of Rachel Carson's *Silent Spring* and well before climate change ten remarkable individuals wrote with deep insight about the dangers of environmental abuse from within an Indian context In strikingly contemporary language Rabindranath Tagore Radhakamal Mukerjee J C Kumarappa Patrick Geddes Albert and Gabrielle Howard Mira Verrier Elwin K M Munshi and M Krishnan wrote about the forest and the wild soil and water urbanization and industrialization Positing the idea of what Guha calls livelihood environmentalism in contrast to the full stomach environmentalism of the affluent world these writers activists and scientists played a pioneering role in shaping global conversations about humanity's relationship with nature Spanning more than a century of Indian history and decidedly transnational in reference this book offers rich resources for considering the threat of climate change today

The Huxleys Alison Bashford, 2022-11-16 This is a long overdue biography of the Huxleys the Victorian natural historian T H Huxley Darwin's Bulldog and his grandson the scientist conservationist and zoologist Julian Huxley Both T H and Julian suffered from depression thinking and writing about the condition and genetic inheritance in highly curious ways And between them they communicated to the world the great modern story of the theory of evolution by natural selection Because the grandson modeled himself so self consciously on the grandfather celebrated historian Alison Bashford writes seamlessly about these omnivorous intellects together almost as if they were one very long lived man whose vital dates bookended the colossal shifts in world history from the age of sail to the Space Age and from colonial wars to

world wars to the cold war The myriad questions that the Huxleys grappled with make them the perfect dynasty companions for time travel over the age of evolution What is the nature of time and how old is the Earth itself What is the connection between human history and natural history How are humans animals and how are we not What is the deep past and the distant future of humankind Can and should we actively seek to improve future generations What might the planet look like 10 000 years hence This momentous biography traces the problems and wonders of the modern world that the Huxleys themselves raised postured and pondered over lives that spanned the age of evolution

Forests and Ecological History of Assam, 1826-2000 Arupjyoti Saikia, 2011-02-07 This book presents a comprehensive account of the transformation of Assam's forests and ecology from early nineteenth century to the end of the twentieth century It locates present day ecological conflicts in the colonial era when contest over forest land and resource began to take new shape Arupjyoti Saikia delineates how forest resources in Assam were mapped and integrated with merchant capitalism since the early nineteenth century He shows how imperial forestry practices led to changes in traditional resource utilization patterns The book also examines the political economy of conservation practices It explores the question of law and conservation role of institutions and organizations and the changing role of the forests in imperial economy The book argues how the making of forest policy in the postcolonial period was defined by the complexities of the political matrix It discusses plantation silvicultural practices protection and regeneration of forests and livelihood practices The author also analyses public debates surrounding ecology and environmental changes in conservation practices after the 1980 Act

Hanuman's Tale Philip Lutgendorf, 2007-01-11 Hanuman the devoted monkey helper of Rama and Sita has long been recognized as a popular character in India's ancient Ramayana epic But more recently he has also become one of the most beloved and worshiped gods in the Hindu pantheon enshrined in majestic new temples but equally present in poster art advertising and mass media Drawing on Sanskrit and vernacular texts classical iconography and modern TV serials and extensive fieldwork and interviews Philip Lutgendorf challenges the academic cliché of Hanuman as a minor or folk deity by exploring his complex and growing role in South Asian religion and culture This wide ranging study examines the historical evolution of Hanuman's worship his close association with Shiva and goddesses his invocation in tantric ritual his physical immortality and enduring presence in sacred sites and his appeal to devotees who include scholars wrestlers healers politicians and middle class urbanites Lutgendorf also offers a rich array of entertaining stories not

previously available in English an expanding epic cycle that he christens the Hanumayana Arguing that Hanuman's role as cosmic middle man is intimately linked to his embodiment in a charming and provocative simian form Lutgendorf moves beyond the Indian subcontinent to interrogate the wider human fascination with anthropoid primates as boundary beings and as potent signifiers of both Self and Other
