Relating Humanities And Social Thought:

Relating Humanities and Social Thought Abraham Edel, 1990-01-01 In the current atmosphere of controversy about modes of interpreting literature historical influences in science and subtle ideologies in social theory Abraham Edel confronts the institutionalized separation of the humanities and the sciences the segregation of disciplines through structures that rest on entrenched dualisms and the isolations reenforced by habits of the academy and its struggles over turf Edel's search for connections carried out not only theoretically but through a series of particular studies spanning major disciplines from philosophy and social theory to jurisprudence biography and cultural anthropology leads into uncharted waters He faces the startling conclusion that the clue to answering internal questions characteristically turns out to come from trans discipline relations This fourth volume of Edel's Science Ideology and Value focuses in a Deweyan vein on the functional requirements at the base of the social sciences and humanities alike discipline structures are subject to change development and decay and even to categorial shifts as well as to readjustments At the same time Edel's philosophical naturalism helps diagnose the obstacles to research that stem from imposed dualisms such as theory and practice subjectivity and objectivity fact and value individual and society as well as social contrasts of elite and mass Normative structures are to be held responsible to inquiry and a self conscious exploratory practice is needed to minimize the risks of arbitrary closures For those who wish to get beyond sloganeering in the world of education humane learning and the social and historical sciences this book is a must

In Search of the Ethical Abraham Edel, 1993-01-01 The twentieth century has been rich in the variety of its ethical theories Since the turn of the century contending philosophical positions have tended to view ethics either as spiritual and separate from the natural world or as a function of bodily or material forces Although both factions had roots in older philosophies the speed and complexity of modern development in science and technology engendered a multiplicity of smaller schools within traditional domains In the fifth volume of Science Ideology and Value Abraham Edel offers a consideration of some of the major moral theories of this troubled century and a guide to their historical development and context In treating the newer and distinctively twentieth century philosophical schools Edel concentrates on movements rather than on the individual philosopher's rounded theory The treatment of John Dewey comes in a chapter on pragmatic tests and ethical insights while that of Edward Alexander Westermarck comes in a larger discussion of ethical relativism Edel's consideration of John Rawls and Alasdair MacIntyre provides a broader lesson in the problems and pitfalls of dealing with ethical ideas apart from history and social context Edel observes that while the concepts of morality and the theories in which they are enmeshed have been familiar subject matter of ethical theory the one topic that has been little explored is changes over time in ethical practice While the fact of different moralities and the rise and fall of a given morality have been dealt with in a historical vein how such changes have impacted the theory of ethics as such has received only limited treatment Edel devotes significant space to this topic noting that the study of moral change may yield both a deeper understanding of

the functioning of morality within the social culture as well as new vistas on the function of ethical theories themselves

Hobbes and Human Nature Arnold W. Green, 1993-01-01 Several excellent modern books about Hobbes either focus upon his life or analyze his ideas in a technical way Green's unique treatment of the English philosopher explores how his times helped shape his basic postulates which are then linked with his personal experiences an exercise in modern relativism that Hobbes and his generation would not have appreciated Hobbes's outlook still remains more relevant to the present time than to the two intervening centuries The faith that human nature has changed with time and circumstance has waned Hobbes and Human Nature is a study in applied social theory Green discusses those issues that Hobbes either stated or provoked individuals and society as metaphor religion and atheism sovereignty and the law intellectuals and the dominance of minorities over the majority the precedence of perceived interests over ideas and the failure of history to determine human fate The standard comparison with Rousseau is made with less emphasis upon character than upon revolution and Utopian hope This volume should be of interest to philosophers historians sociologists and political scientists It may find some place as assigned reading for undergraduate and especially for graduate students

Toward a New Enlightenment Paul Kurtz, Paul Kurtz has been the dominant voice of secular humanism over the past thirty years This compilation of his work reveals the scope of his thinking on the basic topics of our time and his many and varied contributions to the cause of free thought It focuses on the central issues that have concerned Kurtz throughout his career ethics politics education religion science and pseudoscience The chapters are linked by a common theme the need for a new enlightenment one committed to the use of rationality and skepticism but also devoted to realizing the highest values of humanist culture Many writings included here were first published in magazines and journals long unavailable Some of the essays have never before been published They now appear as a coherent whole for the first time Also included is an extensive bibliography of Kurtz's writings Toward a New Enlightenment is essential for those who know and admire Paul Kurtz's work It will also be an important resource for students of philosophy political science ethics and religion Among the chapters are Humanist Ethics Eating the Forbidden Fruit Relevance of Science to Ethics Democracy without Theology Misuses of Civil Disobedience The Limits of Tolerance Skepticism about the Paranormal Legitimate and Illegitimate Militant Atheism vs Freedom of Conscience Promethean Love Unbound The Case for Euthanasia and The New Inquisition in the Schools

Postcolonial Thought and Social Theory

Julian Go,2016-09-23 Social scientists have long resisted the radical ideas known as postcolonial thought while postcolonial scholars have critiqued the social sciences for their Euro centric focus However in Postcolonial Thought and Social Theory Julian Go attempts to reconcile the two seemingly contradictory fields by crafting a postcolonial social science Contrary to claims that social science is incompatible with postcolonial thought this book argues that the two are mutually beneficial drawing upon the works of thinkers such as Franz Fanon Amilcar Cabral Edward Said Homi Bhabha and Gayatri Spivak Go concludes with a call for a third wave of postcolonial thought emerging from social science and surmounting the narrow confines of disciplinary boundaries Foundations of Critical Race Theory in Education Edward Taylor,David Gillborn,Gloria Ladson-Billings,2023-01-30 Critical Race Theory CRT is at the forefront of contemporary discussions about racism and race
