Rehabilitating Criminal Sexual Psychopaths Nathaniel J. Pallone, 2017 More than half the states in this country have legislation on sex offenders that distinguishes between those whose offense is incidental to other offenses felony sexual offenders and those who engage in repetitive habitual or compulsive sex offenses criminal sexual psychopaths This second category is the subject of this book The legislation specifies that criminal sexual psychopaths must be treated not punished But treatment is problematic the literature on various approaches finds uncertainty about the effectiveness of treatment Pallone asks the difficult question of whether there is a prospective right to effective treatment and notes the political and ethical questions involved in potentially more effective Clockwork Orange approaches The ethical burden on mental health clinicians is heavy despite the fact that the category sexual psychopath is essentially a legal not a psychiatric category judges tend to follow professional recommendations as to categorization Pallone emerges with some surprising but convincing conclusions If the distinction between felony and psychopathic sexual offender is essentially empty as the profession feels it is it should be abandoned All criminal sexual offenders should be punished except those who opt for treatment and who are certified by mental health professionals as likely to benefit And for those few so identified society should be prepared to commit significant resources to their treatment This speculation on the past

present and future of criminal sexual deviation comes from a psychologist with a broad command of the literature and deep professional experience in the area. Combining a broad ranging overview of the legal criminological and psychiatric literature on these questions, *Rehabilitating Criminal Sexual Psychopaths* raises important questions. Legal experts, criminologists, mental health professionals and all those concerned with public policy will find it significant. Provided by publisher

Tinder-Box Criminal Aggression Nathaniel J. Pallone, James J. Hennessy, 1996-01-01 The authors refine, amplify and extend the conceptual model for understanding tinder box criminal aggression they first introduced in *Criminal Behavior*. This work integrates relative contributions made by such intrapersonal characteristics as the need for serial stimulation, impairment in foresight and planfulness and the acquisition of a taste for risk on the one hand with such factors as child rearing practices, vicarious conditioning, sub cultures of violence and the availability of mood altering chemical substances on the other hand.

Sourcebook of Rehabilitation and Mental Health Practice David P. Moxley, John R. Finch, 2006-04-11 We live in a day and age in which many fields come together to define new ones and out of these newly defined areas come innovative practices and emergent ways of thinking. The *Sourcebook on Rehabilitation and Mental Health Practice* documents one of these new fields, one formed by the coalescence of rehabilitative and mental health services and employment. Only recently have human service practitioners, policy makers and administrators recognized that there is a growing synergy among these areas, once separated by great gulfs of differences in culture, perspectives and values and technologies. It is not happenstance that rehabilitation, mental health and employment are becoming increasingly integrated in contemporary human services. There is considerable interest in work in contemporary society, although different values and perspectives mediate this interest. For people with disabilities, an interest in work often comes from deep frustration from not having ready access to work and from not having enough of it to facilitate an acceptable quality of life or independent living. Some people find work to be a source of problems that negatively affects their functioning. They find the workplace stressful and unsupportive or they feel that work exacts too much from them, reducing their quality of life and setting into motion numerous negative personal effects. Beck 2000

Criminal Behavior James Hennessy, 2018-02-06 Crime statistics suggest that Americans are not a notably law abiding people. With some 13 million felonies reported every year, it is not surprising that few topics engage public attention and imagination more compellingly than the dynamics of criminal behavior. Volume and ubiquity alone might suggest the psychology of criminal behavior is well understood and there exists an integrated body of explanatory theory and empirical evidence. But in fact, only fragmentary and incomplete accounts have thus far appeared. *Criminal Behavior* is virtually unique in providing a comprehensive psychological paradigm that fits across variant species of crime while meeting the requirements of science and the needs of law enforcement and administration of justice in controlling criminal behavior. The authors begin this remarkable text by outlining a model for criminal behavior based not on abnormal psychology but on the tenets of social learning theory. They illuminate the processes by which criminal activity is

initiated and repeated including personal constructs stimulus determinants and behavioral repertoires They define four process elements that interact in precipitating criminal behavior inclination opportunity expectation of reward expectation of impunity They show how these process elements are regulated and confined by a series of complex and variable boundary conditions in specific criminal offenses Conceptual methodological and operational constraints on the study of criminal behavior are defined and statistically and behavioral science data bearing upon larceny and homicide two crimes at diametric extremes are examined in detail Pallone and Hennessy locate and define those psychological variables that render comprehensible the process whereby formally criminal acts are construed as possible and desirable by individual actors and show how those actors self select psychosocial environments that facilitate or at least do not impede the commission of crime They identify and explain the phenomenon of tinderbox violence Its comprehensive perspective and balanced consideration of competing viewpoints make Criminal Behavior an ideal text for students and teachers of criminology and of the psychology of criminal behavior It is also a pioneering work for psychologists sociologists criminologists and law enforcement official

Assessment of Sexual Offenders Against Children Vernon L. Quinsey, Martin L. Lalumiere, American Professional Society on the Abuse of Children, 2001-06-21 Written for mental health professionals this indispensable guide reviews the range of relevant literature covering issues in assessing child molesters Fully updated this volume directs the professional to the most current knowledge available on the subject in a compact accessible form Readers will learn from this resource which characteristics do and do not distinguish child molesters which situational factors are related to molestation which instruments are used in the assessment of child molesters how assessment information is used to appraise risk and guide treatment and all of the elements of a useful assessment report **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), 1991 **Mental Disorder Among Prisoners** Nathaniel Pallone, 2017-07-12 What do we know about the mental health of inmates What are the implications of what we know Nathaniel J Pallone characterizes opinion on these questions as falling into two broad camps the tender hearted those who see an overlap between mental illness and criminal behavior and are treatment oriented and the tough minded those who have little confidence in psychiatric categories do not really accept arguments about diminished responsibility and who feel the emphasis should be on punishment Which is closer to the truth When this book was first published the incidence of mental disorder among prisoners was nearly four times greater than among comparable groups in the general population in part because prisoners are disproportionately drawn from demographic groups with a high incidence of mental disorder nonwhite and from lower socioeconomic strata But other data is equally dismaying mental retardation is 50 percent higher alcohol and drug abuse is between five and eight times greater and neurogenic disorders may be 1 700 times greater In all categories of mental illness the incidence among prisoners is far higher than among the general population Pallone asserts that evidence suggests that the design and implementation of mental health care needs serious reevaluation particularly in view of Supreme Court decisions mandating mental health care despite obstacles with implementation Pallone saw mental health care as the primary

issue for those who manage prisons Sadly this remains as true as when this book was first published
