Reforms And Policy Adult Education Research In Nordic Countries:

Reforms and Policy Sigvart Tøsse,2000 This volume contains 15 articles on recent reforms and policy in the field of adult education

Educational Reform in Europe Richard R. Verdugo,2014-10-01 Education is a contested terrain The symmetry of education reform among the seven countries examined in this volume is remarkable There is much commonality in the issues they raise in the competing groups battling over education policy their policy choices and the implementation of such policies Also all seven countries address the same issues equity global competition the performance of their students There are at least six important traits characterizing these battles the context the combatants the issues the process and the policies To begin with history culture and governance regime set the context for education policy and reform Second there is the process of how these battles are waged is compromise an outcome or is it a zero sum contest Third there appear to be four groups of combatants each with its own ideology representing a particular social class in society and their views about education and its uses Conservatives Socialists Neo Liberals and Elites Education is an important and valued resource that each status group tries to control and shape to its own views Fourth there are key issues that drive education reform how education can best flatten a social system how education train students for work and how education socializes students to be functioning citizens In recent years fifth issue has emerged student performance on international standardized tests Not only is a society s international reputation based on their students performance but nations see such performance as an indicator of the quality of their educational system and if it is good enough to secure its economic future Finally there are the policies themselves do they reduce or increase inequality who benefits and how The chapters in this volume clearly point out that education reform is not a homogeneous process as some scholars have conjectured Rather education reform involves heated battles over the control of the educational system because education is seen as a key factor in maintaining a society s vision and social structure

Homo Sapiens Europæus Michael Kuhn,Ronald G. Sultana,2006 In many ways education mirrors society by reflecting changing and emergent goals and values as well as by contributing to both the reproduction and production of particular life forms In the context of the formative project Europe education is called upon to play an increasingly central role one that is responsive to particular images of the

European Union and to its aspirations and goals The widespread conviction is that education and training will re invigorate ailing economies and that in the context of globalization national and regional competitiveness will only prevail if there is a qualitative continued improvement in human capital This volume critically examines such claims considering the ways in which learning is being constructed across Europe and the implications this has for notions of democratic citizenship and education

Challenging the 'European Area of Lifelong Learning' George K. Zarifis,Maria N. Gravani,2013-10-29 This book critically reflects on the

context in which lifelong learning policies and practices are organized in Europe with contributions of researchers and policy makers in the field Through a critical lens the book reinterprets the core content of the messages that are conveyed by the European Commission in the Memorandum for Lifelong Learning the most important policy document in the area which after a decade from its publication still remains the vehicle for all current developments in lifelong learning in Europe With references to research findings proposed actions and applications to immediate practice that have an added value for Europeans but which either do not appear to correspond directly to what is stipulated by the European Commission or are completely ignored as part of the lifelong learning process the book offers an analytic and systematic outlook of the main challenges in creating the European Area of Lifelong Learning In times as decisive as the ones we are going through today both in social and economic terms a critical perspective of the practices and policies adopted by the EU Member States is essential The book follows the same structure as the Memorandum in order to debate and critically approach in separate sections the core issues that Europe faces today in relation to the idea of making a European area of Lifelong Learning
