Introduction to the Social Sciences (RLE Social Theory) Maurice Duverger, 2020-09-10. Professor Duverger at last provides the student with an overall view of the methodology of the social sciences. He briefly traces the origin of the notion of a social science, showing how it emerged from social philosophy. Its essential elements and pre-conditions are described; the splintering of social science into specialist disciplines is explained, and the need for a general sociology confirmed. The techniques of observation used by social scientists are dealt with in some detail, and the unity of the social sciences is illustrated by examples of the universal application of these techniques. Documentary evidence in its various forms are described, along with the basic analytical techniques including quantitative methods and content analysis. Other methods of gathering information through polls, interviews, attitude scales and participant observation are all described. Professor Duverger brings together the different kinds of analysis used to assess the information thus gathered. Arguing that observing and theorizing are not two different stages or levels of research, he examines the practical value and difficulties of general sociological theories, partial theories and models, and working hypotheses. He both describes and assesses the limitations of experiment and the scope of comparative methods in the social sciences. He then gives elementary instructions for using and assessing the value of mathematical techniques. The possibilities of presenting social phenomena through graphs and charts are also explored. There are useful book lists and diagrams.

Syntax. 2. Halbband Joachim Jacobs, Arnim von Stechow, Wolfgang Sternefeld, Theo Vennemann, 2008-07-14. No detailed description available for SYNTAX. JACOBS U A HSK 9 2 E BOOK. *Conversion in the Age of Pluralism*, 2009-09-30. The theme of conversion constitutes a privileged point to study the framework linking an individual to the sociocultural contexts in which he or she is included. Changes in personal biographies and sociocultural change are interwoven when we speak of conversion: values, speech norms, behaviors, beliefs, lifestyles, interests, everything is open to potential debate when an individual converts. Conversion is especially developed here through a connection with the dynamics of pluralism, which appears to be the most peculiar cultural characteristic of our era. What does it mean to speak of conversion in a time in which it seems that the presumption of only one true truth no longer exists, while instead many different truths live together, each with its own judgment criteria?

Politeness, Impoliteness and Ritual Dániel Z. Kádár, 2017-04-27. Ritual is popularly associated with ceremonies, though in real life it plays a significantly more important role, reinforcing what people perceive as the appropriate moral order of things or challenging what they perceive as the inappropriate flow of events. This book introduces the reader to how people use

ritual in interpersonal interaction and the interface that exists between ritual and politeness and impoliteness As rituals have a large impact on the life of people and communities the way in which they use politeness and impoliteness in a ritual action significantly influences the way in which the given ritual is perceived Politeness Impoliteness and Ritual examines this complex relationship by setting up a multi layered analytic model with a multidisciplinary approach which will appeal to interaction scholars politeness researchers social psychologists and anthropologists and moral psychologists It fills an important knowledge gap and provides the first im politeness focused interactional model of ritual

Personal Adornment and the Construction of Identity Hannah V. Mattson, 2021-06-09 Objects of adornment have been a subject of archaeological historical and ethnographic study for well over a century Within archaeology personal ornaments have traditionally been viewed as decorative embellishments associated with status and wealth materializations of power relations and social strategies or markers of underlying social categories such as those related to gender class and ethnic affiliation Personal Adornment and the Construction of Identity seeks to understand these artefacts not as signals of steady pre existing cultural units and relations but as important components in the active and contingent constitution of identities Drawing on contemporary scholarship on materiality and relationality in archaeological and social theory this book uses one genre of material culture items of bodily adornment to illustrate how humans and objects construct one another Providing case studies spanning 10 countries three continents and more than 9 000 years of human history the authors demonstrate the myriad and dynamic ways personal ornaments were intertwined with embodied practice and identity performativity the creation and remaking of social memories and relational collections of persons materials and practices in the past The authors careful analyses of production methods and composition curation heirlooming and reworking decorative attributes and iconography position within assemblages and depositional context illuminate the varied material and relational axes along which objects of adornment contained social value and meaning When paired with the broad temporal and geographic scope collectively represented by these studies we

gain a deeper appreciation for the subtle but vital roles these items played in human lives *Deixis and Alignment* Fernando Zúñiga, 2006-01-01 This book proposes a notion of inverse that differs from two widespread positions found in descriptive and typological studies one of them restrictive and structure oriented the other broad and function centered This third stance put forward here takes both grammar and pragmatic functions into account but it also relates the opposition between direct and inverse verbs and clauses to an opposition between deictic values thereby achieving two advantageous goals it meaningfully circumvents one of the usual analytic dilemmas namely whether a given construction is passive or inverse and it refines our understanding of the cross linguistic typology of inversion This framework is applied to the description of the morphosyntax of eleven Amerindian languages Algonquian Plains Cree Miami Illinois Ojibwa Kutenai Sahaptian Sahaptin Nez Perce Kiowa Tanoan Arizona Tewa Picuris Southern Tiwa Kiowa Mapudungun **Cases and Thematic Roles** Beatrice

Primus, 2010-09-03 This book is concerned with the mapping of thematic roles such as agent and patient onto syntactic cases such as nominative or ergative or onto structural relations It shows that cases and structural relations code different aspects of thematic structure The thematic determination of the structural relation of an argument is confined to its position in the thematic structure of the predicate Case mapping is determined by the number of basic thematic concepts involved in this structure This fact and other facts presented in the book presuppose an approach to thematic roles that decomposes them into more basic concepts involving volitionality causation activity sentience possession etc and motivate the hypothesis that syntactic cases cannot be derived from structural relations in universal grammar The phenomena pertaining to relational typology that classifies languages into ergative accusative and active languages are shown to be restricted to case mapping The specific thematic determination of case mapping and the hierarchical organization of case systems explain not only the existence of these types of mapping but also the fact that ergative and active phenomena are typically case based The book provides a global cross linguistic perspective but German data recurrently serve as an illustration of the main theoretical assumptions
