Dialectics of the Ideal ,2013-11-28 In Dialectics of the Ideal Evald Ilyenkov and Creative Soviet Marxism Levant and Oittinen provide a window into the subterranean tradition of creative Soviet Marxism which developed on the margins of the Soviet academe and remains largely outside the orbit of contemporary theory in the West With his activity approach E V Ilyenkov its principal figure in the post Stalin period makes a substantial contribution toward an anti reductionist Marxist theory of the subject which should be of interest to contemporary theorists who seek to avoid economic and cultural reductionism as well as the malaise of postmodern relativism This volume features Levant s translation of Ilyenkov s Dialectics of the Ideal 2009 which remained unpublished until thirty years after the author s tragic suicide in 1979 Contributors include Evald Ilyenkov Tarja Knuuttila Alex Levant Andrey Maidansky Vesa Oittinen Paula Rauhala and Birger Siebert Наука логики: Том 1 Г. В. Ф. Гегель, Russian Studies in Philosophy ,2005 **Audacity of the Spirit** ,2019-06-07 Audacity of the Spirit by A F Losev 1893 1988 dares us to think holistically dialectically Translated from the Russian original Politizdat Moskva 1988 by Peter R Weisensel and Vitali I Betaneli the book falls into three parts the dialectical method Losev s application of dialectics to history and culture and his personal reflections on studying philosophy Losev s insatiable intellectual curiosity probes a remarkable variety of areas Positions he considers though are not always easily reconcilable as with Marxism Leninism and Orthodox Christianity In Losev s conception of culture however culture and the intrinsic unity of any given cultural order is the common element that underlies everything living even the order s incompatibles The given culture cannot be reduced to any single position nor to all of them taken together Audacity of the Spirit is an introduction to dialectics for beginners but it is also a major philosopher s summing up of his reflections to a non specialized audience **Hegel Bibliography / Hegel Bibliographie. Intellectuals Vesa Oittinen, Elina Viljanen, 2022-11-25 This book focuses on the extent to which Soviet scholars and cultural theoreticians were able to act autonomously during the Stalin era. The authors question how we should consider certain intellectual achievements which took place despite the pressure of Stalinism and how best to recognise and describe such achievements. The chapters in this book offer suggestions for new interpretations on Soviet philosophy of science and humanities, linguistics, philosophy, musicology, literature and mathematics from the point of view of general cultural theory. In this way they challenge the received image of the Stalin era humanities which reduces them into mere propaganda. Intended for scholars of Russian and Soviet studies, this book will dispel many received views about the character of Stalinism and Soviet culture. Chapters 1, 2, 4, 6, 10 and 13 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license.

Transcendentalism Overturned Anna-Teresa Tymieniecka, 2011-04-02 This collection offers a critical assessment of transcendentalism, the understanding of consciousness absolutized as a system of a priori laws of the mind that was advanced by Kant and Husserl. As these studies show, transcendentalism critically informed 20th Century phenomenological investigation into such issues as temporality, historicity, imagination, objectivity and subjectivity, freedom, ethical judgment, work, praxis. Advances in science have now provoked a questioning of the absolute prerogatives of consciousness. Transcendentalism is challenged by empirical reductionism. And recognition of the role the celestial sphere plays in life on planet earth suggests that a radical shift of philosophy's center of gravity be made away from absolute consciousness and toward the transcendental forces at play in the architectonics of the cosmos.
