Of Cabbages and the King Eloise Paananen, 1984 *Of Cabbages and the King* Eloise Paananen, 1984 *Top 100 Food Plants* Ernest Small, 2009 This beautifully illustrated book reviews scientific and technological information about the world's major food plants and their culinary uses. An introductory chapter discusses nutritional and other fundamental scientific aspects of plant foods. The 100 main chapters deal with a particular species or group of species. All categories of food plants are covered including cereals, oilseeds, fruits, nuts, vegetables, legumes, herbs, spices, beverage plants, and sources of industrial food extracts. Information is provided on scientific and common names, appearance, history, economic and social importance, food uses, including practical information on storage and preparation, as well as notable curiosities. There are more than 3000 literature citations in the book, and the text is complemented by over 250 exquisitely drawn illustrations. Given the current alarming rise in food costs and increasing risk of hunger in many regions, specialists in diverse fields will find this reference work to be especially useful. As well, those familiar with Dr. Small's books or those with an interest in gardening, cooking, and human health in relation to diet will want to own a copy of this book. Publisher's web site

Animation, Caricature, and Gag and Political Cartoons in the United States and Canada John A. Lent, 1994-07-21 One of four volumes dealing with the world of comic art, this volume is a comprehensive international bibliography dealing with animation, caricature, gag, illustrative magazine, and political cartoons in the United States and Canada. Reflecting the substantial growth of comic art literature in recent years, it is representative of various types of publications, writing formats, and styles, and languages from all over the world. The four volumes attempt for the first time to pull together the massive amount of comic art literature worldwide. Organized with meticulous detail, the work consists of numerous resources, including an annotated directory of 66 comic art related periodicals, a section of comic art functions, activities, and relationships with various socio-cultural phenomena such as education, eroticism, ethnicity, race, social consciousness, and violence, as well as historical and contemporary parts on animation, caricature, gag, cartoons, and political cartoons. At least 224 animators, caricaturists, and cartoonists are singled out for special prominence. Business, legal, and technical aspects of each genre make up other categories. The book is enhanced by Maurice Horn's foreword, retracing the pioneer work he and others did in the field of comic art studies. To further help the user, the indices are systematically broken down by authors, cartoonists, characters, and titles, periodicals, and subjects.
