Regional Problems and Policies in Italy and France Kevin Allen, M. C. MacLennan, 2024-11-01 First published in 1970, *Regional Problems and Policies in Italy and France* examines the problem of regional imbalance in two important countries of Western Europe and emphasizes that policies aimed at promoting regional development must form an integral part of national economic policies. The book is divided into three parts: Part I: Regional Problems and Policies in Italy; part II: Regional Problems and Policies in France; and part III: Regional Policy. Three issues: Part I and II analyze how regional policy in France and Italy has moved away from the public assistance type of intervention into new broader approaches which require reorganization of traditional procedures, change in economic structures, introduction of new products and methods of production, movement of workers between areas and occupations and shifts in geographical distribution of population and employment. Part III explores regional planning and growth centres or growth areas in the light of French and Italian experiences. It further analyses the regional effects of the EEC and gives a brief account of how British regional problems and policies would be affected by the membership of the Community. This volume is an essential reading for students of Western European governmental policy and the European Economic Community.
