*The Navy Times Book of Submarines* Brayton Harris, 1997 Shattering long held myths and misunderstandings author Brayton Harris traces the development of the submarine through an era in which writers of fiction saw the merits better than most professionals until the Germans almost won World War I He covers the professional and political arrogance that delayed antisubmarine development for so long that German submarines almost won World War II as well and examines post war progress toward the truly awesome submarine of today Along the way Harris explores the shifting moral issues of unrestricted naval warfare outlines the hundred year search for an effective underwater power plant that culminated in the nuclear reactor and raises important questions about the future A fascinating exploration of the steps and stumbles during development a rousing tribute to those who fought and died and a powerful study of the submarine's impact on America The Navy Times Book of Submarines is an unparalleled source for understanding the great hunters of the deep **Air University Library Index to Military Periodicals**, 1999 **U.S. Navy's Future Submarine Force Structure** United States. Moore, 2004 Submarines had a vital if often unheralded role in the superpower navies during the Cold War Their crews carried out intelligence collection operations sought out and stood ready to destroy opposing submarines and from the early 1960s threatened missile attacks on their adversary's homeland providing in many respects the most survivable nuclear deterrent of the Cold War For both East and West the modern submarine originated in German U boat designs obtained at the end of World War II Although enjoying a similar technology base by the 1990s the

superpowers had created submarine fleets of radically different designs and capabilities Written in collaboration with the former Soviet submarine design bureaus Norman Polmar and K J Moore authoritatively demonstrate in this landmark study how differing submarine missions antisubmarine priorities levels of technical competence and approaches to submarine design organizations and management caused the divergence
