The Political Economy of Public Finance Marc Buggeln, Martin Daunton, Alexander Nützenadel, 2017-02-23 This volume examines the major trends in public finance in developed capitalist countries since the oil crisis of 1973 That year's oil shock quickly became an economic crisis putting an end to a period of very high growth rates and an era of easy finance Tax protests and growing welfare costs often led to rising debt levels The change to floating exchange rates put more power in the hand of markets which corresponded with a growing influence of neo liberal thinking These developments placed state finances under considerable pressure and leading scholars here examine how the wealthiest OECD countries responded to these challenges and the consequences for the distribution of wealth between the rich and the poor As the case studies here make clear there was no simple race to the bottom in taxation and welfare spending different countries opted for different solutions that reflected their political and economic structures

Beyond Varieties of Capitalism Bob Hancké, Martin Rhodes, Mark Thatcher, 2007-05-17 Since the early 1990s Europe's economies have been facing several new challenges the single market programme the collapse of the Berlin wall and eastward enlargement and monetary unification Building on the influential Varieties of Capitalism VoC perspective first elaborated in detail in the book Varieties of Capitalism OUP 2001 this book critically analyzes these developments in the European political economy and their effects on the continental European economies Leading political economists from Europe and the US debate how VoC can help understand the political economic challenges that Europe is facing today and how understanding these new challenges can in turn enrich and enhance the VoC perspective Thematically the contributions to this volume are organised in four sections how the macro economics of EMU have influenced different European models of capitalism how the Single Market programme was received in the different institutional regimes in European capitalism how welfare and labour market reforms are debated and implemented how European capitalism travelled east after 1989 Preceding this is a spirited defence of the VoC approach by Peter Hall and an introduction from the volume editors considering the approach and proposing extensions and amendments This book demonstrates that the VoC approach remains as the editors put it in their introduction a rich seam to mine capable of accommodating new developments and theoretically flexible enough to produce new and innovative hypotheses and arguments

Ruling Ideas Cornel Ban, 2016-06-16 Neoliberal economic theories are powerful because their domestic translators make them go local hybridizing global scripts with local ideas This does not mean that all local translations shape policy however External constraints and translators access to cohesive policy institutions filter what kind of neoliberal hybrids become policy reality By comparing the moderate neoliberalism that prevails in Spain with the more radical one that shapes policy thinking in Romania Ruling Ideas explains why neoliberal hybrids take the forms that they do and how they survive crises Cornel Ban contributes to the literature by showing that these different varieties of neoliberalism depend on what competing ideas are available locally on the networks of actors who serve as the local advocates of neoliberalism and on their vulnerability to external coercion Ruling Ideas covers an extended historical period starting with the Franco period in Spain and the Ceausescu period in Romania discusses the economic integration of these countries into the EU and continues through Europe's Great Recession and the European debt crisis The broad historical coverage enables a careful analysis of how neoliberalism rules in times of stability and crisis and under different political systems

The Spanish Financial System José Luis Malo de Molina, P. Martín-Aceña, 2011-11-28 The

book analyses the Spanish financial system from the turn of the last century to the present day and the economic social and political backdrop to this history The result is a consummate survey of historical developments leading right up to today s key issues and challenges and to what the future may hold **Global Capital and National Governments** Layna

Mosley,2003-02-03 *Global Capital and National Governments* suggests that international financial integration does not mean the end of social democratic welfare policies Capital market openness allows participants to react swiftly and severely to government policy but in the developed world capital market participants consider only a few government policies when making decisions Governments that conform to capital market pressures in macroeconomic areas remain relatively unconstrained in supply side and micro economic policy areas Therefore despite financial globalization cross national policy divergence among advanced democracies remains likely Still in the developing world the influence of financial markets on government policy autonomy is more pronounced The risk of default renders market participants willing to consider a range of government policies in investment decisions This inference however must be tempered with awareness that governments retain choice As evidence for its conclusions *Global Capital and National Governments* draws on interviews with fund managers quantitative analyses and archival investment banking materials *Shifting States in Global Markets* Alfred P. Montero,2010-11-01 *Shifting States in Global Markets* contributes to the debates over the political economy of globalization by focusing attention on the increasingly important role of subnational governments in implementing economic policies Challenging the view that the effects of decentralization are positive or negative uniformly and can be explained by reference to the influence of national political institutions Alfred Montero uses his comparisons of industrial policy in Brazil and Spain and between different regions in these countries to argue that we need to pay attention to political conditions at the subnational level to account for the variation in economic success between regions Two crucial conditions are emphasized in Montero s analysis how much competition there is among political elites within any region and how much competition there is between regions for scarce fiscal resources Lower competition among elites leads to subnational governments delegating more autonomy to public agencies to develop ties with private businesses favoring allocative efficiency and innovation higher competition between regions provides incentives for political leaders to support involvement in economic development efforts by a greater variety of public agencies whose cooperation and mutual trust over time create the conditions for long term success in these efforts This analysis gives us a much more nuanced understanding of how countries are experiencing the challenges of globalization today *Contracting States* Alexander Cooley,Hendrik Spruyt,2009-05-10 From the middle of the 20th century the cessation of sovereignty either partial or complete has become a commonplace of international relations This volume examines how states divide transfer sovereignty functions in particular how incomplete contracts have come to assume a central role in the process *The Political Economy of the East Asian Crisis and Its Aftermath* Arvid John Lukauskas,Francisco L. Rivera-Batiz,2001 The collection begins with a comparative and historical analysis of the crisis

placing it in the context of other financial and debt crises This is followed by a discussion of the domestic political and economic factors behind the events delineating the differences and similarities among affected countries The contributors also examine how global political forces influenced the unfolding crisis in various countries Using the latest data top experts present the current economic situation in East Asia the contagion effects in the rest of the world and the role played by international institutions such as the IMF Constitutional Democracy Walter F.
