## **Regions In Recession And Resurgence:**

**Regions in Recession and Resurgence** Michael Chisholm, 2015-03-27 The world economy has undergone rapid evolution in recent decades along with changes in the importance of industries and their organization and sharp changes in the fortunes of regions There are differences of opinion regarding the mainsprings of change and development and the role of governments in fostering national output In order to show the relevance of these changes to regional economies the book focuses on the different schools of economic thought from the neo classical through Keynesian to Marxist radical ideas and monetarist supply side thinking providing a brief description of their structure in non spatial terms The way these theories map into contrasting ideas regarding the mechanisms of regional economic growth is then explained The book concentrates on developed economies and explicitly seeks to confront theory with fact fact with theory Bringing together non spatial economic theory regional growth theory and relevant empirical data this book is intended for students in geography and regional economics but will also be of interest for those studying politics and government

Rodriguez-Pose, 1998-11-19 In a period of deep economic social and political transformation regional disparities seem to be particularly resistant to change The emergence of a global economy the shift in production methods and the greater mobility of capital labour and raw materials have not brought about a radical reshuffling of the prevailing regional disparities There is a greater concentration of economic activity in core areas and very few peripheral regions are taking advantage of the process of global restructuring The Dynamics of Regional Growth in Europe looks for the reasons behind this persistence in the social political and institutional arrangements of a large set of European regions by trying to relate two scientific approaches concerned with regional economic performance which share very little in common the literature on socio economic restructuring and structural change and neoclassical and endogenous growth theories OXFORD GEOGRAPHICAL AND ENVIRONMENTAL STUDIES AIMS TO PUBLISH THE BEST ORIGINAL RESEARCH STUDIES IN THE RELATED FIELDS OF GEOGRAPHY AND ENVIRONMENTAL STUDIES IT S SCOPE IS INTERNATIONAL PRESENTING A BROAD AND DIVERSE RANGE OF SCHOLARLY APPROACHES FROM ACROSS THE WORLD SERIES EDITORS GORDON CLARK

Khalema,2025-02-21 South Africa s struggle in balancing its domestic needs while playing a dynamic developmental role in the African region and global context exposes a complex web of relations shaped by its geostrategic location on the continent and the world and the staggering legacies of colonialism and apartheid As such understanding the complexities of the global economy and of South Africa s place in it is of great importance This book builds upon an existing body of literature which has demonstrated that while the post apartheid South African state has recast its nation building goals with advances having

been made notably in the area of a stellar post apartheid constitution policy directives and democratic political integration economic integration and policy implementation presents a projection of captured interests where big business concerns are entrenched in the post apartheid state s apparent neo liberal turn The main focus of the book is to contextualise issues relating to three main trends in global discourses on development which are significant for South Africa and indeed for the study of the political economy of regional development in the country from the prism of South Africa as a global capitalist state These trends include the impact of globalisation regionalisation and the marginalisation of South Africa and indeed the African continent in the global economy thus unpacking the possible role that South Africa might play in regional development This volume will be a valuable resource to academics researchers and students in the fields of regional studies economics and political theory as well as policymakers planners and local economic development practitioners
