Region In Turmoil South Asian Conflicts Since 1947:

A Region in Turmoil Robert Johnson, 2006 Since 2001 there has been considerable interest in the individual conflicts that have engulfed the states of South Asia from the long insurgency of Myanmar through the struggle of the Tamil Tigers in Sri Lanka the Maoist insurgency in Nepal the unrest in the Punjab and Assam the Bangladeshi war of independence the gruelling conflict in Kashmir to the intractable conflicts of Afghanistan and the current War on Terror In *A Region in Turmoil South Asian Conflicts since 1947* Rob Johnson explains and evaluates the historic and political roots of conflicts in South Asia in a systematic and thematic way South Asian region as a whole and they are rarely examined in the regional or global context The failure to take a regional perspective in the past has meant that important connections have not always been understood in the West and the view from South Asia has perhaps not been fully explored The author addresses this gap illustrating the causes developments context and conclusions or absence of them of conflicts in the South Asian region India and Pakistan are both nuclear powers who have resorted to war with each other on a number of occasions since independence In addition the insurgencies of the last fifty years continue to destabilize the states of the region and now the rest of the world The global context of these campaigns are analyzed from the end of empire through the Cold War to the global effort against terrorism today Highly topical this book will be of interest not only to students and scholars but to a wide general audience as well

A Region in Turmoil Rob Johnson, 2005-09-15 South Asia has been the setting for some of the century's most violent invasions the Western world's bloodiest defeats and a volatile geopolitical brew of religions ethnicities and nationalism that sends unsettling ripples through the global balance of power even today Rob Johnson writes here the engrossing history of the individual conflicts that have engulfed the states of South Asia during the last half century *A Region in Turmoil* offers a new perspective on the area drawing together the conflicts of South Asia and examining them in local and global contexts from the end of the Western colonial empires through today's global efforts to combat terrorism Johnson's incisive analysis breaks down the historical and political roots of the conflicts and departs from traditional Western centric paradigms to reveal heretofore overlooked South Asian viewpoints on the conflicts and connections among the wars He probes the causes contexts and conclusions of the conflicts ranging from the enduring insurgency in Myanmar to the struggle of the Tamil Tigers in Sri Lanka the unrest in the Punjab and Assam states the Bangladeshi war of independence and the intractable struggles in Kashmir and Afghanistan The twenty first century opened with South Asia front and center on a turbulent political stage the region is not only the designated frontline for the war on terror but also home to the newest nuclear powers India and Pakistan *A Region in Turmoil* addresses this critical contemporary crisis with an invaluable analysis of the region and its complex history making it essential reading for historians policymakers and anyone who reads the front page of the daily newspaper

Global security Great Britain: Parliament: House of Commons: Foreign Affairs Committee, 2009-08-02 This report into the global security concerns related to Afghanistan and Pakistan recommends that

the UK Government should re focus its wide ranging objectives in Afghanistan and concentrate its limited resources on one priority security The UK has experienced mission creep from its initial goal of countering international terrorism into the realms of counter insurgency counter narcotics protection of human rights and state building The Committee recommends that the lead international role on counter narcotics should be transferred away from the UK The Committee recognises that the security situation in Afghanistan will remain precarious for some time to come but there can be no question of the international community abandoning Afghanistan The issue at stake must be how best the UK and its allies can allocate responsibilities and share burdens so as to ensure that the country does not once again fall into the hands of those who seek to threaten the security of the UK and the West The Committee says that a negotiated Afghan led political settlement with broad popular support represents the only realistic option for long term security and stability in Afghanistan There can be no serious prospect of meaningful discussions until Coalition Forces and the Afghan national security forces gain and retain the upper hand on security across the country including in Helmand and are then able to negotiate from a position of strength The international effort by the UN EU and individual countries in Afghanistan since 2001 has delivered much less than it promised and its impact has been significantly diluted by the absence of a unified vision and strategy grounded in the realities of Afghanistan s history culture and politics

Oil, Islam, and Conflict Robert Johnson,2007-10-15 The author looks at the policies of the Central Asian governments that includes their attitudes to democratic reform human rights energy and economic development and how these are related to civil violence

Regionalism and Regional Security in South Asia Zahid Shahab Ahmed,2016-04-08 Zahid Shahab Ahmed evaluates the progress of the South Asian Association for Regional Cooperation SAARC This study goes beyond economic integration to present a detailed appraisal of cooperation under the overarching themes of economic cooperation environmental security human welfare and cooperation in security matters According to the author SAARC is making progress in addressing the myriad of issues on its agenda The transition from agreements to actions and frequent interactions among the member states has boosted confidence The progress of SAARC is more evident in the less controversial areas of human security such as poverty alleviation health and safety human resources development and higher education Notwithstanding enthusiastic commitments reflected in agreements and action plans there is a gulf between rhetoric and implementation most notably in sensitive areas relating to traditional security In the light of the findings of this study the author proposes that greater cooperation in common human security areas has a potential to pave the way for a cooperation on issues of a contentious nature particularly terrorism

Israel Affairs *Race, Ethnicity and Nuclear War* Paul Williams, 2011-01-01 Ranging across fiction and poetry critical theory and film comics and speeches *Race Ethnicity and Nuclear War* explores how writers thinkers and filmmakers have tackled the question Are nuclear weapons white Paul Williams addresses myriad representations of nuclear weapons the Manhattan Project the destruction of Hiroshima and Nagasaki nuclear tests across the globe and the anxiety surrounding the superpowers devastating arsenals Ultimately Williams concludes that many texts act as a reminder that the power enjoyed by the white Western world imperils the whole planet **The British Indian Army** Rob Johnson, 2014-06-26 The British Indian Army was a distinctive phenomenon a curious combination of Western imperial and South Asian military cultures It was first and foremost a military instrument for garrison duties but it was rarely used in internal security and most of its history is concerned with expeditionary wars While the British regarded the Indian Army as a source of pride and a vital source of imperial manpower it was not a simple case of exploitation of local indigenous labour by an indifferent colonial system but rather an evolving and often imperfect partnership with shared identities varying degrees of proficiency and a particular ethos The Indian Army was transformed under British direction and arguably enjoyed its greatest triumph in defeating Imperial Japan in 1945 Paradoxically at the same time the Indian Armed Forces were also the most potent vehicles for the concept of a free and independent India This new edited work is a selection of the Indian army's long history of development and modernisation drawing out themes such as leadership discipline racial categorisation mechanisation and operational performance It ranges from the campaigns of the eighteenth century to the agonized decisions to break up the old army between the new nations of South Asia Chapters also cover the operations in Afghanistan Persia and China in the nineteenth century the gruelling conditions of Mesopotamia and Gallipoli in the First World War auxiliaries on the North West Frontier ambiguities over internal security in the Inter War Years air power and armoured warfare the paradoxes of race and operations in Malaya during the army's nadir in 1941-42 The collection represents renewed interest in the Indian armed forces during the British period and offers a wide range of themes for consideration History at the End of the World? History Climate Change and the Possibility of Closure Mark Levene, Robert Johnson, Penny Roberts, 2010-01-01 This collection of essays proposes that climate change means serious peril Our argument however is not about the science per se It is about us our deep and more recent history and how we arrived at this calamitous impasse With contributions from academic activists and independent researchers *History at the End of the World* challenges advocates of business as usual to think again But in its wide ranging assessment of how we transcend the current crisis it also proposes that the human past could be our most powerful resource in the struggle for survival Our approaches begin from archaeology literature religion psychology sociology philosophy of science engineering and sustainable development as well as straight history *Failed States and the Origins of Violence* Tiffany Howard, 2016-04-15 What makes a terrorist Is an individual inherently predisposed to be attracted to political violence or does exposure to a certain environment desensitize them in such a way that violence

represents a viable mode for addressing political grievances Identifying state failure as the impetus for political violence this book addresses these questions and focuses on why existing extremist groups find failed states so attractive Utilizing global barometer data Tiffany Howard examines the underpinnings of individual support for political violence and argues that an insidious pattern of deprivation within failed states drives ordinary citizens to engage in and support extreme acts of political violence A rigorous examination of four regions plagued by a combination of failed states and political violence Sub Saharan Africa The Middle East and North Africa Southeast and South Asia and Latin America this text draws parallels to arrive at a single conclusion that failed states are a natural breeding ground for terrorism and political violence **Atal Bihari**

This edited volume addresses the key issues of ethics war and international relations in the post 9 11 world There is a lively debate in contemporary international relations concerning the relationship between statist obligations to one's own political community and cosmopolitan duties to distant others This volume contributes to this debate by investigating aspects of the ethics of national military and security and intelligence policies in the post 9 11 environment The discursive transformation of national militaries into forces for good became normalized as the Cold War subsided While the number of humanitarian military interventions and operations rose considerably in the immediate post Cold War period the advent of the war on terror raised questions about exactly what we mean by ethical behaviour in terms of military and security policies This volume interrogates this key question via a focus that is both distinctive and illuminating on national military ethics femininities masculinities and difference and intelligence ethics The key objectives are to demonstrate the important linkages between areas of international relations that are all too often treated in isolation from one another and to investigate the growing tension between cosmopolitan and communitarian conceptions of intelligence and security and the use of armed

Baltic Facades Aldis Purs, 2013-02-15. Estonia, Latvia and Lithuania are often grouped together as the Baltic States, but these three Eastern European countries, tied together historically, are quite different. Although each is struggling to find its place within Europe and fighting to preserve its own identity, the idea of the Baltic States is a facade. In this book, Aldis Purs dispels the myth of a single coherent Baltic identity, presenting a radical new view of the region. Baltic Facades illuminates the uniqueness of these three countries and locates them within the larger context of European history, also revealing the similarities they share with the rest of the continent. He also examines the anxiety the people of Estonia, Latvia and Lithuania feel about their own identities and how others see them. Giving equal weight to developments in politics, economics and social and cultural trends, he places contemporary events in a longer perspective than traditional Cold War inspired views of the region, tracing the countries under Soviet rule after the end of World War II through their declarations of independence in the early 1990s and their admission to the European Union in 2004. Baltic Facades is an enlightening look at these three separate though related Eastern European countries.
