### **Summary**

Regional integration theory seeks to explain the establishment and development of regional international organizations. Key questions are why and under which conditions states decide to transfer political authority to regional organizations, how regional organizations expand their tasks, competencies, and members, and what impact they have on states and societies in their regions. Whereas regional integration theory started with a broad comparative regional and organizational scope in the 1950s and 1960s, it has since focused on European integration and the European Union.

The main (families of) theories explaining the development of European integration – rather than decision-making and policy-making in the EU – are intergovernmentalism, neofunctionalism and postfunctionalism. The key debates in regional integration theory have taken place between variants of intergovernmentalist and neofunctionalist integration theory. Intergovernmentalism assumes national governments to be the key actors in regional integration. Governments use regional integration to maximize their national security and economic interests in the context of regional interdependence. Integration outcomes result from intergovernmental bargaining and reflect the regional preference and power

**Regional Integration** Leon N. Lindberg, Stuart A. Scheingold, 1970      **Regional Integration**, 1970      **Comparative Regional Integration** Finn Laursen, 2016-12-05 This volume features up to date studies of regional integration efforts in all major parts of the world especially North America South America and East Asia Comparisons are drawn between these efforts and those made in the EU where integration has progressed much further The book asks what explains the variation in achievements What kind of agreements and institutions are needed to produce regional integration Is pooling and delegation of sovereignty necessary to overcome collective action problems How important is regional leadership This work is a major new contribution to the literature on regional integration and will appeal to theorists policymakers students and other readers concerned about world developments It will also be of value to courses covering international political economy international relations and regional integration at both undergraduate and graduate level      **The Obsolescence of Regional Integration Theory** Ernst B. Haas, 1975      A Theory of International Organization Liesbet Hooghe, Tobias Lenz, Gary Marks, 2019-08-29 Why do international organizations IOs look so different yet so similar The possibilities are diverse Some international organizations have just a few member states while others span the globe Some are targeted at a specific problem while others have policy portfolios as broad as national states Some are run almost entirely by their member states while others have independent courts secretariats and parliaments Variation among international organizations appears as wide as that among states This book explains the design and development of international organization in the postwar period It theorizes that the basic set up of an IO responds to two forces the functional impetus to tackle problems that spill beyond national borders and a desire for self rule that can dampen cooperation where transnational community is thin The book reveals both the causal power of functionalist pressures and the extent to which nationalism constrains the willingness of member states to engage in incomplete contracting The implications of postfunctionalist theory for an IO s membership policy portfolio contractual specificity and authoritative competences are tested using annual data for 76 IOs for 1950 2010 Transformations in Governance is a major academic book series from Oxford University Press It is designed to accommodate the impressive growth of research in comparative politics international relations public policy federalism environmental and urban studies concerned with the dispersion of authority from central states up to supranational institutions down to subnational governments and side ways to public private networks It brings together work that significantly advances our understanding of the organization causes and consequences of multilevel and complex governance The series is selective containing annually a small number of books of exceptionally high quality by leading and emerging scholars The series targets mainly single authored or co authored work but it is pluralistic in terms of disciplinary specialization research design method and geographical scope Case studies as well as comparative studies historical as well as contemporary studies and studies with a national regional or international focus are all central to its aims Authors use

qualitative quantitative formal modeling or mixed methods A trade mark of the books is that they combine scholarly rigour with readable prose and an attractive production style The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina Chapel Hill and the VU Amsterdam and Walter Mattli of the University of Oxford *Regional Integration in East Asia* Amaleia E. Kolovos, 2010 Regional integration is not a new phenomenon but has become an increasingly important topic of political research with the continued expansion of the European Union as well as an increased number of regional organizations around the globe This paper will seek to use both Europe and East Asia as illustrations in order to better comprehend the driving forces behind integration as well as why some regions are further integrated than others The purpose of this research is to achieve a better understanding of what causes regional integration in hopes of developing a more inclusive theory More specifically it aims to see how integrated the region of East Asia is in particular when compared to Europe Through comparing the two regions and analyzing factors in both Europe and East Asia as determined by current integration theory this research aims to achieve a better understanding of the driving forces behind regional integration as an international phenomenon My research is an attempt to tie together the multiple existing theories of regional integration with the goal of creating a more cohesive and measurable theory With an increased understanding of regional integration we will be better able to both explain and predict integration in both Europe and East Asia as well as other less integrated regions around the world The Ashgate Research Companion to Regionalisms J. Andrew Grant, 2016-03-23 EU studies increasingly recognize the salience of new regional insights Hence this collection of original essays provides a broad overview of regionalism together with detailed analyses on the construction activities and implications of both established and emerging examples of formal political and economic organizations as well as informal regional entities and networks Aimed at scholars and students interested in the continuing growth of regionalism The Ashgate Research Companion to Regionalisms is a key resource to understanding the major debates in the field Organized into three main sections this volume deals with a wide range of issues covering the following important research areas Section one covers theoretical and methodological approaches to the study of established and formal regionalism emerging and informal regionalism inter regionalism and levels of regionalism Section two provides detailed case studies of established and formal regionalisms EU NAFTA ASEAN SAARC OAS MERCOSUR AU ECOWAS and SADC Section three offers case studies that investigate emerging and informal regionalisms in Oceania the Arab League BRICSAM and the Commonwealth s as well as thought provoking chapters on micro regional processes evident in spatial development initiatives transnational gangs transfrontier conservation areas and the migration conflict nexus in natural resource sectors With the study of regionalism becoming an increasingly important part of politics international relations development and global studies courses this comprehensive volume is a valuable addition for classroom use **Multinational Cooperation for Development in West Africa** John P. Renninger, 2013-09-03 Multinational Cooperation for Development in West Africa

discusses the obstacles and prospects of organizations that were formed to facilitate considerable cooperation in the developing countries of West Africa. The book describes and analyzes the cooperation movement and the United Nations system and role in fostering the process of cooperation in West Africa. A brief overview of West African characteristics, trends and analysis of development history of the cooperation movement, issues regarding cooperation in West Africa, potentialities of the Economic Community of West African States (ECOWAS) and the impact of the United Nations on the growth of cooperation in the subregion are elucidated in the text. Students of international studies, researchers, economists, sociologists, political leaders of the West African region and the staff of United Nations agencies will find this book invaluable.

*Positivist and Political-Economic Theories of International Relations* Amartya Mukhopadhyay, 2023-10-20. This book provides an introduction to positivist pluralist theories of international relations (IR) which emerged during the early and mid 1950s along with Marxist political economic and non Marxist economic theories of IR. *Positivist and Political Economic Theories of International Relations* is an in depth critical study of texts and literature which highlight IR's methodological pluralism even after it gained maturity. It examines how pluralist political status quo and radical economic criticism coexist in discrete areas of the discipline. Insights are provided into key positivist liberal pluralist theories namely decision making approaches and theories of integration, regionalism, interdependence and regime. It discusses the four political economic and critical theories of Marxism: dependency, world systems and international political economy. The book as an advanced supplementary reader will be of great interest to researchers and students of international relations, history, law and the multidisciplinary social scientific field of political economy.

**Research Methods in European Union Studies** K. Lynggaard, I. Manners, K. Löfgren, 2016-01-08. This collection sets a new agenda for conducting research on the EU and learns from past mistakes. In doing so, it provides a state of the art examination of social science research designs in EU studies while providing innovative guidelines for the advancement of more inclusive and empirically sensitive research designs in EU studies.

Regional Governance and Policy-Making in South America Anne Marie Hoffmann, 2018-10-09. This book analyzes Latin American regional integration with a novel conceptual approach grounded in extensive field research. Using the UNASUR (Unión de Naciones Suramericanas) as a case study, the author investigates the process of policy making in regional public policy fields in South America. The project focuses on intergovernmental structures of regional organizations as an institutional framework for a variety of independent processes in regions. It also challenges the perspective of democratic states as unitary actors and seeks to analyze the factors which favor or obstruct regional processes in different policy fields. This work will appeal to researchers, graduate students and anyone interested in Latin American politics and policy making.

**The Theory of Multi-level Governance** Simona Piattoni, 2010-02-25. This book explores the theoretical issues, empirical evidence and normative debates elicited by the concept of multi level governance (MLG). The concept is a useful descriptor of decision making processes that involve the simultaneous mobilization of public authorities at different jurisdictional levels as

well as that of non governmental organizations and social movements It has become increasingly relevant with the weakening of territorial state power and effectiveness and the increase in international interdependencies which serve to undermine conventional governmental processes This book moves towards the construction of a theory of multi level governance by defining the analytical contours of this concept identifying the processes that can uniquely be denoted by it and discussing the normative issues that are raised by its diffusion particularly in the European Union It is divided into three parts each meeting a specific challenge theoretical empirical normative It focuses on three analytical dimensions multi level governance as political mobilization politics as authoritative decision making policy and as state restructuring polity Three policy areas are investigated in vindicating the usefulness of MLG as a theoretical and empirical concept cohesion environment higher education with particular reference to two member states the UK and Germany Finally both the input and output legitimacy of multi level governance decisions and arrangements and its contribution to EU democracy are discussed As a loosely coupled policy making arrangement MLG is sufficiently structured to secure coordination among public and private actors at different jurisdictional levels yet sufficiently flexible to avoid joint decision traps This balance is obtained at the cost of increasingly blurred boundaries between public and private actors and a change in the established hierarchies between territorial jurisdictions

**Regionalisation and Global Governance** Andrew F. Cooper, Christopher W. Hughes, Philippe De Lombaerde, 2007-12-21 This book explores the relationship between regionalization and global governance surveying the theoretical debates economic dimensions security considerations and governing structures

**International Relations in Contemporary Africa** Michael O. Anda, 2000 Although developing countries far outnumber fully industrialized states they are often neglected in the study of international relations especially with respect to the development of foreign policy theory International Relations in Contemporary Africa attempts to fill this void in the literature on comparative international relations while at the same time providing a detailed analysis of the economic development and integration of West African countries Michael Anda specifically focuses on the members of the Economic Community of West African States ECOWAS and their policies which encourage coordination on issues ranging from science and technology to diplomacy and mutual defense Tracing the diplomatic history of West Africa from independence to the present he assesses the various dimensions of cooperation among the smaller and less developed states of West Africa while revealing the precarious nature of the economy and security in the region Both detailed and comprehensive International Relations in Contemporary Africa represents a significant contribution to African studies that appeal to those with an interest in the foreign policy of smaller states

**Theory and Structure in International Political Economy** Charles Lipson, Benjamin J. Cohen, 1999 The first of two anthologies on international political economy drawn from articles published in the journal International Organization

**The Impact of Expansion on European Union Institutions** E. Heidbreder, 2011-04-11 How does policy making trigger the institutionalization of steering capacities This book investigates this question by tackling

why the European Commission expanded competences that were intentionally limited to the specific pre accession context prior the 2004 07 EU enlargement      *New Regionalism and the European Union* Alex Warleigh-Lack, Nick Robinson, Ben Rosamond, 2011-06 The debates on regionalism have been polarized between European Union EU scholars and non EU scholars with the assumption being that regionalism within the EU and other regions of the world are quite distinct with little to be learnt from dialogue with each other This book challenges such assumptions and calls for a genuine debate between scholars of regionalism This book demonstrates that more can and needs to be learned about regional integration all over the world through comparison and reflection on specific regional trends Beginning with a theoretically driven introduction leading experts in the field are brought together to offer a series of case studies on regional integration within Latin America Africa Asia North America and Europe In Part III the authors investigate the links between the EU and selected other regional organisations and processes exploring the dynamics through which these interregional relations are developing and the implications they have for the study of contemporary regionalism regionalisation both inside and beyond the continent of Europe The conclusions set out a challenging research agenda for comparative studies in the field Addressing one of the under explored aspects of EU studies the EU s coexistence with other pan continental regional organisations in the European continent this book will be of interest to students and scholars of regionalism IPE European Studies and international politics

**Politics of Last Resort** Jonathan White, 2020 The book examines how a certain way of governing invoking exceptional measures for exceptional times has become central to the workings of the European Union      Scientists and World Order Ernst B.
