

8. Productivity policy

Laura Abramovsky, Emla Fitzsimons, Alissa Goodman, Rachel Griffith, Rupert Harrison and Helen Simpson (IFS)

Summary

- The government is considering a number of potential changes to the R&D tax credit for small and medium-sized enterprises (SMEs). None of the options that we discuss is without potential drawbacks.
- Any change is also likely to increase the uncertainty and/or complexity associated with claiming relief. Given the long-term nature of R&D investment decisions, this seems to be an area where policy stability is particularly desirable. Thus implementing no changes may well be the best option.
- The 2005 Pre-Budget Report confirmed the launch of the National Employer Training Programme (NETP) from April 2006, now branded 'Train to Gain'. The evidence for the NETP's likely effectiveness in improving productivity is not very strong so far.
- Whether the public funding directed towards the NETP provides value for money in terms of fulfilling its key productivity aims will ultimately depend on its effectiveness in terms of generating both additional take-up of training and positive returns to the qualifications acquired through the policy.
- In the 2005 Pre-Budget Report, the Chancellor and the Deputy Prime Minister asked Kate Barker to lead a review of how the planning system can better deliver economic goals. We discuss some aspects of the relationship between planning and productivity, and present some evidence from the retail sector.

8.1 Introduction

Long-term increases in prosperity and living standards depend on sustained growth in labour productivity (output per worker). In recent decades, the level of labour productivity in the UK has been low compared with the USA, France and Germany, and the government has set itself a target of increasing the rate of labour productivity growth and narrowing the productivity gap.¹

This chapter discusses three areas of government policy aimed at improving Britain's productivity performance. First, the government is considering a number of potential changes to the R&D tax credit for small and medium-sized enterprises (SMEs). We describe the background to the R&D tax credits and discuss the merits of various options for change.

¹ For further discussion of the government's record on productivity, see L. Abramovsky, S. Bond, R. Harrison and H. Simpson, *Productivity Policy*, IFS Briefing Note no. 60, 2005, http://www.ifs.org.uk/publications/pbf7/publication_id=3362.
