## **Regional Integration And Democracy Expanding On The European Experience:**

**Regional Integration and Democracy** Jeffrey J. Anderson, 1999 This work explores the interrelationship between democracy and regional integration Although centred in Europe the volume shifts terms of discussion on integration and democracy by including case studies outside of Europe It also analyzes the European Union's democratic deficit the impact of regional integration on national democracy and the dynamic interactions between democracy and integration elsewhere in the world

**The European Commission and the Integration of Europe** Liesbet Hooghe, 2001 What kind of European Union do top Commission officials want Should the European Union be supranational or intergovernmental Should it promote market liberalism or regulated capitalism Should the Commission be Europe's government or its civil service This 2002 book examines top officials' preferences on these questions through analysis of unique data from 137 interviews Understanding the forces that shape human preferences is the subject of intense debate Hooghe demonstrates that the Commission has difficulty shaping its employees' preferences in the fluid multi-institutional context of the European Union Top officials' preferences are better explained by experiences outside rather than inside the Commission political party country and prior work leave deeper imprints than directorate general or cabinet Preferences are also influenced more by internalized values than by self-interested career calculation Hooghe's findings are surprising and will challenge a number of common assumptions about the workings and motives of the European Commission

**European Governance and Democracy** Richard Balme, Didier Chabanet, 2008-05-13 Considering the future of European integration this clear and compelling study explores the interplay between collective action and democracy in the European Union and its member states Richard Balme and Didier Chabanet analyze the influence of supranational governance on democratization through a wealth of case studies on a broad range of civil society interests including regional policy unemployment and poverty women's rights migration policy and environmental protection The authors trace the evolving relationship between citizens and European institutions over the past decades especially as public support for deepening and widening integration has waned This trend culminated in a deep institutional crisis precipitated by the rejection of the draft constitutional treaty in France and the Netherlands in 2005 At least two truisms were proven wrong during this tumultuous period that European citizens have little interest in European integration and that citizens have little influence on EU politics However this power shift has left citizens with a deep distrust of integration and EU institutions with limited capacities to cope with issues the public considers priorities primarily unemployment and social inequalities The book shows how Europe-wide interest groups formed and protesters were able to mobilize around key issues of integration The authors convincingly argue that the growth of contentious social movements has also been nourished by the EU policy process itself which leaves more room for interest groups and protest politics than for political parties and representative democracy An essential primer on European democracy this study will be invaluable for scholars and students in European politics and public policy globalization and democracy and comparative

social movements      **Experiencing European Integration** Theresa Kuhn, 2015-01-15 European integration has generated a wide array of economic political and social opportunities beyond the nation state European citizens are free to obtain their academic degree in Germany earn their money in London invest it in Luxembourg and retire to Spain An early theorist of European integration Karl Deutsch expected this development to promote a collective identity and public support for European integration by interacting across borders Europeans would become aware of their shared values and beliefs and eventually acquire a common we feeling *Experiencing European Integration* puts these expectations under scrutiny by developing a comprehensive theoretical model that helps us understand how transnational interactions relate to orientations towards European integration An extensive analysis of survey data covering the 27 EU member states provides a thorough empirical test of transactionalist hypotheses Findings show that individual transnationalism indeed strongly and positively influences EU support but that only a young wealthy and highly educated minority take part in cross border interactions The book further shows that the effectiveness of transnational interactions in generating EU support is contingent on a number of factors such as their purpose and scope Importantly increased transnational interactions result in negative externalities among those who do not become transnationally active themselves By discussing the implications of transnationalism for the theoretical debate and current policy this volume will provide a unique analysis of a key dynamic of European integration

*Governing After Communism* Vesselin Dimitrov, Klaus H. Goetz, Hellmut Wollmann, 2006-04-27 This timely comparative analysis explores the evolution of governance in Central and Eastern Europe The book considers post communist leaders key challenge the development of central government institutions capable of coordinating integrating and steering the policymaking process Building on a broad range of primary sources and extensive field research the distinguished authors analyze the processes and outcomes of institution building in Hungary Poland the Czech Republic and Bulgaria since the late 1980s They examine in detail the organization and inner workings of central executives explain differences in executive trajectories across time and countries by considering the influence of institutional legacies the impact of evolving party systems and the role of crises in spurring institutional change and show the effects of executive institutions on patterns of public policy especially the budgetary process Through a rigorous application of the core executive framework this study offers nuanced conceptual and analytical insights that will enhance understanding of both the evolving institutions of Central and Eastern Europe and the more stable West European systems The in depth analysis of the development of national executive institutions casts a distinctive new light on debates about EU enlargement Europeanization and patterns of governance      *European Union Enlargement* Jurgen Elvert, Wolfram Kaiser, 2004-08-02 *European Union Enlargement* provides a comparative analysis of the post war European policies of those states that joined the European Union between 1973 and 1995 The volume draws upon new empirical research in order to investigate the policies that these newcomer states have had towards Europe since 1945 with an emphasis on their experience of membership and its possible

Europeanising effect A final comparative chapter draws the national European policies of the newcomers together and outlines what they have brought to the EU The book also tests integration theories against the available evidence demonstrating their limited explanatory value and the economic political and cultural specificity of different national paths towards EU integration

**The European Union and Europe's New Regionalism** Boyka M. Stefanova, 2017-10-24 This book presents a new approach to studying the European Union's regional and global relevance It recasts into a dynamic perspective the three most significant systemic processes that define the EU as a regionalist project its enlargement neighborhood and mega regional policies The book argues that these processes collectively demonstrate a dynamic shift of the core tenets of European regionalism from an inward looking process of region building to an open selective system of global interactions

**European Identity in the Context of National Identity** Bettina Westle, Paolo Segatti, 2016 This book provides an unprecedented insight into the multiple ways through which citizens of 16 countries connect their own national identity to European identity

**Federalist Government in Principle and Practice** Donald P. Racheter, Richard E. Wagner, 2012-12-06 Federalism has generally been characterized as a system of government that is friendly to liberty It is not obvious though why this should be so Federalism is a form of government where citizens simultaneously reside in at least two governments each of which has independent authority to tax and to regulate By contrast in a unitary form of government citizens face only one government with independent authority to tax and regulate At first glance it would seem a bit strange to claim that liberty is more secure when citizens are members of two governments with independent authority than when they are members of only one such government The relationship between federalism and liberty turns out to be a complex one and one that is capable of working in either direction Whether federalism supports or erodes liberty depends on importantly on the institutional framework within which federalist governance takes place The essays in *Federalist Government in Principle and Practice* examine this institutionalist theme from both theoretical and practical perspectives

*Europeanization and Regionalization in the EU's Enlargement to Central and Eastern Europe* J. Hughes, G. Sasse, 2004-10-12 This book is a study of EU conditionality and compliance during the enlargement to the Central and Eastern European candidate countries EU conditionality for membership is widely understood as having been a driving force for Europeanization providing incentives and sanctions for compliance or non compliance with EU norms such as the Copenhagen Criteria and the adoption of the *acquis communautaire* By taking regional policy and regionalization as a case study this book provides a comparative analysis of the effects of conditionality on the Central and East European countries and explores the many paradoxes and weaknesses in the use of EU conditionality over time

**Europeanization and the Southern Periphery** Kevin Featherstone, George Kazamias, 2014-05-12 Europeanization is a term increasingly used in the social sciences to describe the impact convergence or response of politicians and institutions in relation to the European Union This volume explores the concept in a variety of different settings in order to clarify its meaning

**Wiring Europe**

Giorgio Natalicchi, 2001 Involving both integration and liberalization the state of telecommunications in Europe has undergone radical change in the past few years Natalicchi political science U of Florence Italy examines the external and internal forces of change originating from international national and European Union levels He argues that the EU is a polycentric and multilayered polity and that multiple mechanisms determine integrative steps and policy outcomes

Almeida, Nancy Bermeo, Antonio Costa Pinto, 2004-08-02 This collection is a comprehensive empirical account of the composition and patterns of recruitment of ministerial elites in Southern Europe throughout the last 150 years thus encompassing different historical circumstances and political settings

**The European Puzzle** Marion Demossier, 2007

The twin concepts of Culture and Identity are inescapable in any discussion of European Integration and yet over the last ten years their meaning has become increasingly contested By combining an anthropological and political perspective the authors challenge the traditional boundaries within the issue of the construction of Europe In the first part historians and anthropologists from various national traditions discuss the process of the construction of Europe and its implications for cultural identities The second section examines a number of topics at the core of the process of Europeanization and presents up to date information on each of these issues political parties regions football cities the Euro ethnicity heritage and European cinema Emphasis is placed on the political structuring of cultural identities by contrasting top down and bottom up processes that define the tensions between the unity and diversity of the European Community **The Rise of**

**Regionalism** Rune Dahl Fitjar, 2009-09-10 This book examines why regional identities are stronger in some regions than in others and discusses the underlying causes of the mobilization of sub state regions in Western Europe over the past fifty years Comparing Strategies of (De)Politicisation in Europe Jim Buller, Pınar E. Dönmez, Adam Standring, Matthew

Wood, 2018-07-03 This book investigates the extent to which depoliticisation strategies used to disguise the political character of decision making have become the established mode of governance within societies Increasingly commentators suggest that the dominance of depoliticisation is leading to a crisis of representative democracy or even the end of politics but is this really true This book examines the circumstances under which depoliticisation techniques can be challenged whether such resistance is successful and how we might understand this process It addresses these questions by adopting a novel comparative and interdisciplinary perspective Scholars from a range of European countries scrutinise the contingent nature of depoliticisation through a collection of case studies including economic policy transport the environment housing urban politics and government corruption The book will be appeal to academics and students across the fields of politics sociology urban geography philosophy and public policy **Community, Scale, and Regional Governance** Liesbet

Hooghe, Gary Marks, 2016-08-18 This is the second of five ambitious volumes theorizing the structure of governance above and below the central state This book is written for those interested in the character causes and consequences of governance

within the state The book argues that jurisdictional design is shaped by the functional pressures that arise from the logic of scale in providing public goods and by the preferences that people have regarding self government The first has to do with the character of the public goods provided by government their scale economies externalities and informational asymmetries The second has to do with how people conceive and construct the groups to which they feel themselves belonging In this book the authors demonstrate that scale and community are principles that can help explain some basic features of governance including the growth of multiple tiers over the past six decades how jurisdictions are designed why governance within the state has become differentiated and the extent to which regions exert authority The authors propose a postfunctionalist theory which rejects the notion that form follows function and argue that whilst functional pressures are enduring one must engage human passions regarding self rule to explain variation in the structures of rule over time and around the world Transformations in Governance is a major new academic book series from Oxford University Press It is designed to accommodate the impressive growth of research in comparative politics international relations public policy federalism environmental and urban studies concerned with the dispersion of authority from central states up to supranational institutions down to subnational governments and side ways to public private networks It brings together work that significantly advances our understanding of the organization causes and consequences of multilevel and complex governance The series is selective containing annually a small number of books of exceptionally high quality by leading and emerging scholars The series targets mainly single authored or co authored work but it is pluralistic in terms of disciplinary specialization research design method and geographical scope Case studies as well as comparative studies historical as well as contemporary studies and studies with a national regional or international focus are all central to its aims Authors use qualitative quantitative formal modeling or mixed methods A trade mark of the books is that they combine scholarly rigour with readable prose and an attractive production style The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina Chapel Hill and the VU Amsterdam and Walter Mattli of the University of Oxford

**Democratic Dilemmas of Multilevel Governance** J. DeBardleben,A. Hurrelmann,2007-09-27 Focusing on the EU this volume with a combination of theoretical perspectives and empirical research examines the problems multilevel governance causes for democratic legitimacy by placing it in a comparative and theoretical context and explore how challenges faced by the EU compare with those faced by traditional federal systems worldwide **The Euro** Amy Verdun,2002 With euro banknotes and coins starting to circulate as of January 2002 this timely book comes at a crucial juncture for the European Union Exploring the origins of and progress toward the introduction of the euro the contributors focus on the importance of economic and monetary union EMU as part of the larger process of European integration Thus chapters consider the value and limits of a range of theoretical approaches for understanding economic and monetary integration the pros and cons of EMU s institutional design and country specific experiences With an international group of leading scholars representing a

range of disciplines this book offers a broad perspective on the dynamics of EMU      *The Structure of Political Competition in Western Europe* Zsolt Enyedi, Kevin Deegan-Krause, 2013-09-13 Is European party politics hovering above society Why do voters pick one party over others Is it a question of class Of religion Of attitudes about taxes or immigration or global warming Or is it something else entirely The Structure of Political Competition in Western Europe takes a detailed look at the ways in which Western Europe s party systems are anchored in social and ideological structures The book s first section focuses on the role of social structures particularly education class and religion and analyzes the complex interplay among these factors The second section addresses the ways that the sociological structures such as class and religion interact with voters values The third section examines the way that these structures and values shape the space of political competition among parties The conclusion integrates the findings of the empirical articles putting them into broader comparative perspective discussing whether relatively predictable structures have been overwhelmed by media driven spectacles political personalities and focus on short term economic performance This volume will appeal to scholars and graduate students in Europe and those from North America Asia and other regions who study European politics political parties cleavages and political behaviour This book was published as a special issue of West European Politics
