Relating Humanities And Social Thought:

Relating Humanities and Social Thought Abraham Edel, 1990-01-01 In the current atmosphere of controversy about modes of interpreting literature historical influences in science and subtle ideologies in social theory Abraham Edel confronts the institutionalized separation of the humanities and the sciences the segregation of disciplines through structures that rest on entrenched dualisms and the isolations reenforced by habits of the academy and its struggles over turf Edel s search for connections carried out not only theoretically but through a series of particular studies spanning major disciplines from philosophy and social theory to jurisprudence biography and cultural anthropology leads into uncharted waters He faces the startling conclusion that the clue to answering internal questions characteristically turns out to come from trans discipline relations This fourth volume of Edel s *Science Ideology and Value* focuses in a Deweyan vein on the functional requirements at the base of the social sciences and humanities alike discipline structures are subject to change development and decay and even to categorial shifts as well as to readjustments At the same time Edel s philosophical naturalism helps diagnose the obstacles to research that stem from imposed dualisms such as theory and practice subjectivity and objectivity fact and value individual and society as well as social contrasts of elite and mass Normative structures are to be held responsible to inquiry and a self conscious exploratory practice is needed to minimize the risks of arbitrary closures For those who wish to get beyond sloganeering in the world of education humane learning and the social and historical sciences this book is a must

In Search of the Ethical Abraham Edel, 1993-01-01 The twentieth century has been rich in the variety of its ethical theories Since the turn of the century contending philosophical positions have tended to view ethics either as spiritual and separate from the natural world or as a function of bodily or material forces Although both factions had roots in older philosophies the speed and complexity of modern development in science and technology engendered a multiplicity of smaller schools within traditional domains In the fifth volume of *Science Ideology and Value* Abraham Edel offers a consideration of some of the major moral theories of this troubled century and a guide to their historical development and context In treating the newer and distinctively twentieth century philosophical schools Edel concentrates on movements rather than on the individual philosopher s rounded theory The treatment of John Dewey comes in a chapter on pragmatic tests and ethical insights while that of Edward Alexander Westermarck comes in a larger discussion of ethical relativism Edel s consideration of John Rawls and Alasdair MacIntyre provides a broader lesson in the problems and pitfalls of dealing with ethical ideas apart from history and social context Edel observes that while the concepts of morality and the theories in which they are enmeshed have been familiar subject matter of ethical theory the one topic that has been little explored is changes over time in ethical practice While the fact of different moralities and the rise and fall of a given morality have been dealt with in a historical vein how such changes have impacted the theory of ethics as such has received only limited treatment Edel devotes significant space to this topic noting that the study of moral change may yield both a deeper understanding of

the functioning of morality within the social culture as well as new vistas on the function of ethical theories themselves

Hobbes and Human Nature Arnold W. Green, 1993-01-01 Several excellent modern books about Hobbes either focus upon his life or analyze his ideas in a technical way Green's unique treatment of the English philosopher explores how his times helped shape his basic postulates which are then linked with his personal experiences an exercise in modern relativism that Hobbes and his generation would not have appreciated Hobbes's outlook still remains more relevant to the present time than to the two intervening centuries The faith that human nature has changed with time and circumstance has waned Hobbes and Human Nature is a study in applied social theory Green discusses those issues that Hobbes either stated or provoked individuals and society as metaphor religion and atheism sovereignty and the law intellectuals and the dominance of minorities over the majority the precedence of perceived interests over ideas and the failure of history to determine human fate The standard comparison with Rousseau is made with less emphasis upon character than upon revolution and Utopian hope This volume should be of interest to philosophers historians sociologists and political scientists It may find some place as assigned reading for undergraduate and especially for graduate students *Traditions of Systems Theory* Darrell

Arnold, 2013-12-17 The term systems theory is used to characterize a set of disparate yet related approaches to fields as varied as information theory cybernetics biology sociology history literature and philosophy What unites each of these traditions of systems theory is a shared focus on general features of systems and their fundamental importance for diverse areas of life Yet there are considerable differences among these traditions and each tradition has developed its own methodologies journals and forms of analysis This book explores this terrain and provides an overview of and guide to the traditions of systems theory in their considerable variety The book draws attention to the traditions of systems theory in their historical development especially as related to the humanities and social sciences and shows how from these traditions various contemporary developments have ensued It provides a guide for strains of thought that are key to understanding 20th century intellectual life in many areas *Toward a New Enlightenment* Paul Kurtz, Paul Kurtz has been the dominant voice of secular humanism over the past thirty years This compilation of his work reveals the scope of his thinking on the basic topics of our time and his many and varied contributions to the cause of free thought It focuses on the central issues that have concerned Kurtz throughout his career ethics politics education religion science and pseudoscience The chapters are linked by a common theme the need for a new enlightenment one committed to the use of rationality and skepticism but also devoted to realizing the highest values of humanist culture Many writings included here were first published in magazines and journals long unavailable Some of the essays have never before been published They now appear as a coherent whole for the first time Also included is an extensive bibliography of Kurtz's writings *Toward a New Enlightenment* is essential for those who know and admire Paul Kurtz's work It will also be an important resource for students of philosophy political science ethics and religion Among the chapters are Humanist Ethics Eating the Forbidden Fruit Relevance of

Jafari** Seyed Javad Miri, 2010-08-14 When one speaks of sociology places such as the US UK Germany and France come to mind To western or even eastern students of social sciences the very idea that outside Europe and America one could come across sociological debates or theoretical debates on socio cultural issues comes as a surprise to say the least In this work the author presents the work of Allama M T Jafari an Iranian contemporary social thinker who worked within the parameters of Primordial School of Social Theory This work is an attempt to enrich the existing literature on comparative sociology and social philosophy *The Bloomsbury Encyclopedia of Philosophers in America* John R. Shook, 2016-02-11 For scholars working on almost any aspect of American thought The Bloomsbury Encyclopedia to Philosophers in America presents an indispensable reference work Selecting over 700 figures from the Dictionary of Early American Philosophers and the Dictionary of Modern American Philosophers this condensed edition includes key contributors to philosophical thought From 1600 to the present day entries cover psychology pedagogy sociology anthropology education theology and political science before these disciplines came to be considered distinct from philosophy Clear and accessible each entry contains a short biography of the writer an exposition and analysis of his or her doctrines and ideas a bibliography of writings and suggestions for further reading Featuring a new preface by the editor and a comprehensive introduction The Bloomsbury Encyclopedia to Philosophers in America includes 30 new entries on twenty first century thinkers including Martha Nussbaum and Patricia Churchland With in depth overviews of Waldo Emerson Margaret Fuller Noah Porter Frederick Rauch Benjamin Franklin Thomas Paine and Thomas Jefferson this is an invaluable one stop research volume to understanding leading figures in American thought and the development of American intellectual history **Department of the Interior and Related Agencies Appropriations for 1976** United States. Congress. House. Committee on Appropriations. Subcommittee on Department of the Interior and Related Agencies, 1975 **Department of the Interior and Related Agencies Appropriations for 1976** United States. Congress. House. Committee on Appropriations, 1975 **The Decomposition of Sociology** Irving Louis Horowitz, 1994 The author examines the field of sociology and the closing of many sociology departments and then proposes an alternative positive view of social research Jacket Accounting and Social Theory Lisa Jack, 2016-10-14 Is society possible without accounting In speech or in writing we communicate actions plans and decisions using numbers calculations words and images Although accounting research is dominated by quantitative analyses the role of accounting in society is firmly established over thousands of years In this concise book Lisa Jack demonstrates the power of social theory in expanding the value of accounting research Accounting and Social Theory An introduction includes advice on research problems as well as guidance on fertile areas for new research

The tools techniques and developments covered by the author help readers to see social research in accounting as the study of the use misuse and abuse of accounting communications by people and the effects that this has on social relationships. Stories of accounting in war agriculture and food gender health and other areas illustrate the ways in which the threads of accounting run through society. Having emerged from the author's wealth of teaching experience this book provides a student focused treasure trove that illuminates the field for early career researchers in accounting and established academics looking to expand the impact of their work.

Postcolonial Thought and Social Theory Julian Go, 2016. Social scientists have long resisted the radical ideas known as postcolonial thought while postcolonial scholars have critiqued the social sciences for their Eurocentric focus. However in *Postcolonial Thought and Social Theory* Julian Go attempts to reconcile the two seemingly contradictory fields by crafting a postcolonial social science. Contrary to claims that social science is incompatible with postcolonial thought this book argues that the two are mutually beneficial drawing upon the works of thinkers such as Franz Fanon Amilcar Cabral Edward Said Homi Bhabha and Gayatri Spivak. Go concludes with a call for a third wave of postcolonial thought emerging from social science and surmounting the narrow confines of disciplinary boundaries.

Crisis and Commonwealth Charles Reitz, 2013-08-29. *Crisis and Commonwealth* Marcuse Marx McLaren advances Marcuse scholarship by presenting four hitherto untranslated and unpublished manuscripts by Herbert Marcuse from the Frankfurt University Archive on themes of economic value theory socialism and humanism. Contributors to this edited collection notably Peter Marcuse Henry Giroux Peter McLaren Zvi Tauber Arnold L Farr and editor Charles Reitz are deeply engaged with the foundational theories of Marcuse and Marx with regard to a future of freedom equality and justice. Douglas Dowd furnishes the critical historical context with regard to U.S. foreign and domestic policy particularly its features of economic imperialism and militarism. Reitz draws these elements together to show that the writings by Herbert Marcuse and these formidable authors can ably assist a global movement toward intercultural commonwealth. The collection extends the critical theories of Marcuse and Marx to an analysis of the intensifying inequalities symptomatic of our current economic distress. It presents a collection of essays by radical scholars working in the public interest to develop a critical analysis of recent global economic dislocations. Reitz presents a new foundation for emancipatory practice a labor theory of ethics and commonwealth and the collection breaks new ground by constructing a critical theory of wealth and work. A central focus is building a new critical vision for labor including academic labor. Lessons are drawn to inform transformative political action as well as the practice of a critical multicultural pedagogy supporting a new manifesto for radical educators contributed by Peter McLaren. The collection is intended especially to appeal to contemporary interests of college students and teachers in several interrelated social science disciplines sociology social problems economics ethics business ethics labor education history political philosophy multicultural education and critical pedagogy.
