Psychoanalytic Patterns in the Work of Graham Greene Roland A. Pierloot,2023-12-14 In Greene s writings we notice a
genuine concern with social and political conflicts at different places in the world But at the same time they bear witness to a
distinct involvement in problems of human nature and behaviour In this respect we can formulate some dominating
preoccupations such as the stressing of antitheses and antagonisms which he calls himself cleavage the questioning of loyalty
and the claiming of the right to disloyalty the repercussion of childhood experiences in particular the father son relationship
on adult life and the transcendental dimension in human experience From a psychoanalytic viewpoint we analyse the various
elaborations of these general themes in the work of Greene as symbolizations of specific unconscious phantasies defined in
the writings of Freud Klein Fairbairn Kernberg Kohut and Winnicott This analysis of the imaginary world of an author is
conceived as analogous to a clinical psychoanalysis It is a hermeneutical activity based on the countertransference
experience evoked by the reading of the text while taking into account the manifold strategies of symbolizing in a literary
work the choice of the genre themes text construction tropes word plays figurative language repetition discontinuity
