Blundetto,2012-12-01 Reiki is a Japanese healing technique that is used for relaxation reduction of stress and healing Its foundation is in the belief that there is an unseen energy flowing in living organisms This energy is generally called ki or life force energy and it is everywhere and the mind has the ability to harness it Rei means universal or present in all places Reiki basically operates by breaking up negative energy and restoring it with healing and positive energy that is passed through the hands of the teacher or practitioner whose hands become hot during the treatment process The Reiki technique is easy to learn even though it is not taught in the usual way and the student is taught by the Reiki Master as to how use the method There is no special intellectual capacity or specific state of spiritual development that is needed to learn and to perform Reiki healing and this therefore renders it available to persons of various ages and backgrounds all over the world It is deemed to be a kind of alternative treatment that has the basic task of positively healing individuals through the transfer of energy The basic tenet of Reiki healing is that we all have an energy life force which flows up and down through our bodies and this energy life force can be used by Reiki practitioners and by self after you have learnt how to utilize Reiki to heal yourself as well as others
