Toilet Adoption in Rural India Saswata Biswas, Indranil De, Gyan Mudra, Deepa Gupta, 2024-03-28 This book examines sanitation and toilet access across rural India focusing on psychological socio cultural infrastructural and normative barriers to the initiative of Swachh Bharat Mission SBM While sketching the evolution of sanitation policies in India it assesses their impact on sanitation behaviour It also studies the implications of variations in caste religion and geography on toilet usage across Indian states By analysing data from various states and intensive micro level studies of

three states i.e. rural Bihar, Gujarat and Telangana. This volume suggests that socio-cultural factors are as significant as economic factors in shaping sanitation behaviour. Argues that the concepts of cleanliness and pollution are often determined by the social-cultural context rooted in historical events that have shaped traditional beliefs and ideas about space. Explores gendered perspectives on the usage of and access to toilets. Highlights the limited effectiveness of Information Education and Communication (IEC) programs in encouraging toilet adoption and emphasizes the need for information dissemination at the ground level. Gives recommendations for enhancing the adoption of toilets in rural India, including provision for more than one toilet per household, uninterrupted access to water and behavioural change to combat open defecation. This book will be useful to students studying sociology, psychology, social work and development studies. It will also be an invaluable companion to NGOs, social workers and activists actively involved in water sanitation and hygiene. Moreover, this book holds immense value as a pivotal resource and point of reference for policymakers engaged in rural development with a specific focus on Sustainable Development Goals.
