When Death Goes Pop Charlton D. McIlwain, 2005 Scholars educators health professionals and activists from a variety of fields have struggled with one of the most significant questions of contemporary life How do we rescue the experience of death and dying from the mire of fear denial and secrecy that it has been associated with for the better part of a century In *When Death Goes Pop* Charlton D McIlwain describes a striking emerging shift in the way that death is represented in such omnipresent forms of media as television a shift that seems to be moving the American discourse on death and dying from the private sphere to the public The book surveys the past thirty years of death related television programming from daytime soaps to prime time dramas focusing primarily on *Home Box Office's Six Feet Under* and its innovative approach to the subject and from the Sci Fi Channel's *Crossing Over* to the genre of paranormal programming as a whole This book also discusses the increasing use of multimedia and the Internet in the funeral industry and how the new technologies change the way that we remember the dead as they create and sustain what we might call a virtual community of death

Doctors and Patients: History, Representation, Communication from Antiquity to the Present Maria Malatesta, 2015 For the first time a book considers the doctor patient relationship in the long period and from a broad geographical perspective Historians anthropologists and doctors reflect on the factors that from the Classical age until the present have altered the care relationship and the power relations embedded within it The book also highlights that

communication and narration understood as constitutive aspects of care are the elements which link the past to the present From the encounter between religion and medicine to the centuries long struggle between doctors and patients in defence of their respective positions from medical dramas to efforts to humanize medicine the book describes the doctor patient relationship in all its cultural transnational and transtemporal dimensions Television Finales Douglas L. Howard, David Bianculli, 2018-11-13 Today more than ever series finales have become cultural touchstones that feed watercooler fodder and Twitter storms among a committed community of viewers While the final episodes of *The Fugitive* and *M A S H* continue to rank among the highest rated broadcasts more recent shows draw legions of binge watching fans Given the importance of finales to viewers and critics alike Howard and Bianculli along with the other contributors explore these endings and what they mean to the audience both in terms of their sense of narrative and as episodes that epitomize an entire show Bringing together a veritable who's who of television scholars journalists and media experts including Robert Thompson Martha Nochimson Gary Edgerton David Hinckley Kim Akass and Joanne Morreale the book offers commentary on some of the most compelling and often controversial final episodes in television history Each chapter is devoted to a separate finale providing readers with a comprehensive survey of these watershed moments Gathering a unique international lineup of journalists and media scholars the book also offers readers an intriguing variety of critical voices and perspectives *The Cultural Politics of Colorblind TV Casting* Kristen J. Warner, 2015-06-05 This book fills a significant gap in the critical conversation on race in media by extending interrogations of racial colorblindness in American television to the industrial practices that shape what we see on screen Specifically it frames the practice of colorblind casting as a potent lens for examining the interdependence of 21st century post racial politics and popular culture Applying a production as culture approach to a series of casting case studies from American primetime dramatic television including ABC's *Grey's Anatomy* and The CW's *The Vampire Diaries* Kristen Warner complicates our understanding of the cultural processes that inform casting and expounds the aesthetic and pragmatic industrial viewpoints that perpetuate limiting or downright exclusionary hiring norms She also examines the material effects of actors of color who knowingly participate in this system and justify their limited roles as a consequence of employment and finally speculates on what alternatives if any are available to correct these practices Warner's insights are a valuable addition to scholarship in media industry studies critical race theory ethnic studies and audience reception and will also appeal to those with a general interest in race in popular culture Nurses and Nursing Pádraig Ó Lúanaigh, 2017-04-21 This textbook draws on international contributors with a range of backgrounds to explore engage with and challenge readers in understanding the many aspects and elements that inform and influence contemporary nursing practice With a focus to the future this book explores the challenges facing health services and presents the arguments for a nursing contribution and influence in ensuring safe and quality care Readers are supported to explore how as individuals they can shape their personal nursing identity and practice The structure of the text is based on the belief that an individual

nurse s professional identity is developed through an interaction between their personal attributes and the influences of the profession itself Reflecting this approach the authors engage in a conversation with the reader rather than simply presenting a series of facts and information Organised around a series of topical and pertinent questions and drawing on perspectives from policy education and practice the book explores a diverse range of topics such as how historical and popular media representations of nursing hold back nursing practice today the opportunities presented through education and nursing role development to increase the nursing contribution to health services the economic and political influences on nursing and health care how the professional regulation of nurses and core values informs your practice ways to define and develop your own strong nursing identity Central chapter questions provide ideal triggers for group discussions in class or online and equally as discussion topics between colleagues to support ongoing professional development There is an emphasis throughout Nurses and Nursing on challenging thinking to recast nursing practice for the future by encouraging the reader to explore and create their emerging nursing identity or re examine previously long held views This text supports the reader to better understand health care nursing and most importantly themselves as nurses [Imagining Illness](#) David Serlin,2010 Analyzing the visual culture of public health from the nineteenth century to the present [An Analysis of Thinking and Research About Qualitative Methods](#) W. James Potter,2013-11-05 Written for social science scholars who want to learn more about the qualitative way of thinking this book addresses the full continuum of issues about the qualitative methodologies At one end of that continuum are the deeply philosophical concerns of ontology and epistemology At the other concrete end of that continuum are the practical issues of what is considered evidence How does one go about gathering evidence Where when and how does one analyze evidence What are the alternative ways of dealing with tone and voice in writing qualitative research The attention to practical concrete issues makes this book useful as a handbook providing a great deal of vital information to scholars who want a guide to making decisions as they navigate their research questions through the qualitative realm Uniquely qualified to write such a book Potter has earned PhDs in both qualitative methods with a concentration in linguistics and field studies and in quantitative methods with a concentration in social science theory and statistics The book is not an ideological argument that glorifies one system of thinking while attempting to persuade the reader that other systems of thinking are bankrupt Rather the book presents a respectful balanced analysis of the strengths and weaknesses of the qualitative approach The book builds to a controversial final chapter entitled Is Convergence a Possibility in which Potter synthesizes a conclusion from his analysis of a wide range of qualitative studies across three broad topic areas text focused research audience focused research and institution focused research and across seven major qualitative methodologies ethnography ethnomethodology reception study ecological psychology symbolic interactionism cultural studies and textual analysis His conclusion is that not only is there a possibility of a convergence between qualitative and quantitative approaches but that the convergence has already happened The book includes an appendix in which 95

books and articles using the qualitative approach are abstracted and analyzed to illustrate key points of methodology and methods It also includes subject and author indexes *A Companion to Media Studies* Angharad N.
