Simpson,2019-11-01 In 2008 the University of Pittsburgh Medical Centers UPMC hoisted its logo atop the U S Steel Building in downtown Pittsburgh symbolically declaring that the era of big steel had been replaced by the era of big medicine for this once industrial city More than 1 200 miles to the south a similar sense of optimism pervaded the public discourse around the relationship between health care and the future of Houston s economy While traditional Texas industries like oil and natural gas still played a critical role the presence of the massive Texas Medical Center billed as the largest medical complex in the world had helped to rebrand the city as a site for biomedical innovation and ensured its stability during the financial crisis of the mid 2000s Taking Pittsburgh and Houston as case studies The Medical Metropolis offers the first comparative historical account of how big medicine transformed American cities in the postindustrial era Andrew T Simpson explores how the hospital civic relationship in which medical centers embraced a business oriented model remade the deindustrialized city into the medical metropolis From the 1940s to the present the changing business of American health care reshaped American cities into sites for cutting edge biomedical and clinical research medical education and innovative health business practices This transformation relied on local policy and economic decisions as well as broad and homogenizing national forces including HMOs biotechnology programs and hospital privatization Today the medical metropolis is considered by some as a triumph of innovation and revitalization and by others as a symbol of the excesses of capitalism and the inequality still pervading American society *Injustice* Danny Dorling,2015-06-03 In the five years since the first edition of *Injustice* there have been devastating increases in poverty hunger and destitution in the UK Globally the richest 1% have never held a greater share of world wealth while the share of most of the other 99% has fallen in the last five years with more and more people in debt especially the young Economic inequalities will persist and continue to grow for as long as we tolerate the injustices which underpin them This fully rewritten and updated edition revisits Dorling s claim that Beveridge s five social evils are being replaced by five new tenets of injustice elitism is efficient exclusion is necessary prejudice is natural greed is

good and despair is inevitable By showing these beliefs are unfounded Dorling offers hope of a more equal society We are living in the most remarkable and dangerous times With every year that passes it is more evident that Injustice is essential reading for anyone concerned with social justice and wants to do something about it The Innovation Illusion Fredrik Erixon,Björn Weigel,2016-10-11 Timely compelling and certain to be controversial a deeply researched study that reveals how companies and policy makers are hindering innovation led growth Conventional wisdom holds that Western economies are on the threshold of fast and furious technological development Fredrik Erixon and Bjorn Weigel refute this idea bringing together a vast array of data and case studies to tell a very different story With expertise spanning academia and the business world Erixon and Weigel illustrate how innovation is being hampered by existing government regulations and corporate practices Capitalism they argue has lost its mojo Assessing the experiences of global companies including Nokia Uber IBM and Apple the authors explore three key themes declining economic dynamism in Western economies growing corporate reluctance to contest markets and innovate and excessive regulation limiting the diffusion of innovation At a time of low growth high unemployment and increasing income inequality innovation led growth is more necessary than ever This book unequivocally details the obstacles hindering our future prosperity *A Good Place to Do Business* Roger Biles,Mark H. Rose,2022-10-28 This book looks at the politics of downtown business promotion as an urban renewal strategy from the end of World War II to the present with a focus on five case cities Philadelphia Chicago Detroit St Louis and Cleveland
