Johnson, 2014-01-10 Within six months of the devastating attack on Pearl Harbor the U S Navy had checked the Japanese military advance in the Pacific to the extent that the United States could return to its original Defeat Germany First strategy That the Navy was able to accomplish this feat with only six fleet aircraft carriers and little more than 1 000 combat aircraft was not sheer luck but the culmination of more than two decades of determined preparation This thorough study with detailed drawings and photographs explains and illustrates the trial and error process which went into developing the aircraft airships and ships of the interwar period The critical factors that shaped Naval Aviation after World War I naval treaties fleet tactics government programs leadership and organization as well as the emergence of Marine Corps and Coast Guard aviation are discussed in depth [American Military Transport Aircraft Since 1925](#) E.R. Johnson, Lloyd S. Jones, 2013-04-06 Without the support of airlift the modern American military machine would be brought to

a standstill Since World War II beginning with the Cold War and continuing up to the present day the U S armed forces have come increasingly to rely upon airlift for mobility The power to rapidly move and thereafter support a military operation anywhere in the world at any time has become a foundational element of American defense policy This work provides the reader with a comprehensive historical survey including technical specifications drawings and photographs of each type of fixed wing aircraft used by U S military forces over a nearly 90 year period to carry out the airlift mission *Catalog of War Production Board Reporting and Application Forms, as of November 2, 1945* United States. BuDocks Technical Digest ,1953 *Air Mobility* Robert C. Owen,2013-08-31 Global air mobility is an American invention During the twentieth century other nations developed capabilities to transport supplies and personnel by air to support deployed military forces But only the United States mustered the resources and will to create a global transport force and aerial refueling aircraft capable of moving air and ground combat forces of all types to anywhere in the world and supporting them in continuous combat operations Whether contemplating a bomber campaign or halting another surprise attack American war planners have depended on transport and tanker aircraft to launch reinforce and sustain operations Air mobility has also changed the way the United States relates to the world American leaders use air mobility to signal friends and enemies of their intent and ability to intervene attack or defend on short notice and powerfully Stateside air wings and armored brigades on Sunday can be patrolling the air of any continent on Wednesday and taking up defensive positions on a friend s borders by Friday This capability affects the diplomacy and the calculations of America and its friends and enemies alike Moreover such global mobility has made America the world s philanthropist From their earliest days American airlift forces have performed thousands of humanitarian missions dropping hay to snow bound cattle taking stranded pilgrims to Mecca and delivering food and medicine to tsunami stricken towns Air Mobility examines how air power elevated the

American military's penchant for speed and ability to maneuver to an art unequalled by any other nation. Is charitable giving more about satisfying the needs of the donor or those of the recipient? The answer according to Friedman is both and Reinventing Philanthropy provides the essential tools for maximizing the impact of one's donations.
