The books in this set originally published between 1968 and 1992 introduce the reader to the many lines of thought in the literature on economic geography and tie these various aspects together within the concept of the economy As well as providing a comprehensive overview of the Western European economy since the Second World War and including specific studies and assessments of the Dutch and Italian economies these volumes examine the economic factors that have shaped cities and patterns of urbanization

Interdependent Development Harold Brookfield,2012-08-06 Rather than being a book about development per se this work first published in 1975 is instead a book about ideas about development designed for those drawn by a concern over social injustice into the development field In a selective review of theory which gives particular emphasis to the spatial dimension in Western Marxist and neo Marxist thought Harold Brookfield traces the evolution of ideas about world inequality and the problem of development from the days before the underdeveloped countries were considered to be a major problem through the years dominated by economic growth to the more searching approaches of the contemporary era The central argument of the book is that development is a totality which cannot properly be understood by separation into parts The developed and underdeveloped countries constitute one interdependent system and change in one cannot be understood without consideration of the other
